Central Guardian My Sleep Was Often Disturbed With Pains In My Stomach

"BON-TONE HAS MADE ME FEEL 100 PERCENT BETTER," SAYS MR. JONES.

MR. C. JONES

me the desired results. Everything ate would sour and form gas and would get severe pains in my side and back. I finally got so bad that I lost all desire for food. Yet often my sleep was disturbed due to pains in my stomach. Due to not getting the proper sleep nights, I would feel miserable. My kidneys were also bad and constipation was another thing I had to contend with and this necessitated my taking strong laxa-tives with but temporary relief, of course. I have now taken several bot-tles of Bon-Tone and cannot say en-ough for it. My appetite is good and I never have any more pains after eat-ing, but my food digests as it should as my stomach is back to normal. I sleep just great and when I wake in the morning feel fine—thoroughly rested and ready for the day. Con-stitution has been banished and I feel just 100 p. c. better in every way and all the credit goes to this great herbal remedy—Bon-Tone.

Bon-Tone is sold in Charlottetown by the Ross Drug United and by all tried many different remedies to give first-class druggists,

Harrington, Nine Mile Creek, cele-brated her ninetieth birthday by giv-ing, silently, in his old place, a goose supper to her friends and relatives. Among those present were her two sisters, Mrs. Mary In-man, Victoria, and Mrs. C. Farrar, Hampton, both well past the four-score mark and still active, besides her nieces and nephews and other relatives from Hampton. Mrs. Har-rington is the oldest living member of her family on the Island and is still strong and robust, able to attend to her household duties each day, and to converse as intelligently as ever and is eagerly looking forward to the Inman picnic of 1931. For the last number of years she has made braided rugs for the exhibition and last year took the first prize for a most artistic rug. Mrs. Harrington was the recipient of a number of birthday gifts from friends both at home and abroad, accompanied by their best wishes for many more happy birthdays. In her home she is a real treasure and has helped to tenderly care for her five great-grandchildren, to whom she is most attached. She was born at Hamp-ton, P.E.I. and is the eldest daugh-ter of the late John Inman and his wife Jane Webster, who emigrated to this country in the year 1819 from Yorkshire, England. The other sur-viving members of her family are Mrs. Mary Inman, Victoria, aged 88; Mrs. Grace Sturdy, Victoria, 86; Mrs. Caroline Farrar, Hampton, 84; and one brother John T. Inman, Hamp-ton, aged 82, all of whom are still ac-tive. This is certainly a splendid re-cord for any family and is hard to beat.

TRAFALGAR DAY CELEBRATION—As a suitable recognition of Trafalgar Day Mrs. J. A. Matheson, regent of the Royal Edward Chap-ter of the I. O. D. E. of this city, entertained at afternoon tea yes-terday at her home, being assisted by different members of the local chapter. This delightful social func-tion was also attended by members of the Aegwett Chapter of Sum-merside, who drove down for the occasion.

P. W. C. DEBATES—"Resolved that elective studies should be in-troduced into Prince of Wales College" was the subject discussed by Section A of the P. W. C. Debating Society yesterday. The Pro side carried the argument by a vote of twenty-nine to seventeen. The speakers sup-porting the resolution were Gordon Ben-net, Plus Callaghan, M. Estelle Mc-Donald, Harvey Bishop. The speak-ers on the Con side were John Den-ny, Fred Jenkins, Winnie Best, and Winston Currie. Mildred Cox was critic. In Section B the subject dis-cussed was "Resolved that ambition has done more harm than good." Con side won by a vote of twenty-five to sixteen. The speakers for the Pro side were Kenneth McPadyen, Carmalta Solomon, Ada McDougall, Catherine Nicholson. Those speak-ing against the resolution were Ernest Reid, Mary Quinn, Jean McDonald, and Catherine Rogers. Glen Mc-Pherson was critic.

CELEBRATES 90TH BIRTHDAY—On Friday, Oct. 17th, Mrs. Elizabeth

MRS. MARCUS FERGUSON

The community of Hampton was suddenly plunged into sorrow by the death of Mrs. Marcus Ferguson, which occurred at the Charlottetown Hospital on September 17th, where she had gone for treatment a few days previous. The late Mrs. Fer-guson had not been in her usual good health all summer, but still was able to attend to her duties at home and her death at the age of sixty-two years came as a sudden shock to her family and friends. The deceased was a woman possessed of many good qualities, living her life unselfishly both in the home and in the com-munity.

