

FOR THE WOMAN READER BY FLORENCE RIDDICK BOYS

Working One's Way in College

"Save enough money to pay your way the first semester, and then go to college," is the advice given by many educational authorities...

To work one's way through college requires good health and energy. It interferes somewhat with one's studies and campus activities...

In college towns, the residents get accustomed to giving much work to college students. The work is not always to the liking of the students...

Cook greens of all kinds in a very small amount of water and do not cook them too long. Ten minutes is sufficient...

Smiles "And a woman spoke, saying, 'Tell us of Pain'."

Trials Of Indigestion Errors About This Trouble Into Which People Fall.

Many people so far misunderstand the digestive system as to treat it like a machine; neglecting irritating it works sluggishly, then the use of purgatives, which do little good...

The Refrigerator A large refrigerator costs more in the first place, but is more economical to operate...

With the seamless refrigerator of today, it is no longer necessary to scald the ice-box to remove warm water in washing it...

Whenever the doors to the refrigerator are opened, they should be closed again as quickly as possible. When getting things out...

Before opening the ice box to put food away after a meal, gather up all the dishes to go into the ice box...

Once Was Dry Land Dr. Gleason's ecological survey, conducted in cooperation with the insular government...

Woman Suffered until Relieved by Taking Lydia E. Pinkham's Vegetable Compound

St. Charles, Quebec. "I was married three years and had no children. I was always troubled with pain in the abdomen...

Nervous and Run-down Hamilton, Ont. "I was nervous and run-down, and always had a tired feeling and no appetite..."

Lydia E. Pinkham's Vegetable Compound is the best in the world for me. It has done me more good than anything else I ever tried...

St. Charles, Quebec. "I was married three years and had no children. I was always troubled with pain in the abdomen..."

Nervous and Run-down Hamilton, Ont. "I was nervous and run-down, and always had a tired feeling and no appetite..."

One Hundredth Anniversary of the Activities of the Baptist Denomination on Prince Edward Island

By John James Sidey, M.A., D.D., Pastor of the Central Bedouque Baptist Church.

The last few years have been epoch-making times. History has been made more rapidly since 1914 than at any other period of the world's history...

The last three years have seen mighty changes in the Church Life of Canada. It has been the opportunity of the Corporation Principle as applied to denominational polity and out of it has emerged the United Church...

John James Sidey, M.A., D.D., Author of the Pageant "The Overcomers."

United Church, comprising the great bodies of the Presbyterian, Methodist and Congregational now United on the same basis of doctrine and Church Government.

Rightly or wrongly, the Baptist denomination has not joined this merger. Many Baptists look with strong favor upon the Union...

The Baptist Church has always maintained the independence of the local Church. The very earliest Baptist Churches were little more than isolated congregations...

The first church erected in Central Bedouque was on the opposite side of the road to the present structure, and as far as the records now extant permit...

These people came from New Brunswick, and were led by Isaac Bradshaw. About the same time the cause received additional support from another group of people...

Among these groups three names stand out very prominently in connection with the founding of the Baptist denomination. These names are Schurman, Bagnall and Robbins...

William Schurman came to Bedouque about 1855. The Bagnalls came a little later. Some years after settling in Bedouque, William Schurman joined the little group of Baptists...

One name stands out perhaps more prominently than any other among these early pioneers that sowed the seed of the faith...

He came over unsupported by the English flag, and acting as a first colporteur on the island, commenced a Sunday School...

Showered by failure and by sin. When selfish grief and selfish fears made all the way we stumbled in a mystery of darkness...

However much we hungered for a present earthly paradise, God help us. Therefore: "My heart, my heart, be careful to go strewing in and out the way with good deeds, least it come about, that when thou shalt depart, no low lamenting tongue be found to say, 'The world is poorer, since thou wentst away.'"

The next article will deal with the Theme of the Pageant "The Overcomers," which has been especially written for the Centennial of the Bedouque Baptist Church...

Burial of the six victims of a himself. Motive for the act, which ment credits the seeing of a man is said to be unparalleled in the annals of crime on the continent...

Scientific Facts NEWEST NOTES OF SCIENCE

No point in Cuba is more than 40 miles distant from the sea. Golf players can repair battered balls at home with a new mould.

The Mexican district of Fachuca is the world's greatest silver producer. With a new implement bulk ice cream can be served in slices of uniform size.

Sweden recently completed the electrification of 300 miles of trunk line railways. A new household utensil cuts an entire potato into pieces for French fries with one motion.

Argentina is increasing its production of petroleum both from government and privately owned wells. Italy has more than 1600 kilometers of electric transmission lines carrying current at a tension of 100,000 or more volts.

The largest leather producing countries, in order, are the United States, Germany, England and France. An English inventor has brought out a bicycle saddle with leaf springs mounted on the cantilever principle.

Resembling a steam clothing press, a new laundry machine will iron shirts at a speed of almost one a minute. The Hungarian Parliament named its new monetary unit the pengo to prevent its translation into other languages.

