Federated Women's Institutes of Canada
 GREETING from Mrs. D. Watt, President To the Members.
 This is just a brief message of encouragement and good wishes to the members of our Women's Institutes throughout Canada. Our Federation is destined to create a strong and powerful impetus towards national unity. It brings us together to study our separate problems and to find a solution for them. Incidentally it is binding us together in a bond of friendship and sisterhood extending from coast to coast.
 This bond of sympathy is more than ever necessary in days when public speakers are openly stating that Confederation is tottering and are actually contemplating the possibility of a divided Canada. We have only to look at Europe, torn by intrigue and jealousy and seething with discontent and suspicion, to realize what a divided Canada would mean.
 As a solid basis for this loyalty we have our own programme with its emphasis on love of home and country, and on its attempt to bring together in good-will and friendship.
 This good-will between individuals is the foundation of national and international good-will and it is only by its exercise that we can better conditions. Let then, the women of our Federate Women's Institutes of Canada stand together in undivided loyalty to Confederation. This should not be difficult for those whose programme is founded on love of Home and Country.

arrangements it has been considered best to hold this convention in Victoria, British Columbia, from June 23rd to 27, 1925. The Provincial Convention of British Columbia is to meet during the same week—the two programmes being made to dovetail, as far as possible.
 Without going into details which have not yet been worked out, it is probable that the business sessions of the F. W. I. C. will be conducted during the morning and that a combined programme will be arranged for the afternoons. Possibly the whole of Friday in that week will be given over to the F. W. I. C. programme. A final business session on Saturday morning, June 27th, will bring the Biennial to a close.
 (b) Representation.
 It has been thought to be in the best interests of the F. W. I. C. to have every province represented and to pay the travelling expenses of one from each of the nine provinces. This is going one step further than that of paying the expenses of the officers only. It entails the expenses of the officers and in addition those of one person from each of those provinces which are not represented by an officer.
 e.g. Manitoba will be represented by the President and Corresponding Secretary. Alberta will be represented by the Recording Secretary, New Brunswick will be represented by the Treasurer, Nova Scotia will be represented by the First Vice-President, Ontario will be represented by the Second Vice-President and in addition: Prince Edward Island will be represented by one delegate, Quebec, will be represented by one delegate, Saskatchewan will be represented by one delegate, British Columbia will be represented by one delegate.
 In this way we ought to get the full national view-point because of having someone present from each province. This is a far better plan than that of paying the expenses of the officers only, as we feared might be the case a short time ago.
 With regard to the delegates from Prince Edward Island, Saskatchewan and Quebec, the Superintendents of these provinces kindly let me know at their earliest convenience who is to represent their respective provinces? I shall then be able to arrange for the payment of their travelling expenses. Each of these representatives will make her own choice as to route etc., the only stipulation being that she should be in Victoria at the latest by Monday night, June 23rd, and ready for business on Tuesday morning at 9 a.m. Besides the railway fare and sleeper your delegate will be allowed \$3.00 a day for meals on the train, (without stopovers), and \$4.50 a day during the five days stay in Victoria.
 If after your F. W. I. C. allotment has been met, your provincial funds can stand the expense of sending a second delegate (in addition to the one being taken at the expense of the F. W. I. C.) by all means send an extra delegate. In any case, whether you send one or two delegates, your province will have two votes. This is to ensure equal voting power for provinces, large and small alike.

OUR PROGRESS IN GARDENING
 Although dependent upon plants for food and clothing, there is no subject upon which humanity in general is so ignorant and of which it is so heedless as plant life. Knowledge of plants which are passed by every day is strangely lacking. People will pass under the same trees every day who could't for the life of them tell what kind of trees they were. The apathy towards growing things, however, is being dispelled by a remarkable growth of gardening during the last few years, particularly in ornamental gardening, which seems to be outstripping vegetable growing in cities.
 However, when a home-owner starts planting flowers, a vegetable garden is very likely to be added before he is done. The growth of gardening interest has developed a knowledge of plants which is constantly growing and will continue to grow as the value of both vegetable growing and ornamental planting secures recognition. Nearly every suburb now has its garden club, which is, in great measure, responsible for an increased interest in growing things.
 This increase in interest is reflected in the trade lists of seeds and plants, the growing demand for an incentive to growers to enlarge their stocks of varieties. In the vegetable garden we will now find scores of varieties from which to select where, a few years ago, half a dozen would be the limit. The improvement in vegetables and flowers has been remarkable, so now it is a matter of considerable study to determine which varieties to grow, as each year brings in new ones.
 Each garden now becomes a test plot, the gardener, with growing knowledge and experience, being more exacting in his demands for the best quality seeds and plants of the most up-to-date improved varieties. In this connection, a notebook hung in a handy corner will prove a useful adjunct to the home garden, making notes in it of varieties of vegetables which have been the most reliable producers in your own garden or that of your neighbors. It will serve as a good guide to making out the seed order.

Women and Asthma. Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

THE FEDERATED WOMEN'S INSTITUTES OF CANADA
 To the Officers and Conveners of Standing Committees, Presidents, Representatives and Superintendents of Women's Institutes.
PROGRESS REPORT
 January 1st to April 30th, 1925
 This is to let you know what has been happening for the past four months. Some report should have gone out at the end of March, but Mrs. Watt thought it better to wait until there was something definite to tell you about the coming Biennial Convention.
 1. Financial Statement.
 As the whole programme for the year depends on our income, the report of the Treasurer should come first. This will be found attached at the end of this Progress Report. From this you will see that we had a balance in hand of \$1091.04 on March 1st, 1925; that \$795.20 has been received since; and that the total amounts to \$1886.24, without any deductions for the current expenses of March and April, 1925. With this sum in hand, \$1886.24, (less certain current expenses), it would seem very risky to assume the expenses of a national Convention meeting at the western extreme of this wide Dominion, but we have decided to go forward with arrangements. The strictest economy, however, will have to be observed. Further we are only taking this big step in the interests of nationality unity, because we have every confidence in the good faith and support of the provinces.
 2. The Biennial Convention.

INSIDIOUS EYE STRAIN
 We use this adjective advisedly.
 Sufferers from Eye-strain may have perfect vision and therefore do not suspect the presence of any eye defect.
 The motive power of the entire human organism is Nerve Energy.
 Normal eyes, it is computed, utilize about 20% of this Nerve Energy, but when Eye-strain is present, a much larger proportion is required. Hence defective eyes, through their consumption of an excessive amount of Nerve Energy, may seriously affect the functioning of other organs of the body, and produce ill health.