Her funeral took place on Friday afternoon, September 19th, a short service being held at the home, when afterwards the remains were con-veyed to the United Church, Hampton, where an impressive funeral service was held. Rev. Geo. Ayers officiating. A very large concourse of sympath-etic friends and neighbors assembled to do honor unto one who was truly loved and respected by all who knew her.

She leaves to mourn, a sorrowing husband and the following sons and daughters: Mrs. Roy Smalley, Lowell, Mass.; Myrtle, Cambridge, Mass.; Mrs. Edwin Boyce, Bonshaw; John, Albany, P.E.I.; Frank, Milton, Victor-ia, and Ada at home, besides her two sisters, Mrs. Hannah Graham, Port-land, Me.; Mrs. Jessie Arbing, Char-lottetown and one brother Frank, Bell, Grattan, Mass.

The pall bearers were Messrs. Wal-ter Ince, Warren Villet, Warren In-man, Charles Inman, Frederick Ince, and E. C. Holm.

The floral offerings included a pil-low from Bonshaw Women's Institute; Crescent, the family; Wrath, Mr. and Mrs. K. C. Holm, Spray, Mr. and Mrs. Warren Inman; Spray, Mr. and Mrs. A. D. Inman. Needless to say the heartfelt sympathy of all goes out to the family in their sud-den bereavement.

NEWSY FARM NOTES
By Agricola

PLUM TREES AND THEIR TROUBLES

I visited an orchard in this neigh-borhood the other day and noted that while apples were scarce, plums were fairly plentiful. Evidence of "Black Knot" was in abundance and that is not to be wondered at in a district where there are so many wild cher-ries, which are also hosts of this pest and nullify all efforts to keep the cultivated plums clear of it. Never-theless there are control methods which will leave the trees reasonably clean, and the orchardist will do well to send for Pamphlet 119, New Ser-ies, wherein these methods are ex-plained.

The wild cherry also harbors an-other troublesome disease—the "Shot-hole" fungus. The leaves are killed as if a fowling piece had been discharged against them. When the attack is very severe, the leaves assume autumnal tints in the middle of the summer, and quickly drop off. In consequence the buds do not form properly and the tree is weakened to that extent. A resident here lost all his cultivated cherry trees from attacks of this fun-gus in two successive years. This is another of the diseases of the plum, and next to the "Black Knot" is most disastrous.

During humid seasons another dis-ease makes its appearance; this is the "Brown Rot" which involves the whole fruit. Generally the fruit dries up and hangs on the tree as a "mum-my," a condition in which it carries the malady over the winter and pro-longs it again in the spring.

A somewhat singular disease is known as "Plum Pockets," which the pamphlet states is severe in Nova Scotia at times. I have not seen it on plums here, but have met with it once or twice on our Choke Cherry, and it is quite possible that some owners of orchards have had experi-ence with it. In this case the fruit is misshapen and hollow.

COMING PRINCE EDWARD FRI.—SAT.
"BULLDOG DRUMMOND" with RONALD COLEMAN

FIFTY DOLLARS PER WORD

An interesting announcement is made by the publicity committee of the World's Grain Exhibition and Conference, which my readers will remember, is timed to take place in 1932 at Regina. The committee offer a prize of \$500 for a "Slogan" which is limited to ten words. Each com-petitor may put in not more than three slogans; and no entry will be received after January 31st 1931. Copies of the rules and regulations governing the contest may be had from the Secretary, World's Grain Exhibition, Imperial Bank Chambers, Regina.

This attractive contest, it must be remarked, is open to competitors all over the world and from the mag-nitude of the prize and the latitude al-lowed in everything but the number of words, it is certain that a slogan of no mean order will be evolved.

"ALL IS SAFELY GATHERED IN"

With the exception of the turnips the most of the fruits and vegetables are safely gathered into the cellar. Keeping them in the best condition requires a study of three factors: hu-midity, temperature and ventilation. Ventilation should be provided for by means of "intake flues" which can be closed in freezing weather. In the cellar itself, narrow, slatted bins will keep most vegetables from heat-ing, and will prove a useful adjunct to the ventilating system. Each class of fruit or root must be stored under its own optimum temperature.

Apples and pears may be stored in boxes, barrels, or crates, in a rather humid atmosphere, and at a temper-ature of about 35 degrees F. Under such conditions they will keep in per-fect order all winter.

