SUCCESSFUL GYRO DANCE

One of the largest and most successful dances ever held by the Gyro Club took place at Beach Grove Inn last evening, upwards of three hundred being present. Dixon's Orchestra rendered pleasing dance music throughout. The Gyros also held their regular monthly meeting last night, previous to the dance, with Mr. Arthur Gaudet in the chair. Two guests were present, Messrs. C. Cameron, New Glasgow, and Jackson, Toronto. Messrs. D. Bethune and Philip Noonan left yesterday afternoon to attend the convention of Gyro District No. 6, which is being held in Fredericton.

PERSONALS

Mr. B. G. MacIntyre, Comptroller General of Finance with Mrs. MacIntyre and four small sons arrived in Charlottetown, Friday evening, Aug. 8th by motor from Ottawa on a visit to his father, Mr. W. J. MacIntyre, Weymouth Street.

Mr. and Mrs. Charles Hansen have returned to the city after spending a pleasant week's vacation with relatives and friends in Freetown and Summerside.

Named Secretary Of The United Mar. Fishermen

TRURO, Aug. 11-Dr Richard Hamer, of Mount Allison University has been appointed General Secretary of the United Maritime Fishermen, the board of directors of which was in session last night and today. This completes the organization and efforts in the future will be directed to the promotion of the fishermen's interests throughout the three Maritime Provinces.

Many subjects of interest to the fishermen were discussed during the sessions held by the directors, and several resolutions were adopted. Reviewing the beam or otter trawl question, the directors maintain the stand taken by the fishermen for years respecting the right of the shore and boat fishermen to an equal chance with the more recent method of securing catches is the correct one.

It was suggested that the efforts of those opposed to the boats had succeeded in getting through legislation during the last parliament that is calculated, in a measure, to protect trawlers. There is a movement and a strong effort on foot to have this legislation amended or annulled, and the board of directors in session today unanimously passed a resolution in this connection. The trawler resolution in effect is that the regulation concerning this method of trawling is in the best interests of the fishermen and the fishing industry generally and that therefore these regulations should be sustained and fully enforced.

The recent automotive exhibition at the Esplanade is reported to have been a success.

MUCH INTEREST IN FIELD DAYS IS BEING TAKEN

The Field Days in connection with the illustration stations throughout the Province are meeting with great success this year, states Superintendent J. A. Clark of the Experimental Station. "We have never seen so much intelligent interest taken in these activities," he reports. "Many questions are being asked that are really vital in connection with farm work, and the attendance at the various gatherings has been large and representative."

Yesterday the field day was held at Long River, at Mr. William Johnston's farm. Mr. R. C. Parent, supervisor, went carefully over the illustration station explaining the rotation used, the different crops grown and the experiments with fertilizer on corn, turnips, mangies and potatoes. Mr. D. S. Tinney gave a talk on the growing of grain, giving considerable information in connection with preparing exhibits for the world's grain exhibition and conference which takes place at Regina in 1932.

Superintendent Clark spoke in connection with experiments in the use of fertilizer and rotation of crops, dealing particularly with the use of fertilizer for increasing the hay crop. Mr. R. N. Hurst, plant pathologist, spoke on plant diseases, referring especially to late blight of potatoes and the smuts of grain. Mr. Lorne Howatt, assistant plant pathologist, gave demonstrations in the mixing of Bordeaux, this proving to be practical and perhaps the most interesting feature of the afternoon.

The attendance was large and was largely representative of the community. Today's field day is being held at West Devon.

Field Day At Montague

On Thursday afternoon a successful Field Day was held on the Illustration Station operated by Mr. Fred MacIntyre, near Montague. About 125 people, men and women were in attendance.

Mr. R. C. Parent, Superintendent of the Stations gave a talk on the purposes of the stations, cultural practices and fertilizers. Then the party were shown the results of experiments with manures and fertilizers on a number of the growing crops.