According to a recent estimate 65 per cent of the power now used for industrial purposes in the United States is electrical. Surveys have been made in Haiti for an irrigation project that will add about 60,000 acres to the cultivated area of the island.

Members of nine religious denominations in Maine have formed a radio parish and engaged a pastor, who broadcasts sermons to them. Having speeds up to 55 miles an hour, a two passenger automobile of English design is only about as high as a man's sitting erect.

According to a New York scientist causing, instead of killing the nutritive values of food, as generally believed, preserves them. Builders are constructing "first aid" airplanes, designed to transport persons injured in an accident to the nearest hospital.

An extension has been invented for inside handles of doors on open operated ready from the outside. A European inventor's phonograph attachment for motion picture projectors announces the titles of pictures without interrupting the film.

Discoveries of extensive deposits of lead in Bolivia give that country the promise of becoming one of the world's greatest producers of that metal. They reflectors fitted with red crystals have been invented to be mounted on top of automobile headlights to show drivers that the lights are shining.

Through the introduction of technical experts from Europe the leather production of Argentina has been increased in quantity and improved in quality. To permit the leaves of automobile springs to slide without friction, disks containing ball bearings have been invented to be inserted between them.

From an acreage of more than 3,000,000 acres India is practically certain to harvest a record breaking crop of more than 11,000,000 bales of cotton this year. Operating on the thermoelectric principle, a new attachment for gas water heaters turns off the gas should the flame of the pilot light be extinguished.

For military use of its colonial possessions the British government has ordered an all metal airplane capable of carrying 60 soldiers and their equipment. Controlled by hand, a machine invented by a New York state man to cut bushes out of the way of paths if effective enough to cut down corn stalks or sugar cane.

Plans are being made to make Bolivia's high, arid plateau, covering about one fourth of the country, produce valuable crops by irrigation from artesian wells. The damage done by mosquitoes causing illness each year in the United States has been estimated at \$100,000,000, with but little hope of relief in sight.

At an expenditure of more than \$5,600,000 the Colombian government will build six aerial cableways for transporting freight with a total length of 323.5 kilometers. A dental expert has advanced the theory that soft coal smoke in cities is an indirect cause of decay in children's teeth as it interferes with the sun's ultraviolet rays.

Several wireless stations are being built in the Belgian Congo, one for communication with Belgium and others to test the efficiency of short wave lengths in the tropics. The axle of a high speed automobile that has been designed to run over railroad tracks are stationary, the power being transmitted to all of its flanged wheels by gearing.

Carried in a case suspended from the shoulders like a camera, a pilot of German invention enables a person to shoot a bandit by complying with an order to raise his hands. A motor vehicle small enough to be driven between rows in vineyards has been developed to spray grape vines and other vegetation with dry insecticides, applied in powder form.

Storks endangered an electrical transmission line in Morocco until the French company maintaining it built perches along the line for the birds to rest upon instead of the wires. The mouthpiece of a new telephone is designed to deflect sounds directly by the position in which the instrument is held.

The chrome permalloy telegraph cable that is being laid from England to Newfoundland and the United States is expected to increase the speed of messages to 2500 letters a minute. For filling fountain pens a device has been invented that pumps a small amount of ink from a bottle into a cup when a plunger is depressed, returning unused ink to the bottle again.

An English inventor has equipped a motion picture camera with a gyroscope to enable it to be carried by an operator and used without imparting swaying motions to pictures it makes. The Nelson River, carrying the drainage of the prairie provinces from Lake Winnipeg to the Hudson Bay, is estimated to have a power development possibility under ordinary minimum flow of 2,443,320 horsepower.

The government of Argentina, where great improvements in radio services are planned for the near future, has limited the amount of advertising and phonograph music that may be broadcasted. Small circular telephone booths that do not reach to floors to afford ventilation and to enable them to be cleaned readily.

The world's first aerial restaurant has been installed in an express airplane flying between Paris and London, while a plane in use between Paris and Constantinople has sleeping berths. To add to the efficiency of open fireplaces a device has been invented that draws air from outside a house through curved pipes over the flames, where it is heated before entering a room.

Automobile seats patented by a German inventor are practically suspended on springs that minimize all shocks and jars to such an extent that a person would not be thrown from a car in event of accident. Grand Falls, on the Hamilton river, northern Quebec, has a sheer descent of 302 feet. Under the conditions pertaining to the country, it is estimated that the falls could be developed to produce 120,000 horsepower.

For railroad use a crane and pile driver have been combined, lessening the expense of maintaining two machines and having the advantage that the driver can be swung over a wide area. "All in Favour, Say 'Aye'."

"Resolved, that it is the duty of women to free themselves from irrational drudgery for the sake of their higher duties as wives and mothers, and as individuals." Urging Thrift—"If you had put a dollar in the bank a century ago, it would amount to two dollars now and you could buy almost as much with it now as you could have then with the original dollar."

Cholera Infantum Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months, and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in ward-off this trouble. They regulate the bowels and sweeten the stomach and thus prevent the dreaded summer complaints. They are an absolute safe medicine, being guaranteed to contain neither opiates nor narcotics or harmful drugs. They cannot possibly do harm—they always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.
