By HEDDA HOYT
Fashion Editor of The United Press
(Written for The United Press)

Tide of Prosperity Rising in Europe
(United Press)
LONDON, Aug. 14.—Enlarging foreign demand for American products, with increasing prosperity for the United States, are beginning to appear as a permanent factor in Europe's recovery. The numerous loans which have been floated in Europe since the war and continue to be floated, largely in the American market, are showing productive returns which promise to exert continuously powerful influence in setting the world to rights.

Seek Lands Where Their Countrymen May Start Anew

MONCTON, Aug. 14.—That they might gain accurate knowledge of the possibilities of the Maritime Provinces for settlers from the Hebridean Islands where conditions are forcing the people to either leave their homes or suffer death from starvation, a death that is only being held off at the present time through the generosity of the other people in the British Isles, Father MacDonell and five others passed through the city yesterday en route to Halifax.

While in the Maritimes the provincial governments, the Department of Immigration and the Land Settlement Board are co-operating to show them the country. On the completion of their tour through these lands, by the sea which are said to resemble the Scottish Islands in many ways, Father MacDonell and those accompanying him will go on to Quebec, Ontario and the west where a large number are already settled and prospering.

Two men were boasting about their brothers. The first one said: "My brother once went to a billiard match, picked up a ball in his right hand and another in his left, squeezed them, and the result was powder."

"That's nothing," said the other. "My brother once went to a farm, and he took a bull in the left hand and one in the right; he squeezed them; result—bottle of meat extract."