Mr. H. H. Churchill, Dairy Promoter for Nova Scotia, outlined the work of the can testing association. Mr. L. W. Roper, Live Stock Promoter for Prince Edward Island, gave a talk on the importance of pure bred live stock and of the value of calf clubs in interesting and instructing young people, and in improving the quality of the live stock in a district.

Dr. J. A. Clark in the course of his address spoke of the splendid manner in which the station had been conducted, noting especially the freedom from weeds in the fields and headlands. He also explained the experiments which are being conducted at the Experimental Station along the line of improving the pastures.

Mr. S. C. Peppin, Chief Potato Inspector, gave a talk on inspection, using one of the potato fields as an object lesson. Whilst the men in the party were being shown around the farm, Mr. D. C. Schurman, Assistant Superintendent of the Charlottetown Experimental Station, gave a talk to the women on trees and shrubs.

Expert Floriculturist

In connection with the Field Day Mr. D. C. Schurman, Assistant Superintendent, Experimental Station, Charlottetown, is giving a number of lectures and demonstrations on the growing of flowers, shrubs and trees for improving the appearance of farm homes. At the Field Day at Montague, Mr. Schurman clearly demonstrated to an interested audience the best varieties to grow and the proper method of planting the same in order to get the best effect. It was also pointed out that thousands of dollars are spent annually in buying shrubbery and flowers wholly unsuitable varieties of flowers and shrubs will be planted at each station for demonstration purposes, and Mr. Schurman has been selected to advise the supervisor in the selection and proper planting of the material. Mr. Schurman will be at the Field Day at West Devon, Tuesday, August 12th and all interested in this subject will be sure to obtain some helpful information.

POLICE REPORT

Continued from Page 1

for his good work on the Sanitary Food Committee.

The matter of extending the paving on Victory Street a distance of 4 feet to Euston Street was next discussed. The City Engineer, questioned as to when the work on lower Prince Street would be finished, stated that the street would be open by Exhibition Week either with or without the asphalt, depending on the condition of the cement.

Councillor Reardon inquired if the Police kept reports and investigated fully all accidents occurring in the City; the Chief of Police answered that any accident of which they get word is immediately investigated.

It was moved that plain clothes men be employed to help the police during the summer months to check up on speedsters.

Councillor Burke said that if the citizens would cooperate with the Police in this matter there soon would be no speeding on the streets of Charlottetown.

Councillor Holman stated that during the exhibition week the Police would work overtime in order to prevent accidents. He was pleased to report that during last Exhibition no accidents occurred.

The Council will cooperate with the Exhibition Committee and give the "Fakers" the same privileges as last year, and will see that they all get fair usage on the Exhibition grounds.

Councillor Burke reported that a light had been erected at the entrance to the park.

It was decided to call a special meeting to discuss repairs to the Breastwork.

The council decided that horses feeding on the grass at Brighton should be tethered and have a guard to see they do no damage.

A fence is to be erected to protect the lawn around the Public Library. A resolution was passed to prevent auto traffic on the roads closed to autos in the park, as the road bordering the breastwork is not considered safe for heavy traffic.

Dr. I. E. Croken reported that one milk test showed a butter fat test of only 2.8 and another milk test showed the presence of sediment. The council approved of these two cases being investigated further.

The police report shows a total of 75 arrests for the month of July, including arrests for breaking and entering 2; drunk and disorderly 15; drunk and incapable 34; vagrancy 15; attempt to commit suicide 1.

In addition to the above mentioned arrests there were fifteen prosecutions under the Highway Traffic Act for "Speeding" resulting in fourteen convictions and one dismissal, one conviction for neglecting to stop after accident, one for operating without license and two for operating motor vehicle while intoxicated. There were also two prosecutions for cruelty to animals, two for disorderly conduct (fighting), one for Common Assault, four under the Sanitary By-Law, and six for non-payment of dog taxes.

BENNETT

Continued from Page 1

United States. The news of the arrival of the R-100 also was broadcast. The sound of its motors was transmitted and the clamor of automobile horns, railroad locomotive whistles and shouts, which greeted the airship in the Capital, also were made audible to radio listeners.

