Dorothy Dix Says—

(Continued on Page 11 Col. 8)

they look with pity, not envy, upon their sisters who are tied down with children, and who have to ask their husbands' permission to go to the movies, or buy a new hat.

Many girls are scared off from matrimony by the failure that their parents have made of it. They have grown up in homes of strife, watching their fathers and mothers fight like cats and dogs, and what they are looking for in life is peace, not husbands.

Many women are old maids because their parents kept them from marrying the men they loved. Maybe the boy friend came from the wrong side of the tracks. Maybe he lacked social graces and was dumb in a crowd. Maybe he didn't know how to pick out his clothes. Maybe Mother had ambitions for Mary and was sure she would be much happier married to a rich old banker than to a poor young clerk, so she broke up the match, and Mary never married because to her it was one dream to a lifetime.

Thousands of girls are old maids because they were sacrificed on the family altar. From the schoolroom they went into the workroom, and they never had a chance even to think of love and marriage because they had to support Mother and Father and a horde of little brothers and sisters.

Many women never marry because they never have a chance to meet eligible men. They live in small villages from which all of the men have fled. Others do not marry because the men they want do not want them. And still others are spinsters because Mr. Right didn't come down their alley.

So this is the way of the old maid, and if many of them regret that they haven't husbands, the other half thank heaven they are free, and that is as near as we ever come to being satisfied with any condition in life.