Cabbage and celery keep well when planted in sand on the cellar floor; they may be set in rows, fairly close but not touching each other. Cabbage will also keep well if stored on slat-tered trays with the heads two deep on the tray. In this case they should be looked over occasionally and any which begin to rot should be remov-ed, as the rot is liable to infect the rest.

The gourd family—Squash, pump-kins and vegetable marrow—and also onions require a dry atmosphere; but while the latter are content with a temperature from 34 deg. F. to 36 deg., the gourds keep best in a tem-perature around 65 degrees.

All light should be excluded from the cellar, or most of the root crops will endeavor to grow with a conse-quent deterioration.

Potatoes keep best when stored dry in a dark and well ventilated cellar with the temperature ranging from 33 to 35 deg. F. Have as free circula-tion of air as can be managed, and to this end a temporary floor should be laid six inches above the perman-ent floor, of boards with spaces be-tween, and the piles made on this. A similar partition should keep the piles six inches from the wall of the cellar.

ANOTHER USE FOR SOYBEANS

A statement issued by the Domini-on Department of Agriculture re-cords the fact that 1,250,000 lbs. of Soybean oil was imported into Can-ada from the U. S. A. in 1929, most of it being used for fish canning pur-poses. The Department suggests that farmers develop this new opportunity in districts which are found suitable to the growth of this plant.

It is noteworthy that the bean is high both in protein and fat content but the higher the amount of fat, the lower the amount of protein in

The different varieties. The protein content ranges from 40.82 to 46.05 per cent. and the fat from 20.18 to 15.18 per cent. respectively.

The Soybean is valuable also as a legume, and a fodder crop. A pecu-liarity which I noticed in curing a small quantity cut as hay, is that the leaves cling persistently when dry, and do not "shatter" as clover does. Soybean hay contains about 7.68 per cent. of protein as against red clover's 5.41 per cent., says Kellner, while the carbohydrates and fat are about the same per centage. The hay is bulky and hard to handle to secure per-fect curing.

All the seed in my garden plot rip-ened satisfactorily, and those plants which ripened first were hand-pulled and kept separate.

Livestock Market
(Canadian Press)

MONTREAL, Que., Oct. 21.—There were 7 cattle, 9 calves, 584 hogs and 593 sheep and lambs for sale on the two Montreal livestock markets to-day.

The cattle offered were mostly common to plain steers, cows and bulls. Common to just fair quality cows were sold for \$3 to \$4, common bulls brought \$2.75 to \$3.50.

There were only 91 calves offered. They were plain quality grass calves and sales were made around \$4. Good ewes and wethers brought \$8, with medium quality lambs at \$7.75. Culls and bucks were discounted \$2 per cwt.

Sheep were mostly \$4 with odd tops at \$5.

Hogs were unsettled. Receipts were about equally divided between the two markets. On one market sales were made at \$11.50, with about 60 hogs at \$11.75. On the other mar-ket about 150 hogs were weighed up on contract at \$11.50 for butchers and hams, with \$1 premium per hog on selects and fresh sales were made at \$11.25 for good hogs. Sows were mostly \$10.

IN MEMORIAM

MR. WILLIAM VESEY, OF YORK

Mr. William Vesey, son of Robert and Eliza Douglas Vesey, died at York August 2, 1930. Mr. Vesey was born at York on May 28th, in the year 1845, having therefore lived to the ripe age of eighty-five. One son, Thomas Douglas Vesey, who was a promising student for the Methodist Ministry, died at the age of twenty-four. Two other sons are still living, Rev. Robert Herbert Vesey, who is the minister in the United Church at Morse, Saskatchewan, and Ed-ward John Vesey, who resides still at York. There is also one daughter, (Agnes Watt) Mrs. Hammond Vesey and there are also five grandchild-ren.

Mr. William Vesey lived his whole long life as a farmer at York, P.E.I., and possessed those characteristics which compel the respect of the en-tire community, being honest, in-dustrious and friendly to all. His wife, Margaret E. Stewart Vesey, predeceased her husband twenty-three years ago.

The funeral service was held at the home on August 4th, and was con-ducted by the pastor, Rev. P. E. Boothroyd. Favorite hymns of the deceased "Come let us join our cheer-ful songs" and "The Lord is my Shepherd" were sung. A large gather-ing of sympathetic friends, includ-ing many from Mount Stewart, as-sembled to show their last respects.