Commander Speaks to Premier

Commander Colmore's voice then was heard from the airship and he was asked to stand by to receive a few words of greeting from Premier Bennett. "Hello, Commander Colmore," Mr. Bennett was heard to say. "I cannot hear you quite as clearly as I did the other day when we sat together at lunch, but I hear you very clearly." "Thank you, Mr. Bennett," replied Commander Colmore. "We have had a wonderful view of the city of Ottawa. We are all pleased to be here." "I am glad to see you overhead," continued Mr. Bennett. "I hope you have had a pleasant journey so far and that you will enjoy a pleasant trip to Toronto during the night." Then Mayor Plant delivered a short message of welcome and congratulation to the officers and crew of the R-100 from the City of Ottawa and communication between the radio station and the airship ceased after several other messages were sent and replies received.

CHURCH OF SCOTLAND PRESBYTERY OF PRINCE EDWARD ISLAND

Sir,-In a recent issue of your paper, a report of the meeting of the Presbytery of Prince Edward Island of the Presbyterian Church in Canada appears, in which it is stated that "as there was no Presbytery of the Church of Scotland in Prince Edward Island," certain action was taken to "transmit a certain overture dealing with the carrying on of the work in connection with the Central Parish to the Colonial Committee of the Church of Scotland in Scotland," and further that "the said overture will be transmitted through the proper channels."

Now, for the information of all and sundry, let me state that there is still a Church of Scotland Presbytery of Prince Edward Island, lawfully constituted provincially incorporated, consisting at present of six or seven members and with two students for the ministry under its care.

May I add, that while attending the General Assembly in Edinburgh last Autumn, and representing our Colonial branch of the Church before the Colonial Committee, I presented a full statistical report of the Central Parish of P. E. I., as furnished me by their own efficient secretary, Mrs. J. MacFadyen and that I also gave an account of my stewardship in this regard at a meeting of the representatives of the said Central Parish, held a short time ago, in the People's Church, Charlottetown, on which occasion I also made an appeal to them to renew their former allegiance to our Presbytery, leaving the matter of future ecclesiastical unions to the guidance and direction of the King and Head of Zion.

Let me say that the relations between the good people of the Central Parish and myself, have always been of the happiest kind, and in a large and steadily increasing number of Central Parish people are most devoted and faithful members of my own congregation and that these all recognize and respect the authority of our Church of Scotland Presbytery of Prince Edward Island, as the ecclesiastical court to which they are subject in the Lord.

I am Sir, etc.

J. W. S. LOWEY
MODERATOR OF THE CHURCH OF SCOTLAND, PRESBYTERY OF P. E. I.
MacDonald College, Quebec, August 8, 1930.

Monthly Meeting Of Summerside Town Council
(Special to the Guardian)
SUMMERSIDE, Aug. 11-The regular monthly meeting of the Summerside Town Council was held last night with Mayor Lidstone in the chair and a full Council Board. After routine business, paid bills amounting to \$4,238.65, unpaid \$1,334.22 were passed. Electric light paid bills \$731.90, unpaid \$757.99. A communication from Mr. M. L. F. MacDonald, Kenzie laid over from last meeting was referred to the Board of Health. A vacation of two weeks was granted to Mr. Anthony Arsenault with full pay. Mr. H. J. Massey, Town Clerk, was granted two months leave of absence. Mr. Durant to be authorized to conduct all necessary business during his absence. Two tenders were received for a furnace for the Town building. After some discussion the matter was laid over. A motion was passed to call for tenders for sixty tons of Sidney screened coal.

A resolution was read by the Finance Committee to purchase bonds amounting to \$10,312.43 for sinking funds, carried. Councillor Moore read the police report of Chief of Police Kane. Fifteen drunks were reported for the month. Chief Kane expressed his thanks for the gift of \$50 for expenses to the Police convention at Hamilton and reported that the members were pleased to see the Island represented, and much useful information had been obtained regarding police matters.

It was moved that the matter of milk licenses and inspection of cattle be laid before the Recorder and Veterinary Surgeon. Supplies for electric light plant were ordered to be purchased. The purchasing of a shed for the town machinery was laid over until next meeting. Council adjourned until Friday next. A meeting of the Board of Health will also be held on that night 8.

POUDRE le Début

The new face powder-vitaly different-because it contains newly-discovered ingredients never before used in a face powder, and because it is:

- Safe-free from anything harmful.
Protective-against wind and burn-helps prevent freckling.
Smart-up-to-the-minute fashion shades.
Smooth-of the finest possible texture that merges with the skin and adheres indefinitely.
Beauty-Giving-because the color and texture blend with the natural tone and texture of the skin; no "covering up" effect.
Fragrance-in the famous odeur of Parfume le Début-sophisticated and delicately subdued.

A HUDNUT CREATION - \$1.50

ROSS-DRUG-UNITED
Successor to THE MacKINNON DRUG CO.
"Home of Better Toilet Articles."

NEWSEY NOTES OF THE EXHIBITION

The staff which is engaged in taking entries for the Provincial Exhibition, are having their hands full. Entries are coming in by wire and mail in great quantities. Yes, remarked Mr. Boulter, they are even coming from "Paradise." "From Paradise!" the Guardian reporter exclaimed: "Yes, Paradise, Nova Scotia, answered Jim."

"It's an ill wind that blows nobody good." The extra large list of horses for the races next week necessitates the building of more stalls to accommodate them. Yesterday the lumber was placed and men will be engaged building the structures which must be finished by Friday night.

Some confusion has arisen regarding the 33 tickets which are issued by the Exhibition Association as to whether they admit every day to the horse races. They do-and also to every afternoon and evening performance and are also transferable.

A large firm of employers yesterday purchased from the Provincial Exhibition season tickets for each employee. It is understood that several

more firms are contemplating doing the same thing as a token of appreciation of good services.

Mr. E. F. Acorn, Commander-in-Chief of the exhibition score cards for this season's racing has inaugurated a novel idea in connection with his publication.

A series of numbers will appear on each and every race day-some of these numbers are lucky ones, and the holder, as a consequence will receive a prize.

Leave it to "Ed" for originality and enterprise. His idea is a good one-and advertisers, Exhibition directors and purchasers of score cards will no doubt commend Prince Edward Island's premier announcer an all-round good sport on his ingenuity.

"Gee Whizz!" remarked a tourist yesterday while on a visit to the Exhibition grounds. How clean and sanitary every-thing looks here-about-and the track-why it looks like a veritable speedway." Not so bad, coming from an "outsider" who has visited every Exhibition of any consequence in Canada and the United States.

Returns From Plane Plunges Into Gas Tank, Killing Three

CHICAGO, Aug. 11-Aviation experts agreed today that sturdiest planes and the most skillful piloting could not have prevented the year's oddest air tragedy, in which a monoplane plunged into a gas tank, killing the pilot and two girl passengers.

A freak thunderstorm, which included flashes of lightning and what appeared to be a miniature torrent struck the plane down Saturday afternoon as it was flying over the northwest corner of Chicago. The victims were pilot Orville Suchy, 20; Mary Laws 25, and her 22 year old sister Eugenia.

Not until the small hours of Sunday morning were the wreckage of the plane and the bodies brought out of the 150 foot storage tank into which the crippled plane dove from an estimated altitude of 3,000 feet. Witnesses said the Ryan monoplane similar to the one Lindbergh flew over the Atlantic, flew into the squall spun crazily for a few seconds, then folded up and shot earthward.

Like a falling meteor the spinning fuselage cut through the metal roof of the storage tank, passed through 50 feet of compressed illuminating gas and then sank in 40 feet of water below the earth's surface in the bottom of the tank.

For all skin Abrasions - Minard's Liniment.

Card of Thanks

Miss Nellie Foley desires to express her sincere thanks to all those who helped her in any way during her recent sad bereavement, especially Dr. McIntosh for his many thoughtful acts.
