

# WALKED INTO TOWN TO GET MORE TANLAC

### Olsen Says He Could Not Walk at All Without His Crutches Up To A Few Weeks Ago.

"I have walked all the way to town to get another bottle of Tanlac, and I'm just feeling fine, and yet when I started on the medicine a few weeks ago, I couldn't get around without the help of crutches," declared John Olsen, sailor, aboard S. S. Thomas E. Drummond, sailing from St. John's, New Brunswick.

"It's about two years since the rheumatism first began to trouble me in the knees, but about last September I got so bad that I couldn't put my foot to the ground, and the pain was something awful. At nights I used to lie in my bunk in perfect agony, unable to sleep, and this so told on my nerves that I used to tremble like a leaf. I lost all desire for food and got very thin and weak, and finally had to give up my job and go to Halifax for special treatment. But in spite of everything I tried I seemed to get worse instead of better. "I saw several statements in the papers about people getting wond-

erful relief from troubles like mine by taking Tanlac and so when everything else failed I gave it a trial, thinking to myself that at least it would do me no harm. The first few bottles gave me a good appetite and my food seemed to be doing me good, for I gained several pounds in weight. So I kept right on with it and gradually, it seemed to drive the rheumatism out of my system. The pains in my knees began to ease off, and soon I was able to lay my crutches aside and get around with the aid of a stick. Then after a bit I was able to do away with the stick also, and I can now get about without any help whatever and feel almost like a boy again. All signs of nervousness have left me and I can sleep the clock round. Many of my friends say they hardly know me for the same man that I was a few months ago, because I look so much better in every way. I certainly am feeling in fine shape once again, and am only too glad to tell others about the wonderful medicine which had done me so much good.

Tanlac is sold in Charlottetown by Reddin Bros., in Montague by H. J. Mahon, and by the leading druggists in every town.

## Peel Sentenced to Four Years in Dorchester

AMHERST, June 20.—After one of the longest and most keenly contested criminal trials in the history of Cumberland courts, the Peel manslaughter and arson case came to an end late yesterday afternoon, when the jury brought in a verdict of guilty of arson and the judge sentenced the accused, Alva Peel, to four years imprisonment in Dorchester Penitentiary. It was a day of keen legal battles with the defence bringing forth more than a dozen witnesses to lend a different meaning to the circumstances surrounding the fire, as testified to by the score of witnesses for the crown, but the jurors took only an hour to reach a decision.

The accused took the sentence without any special outward appearance of concern. The interest in this case has been intense throughout the whole country and will make a record so far as length, expenses and number of witnesses are concerned.

### THE POSSIBILITIES OF DAIRYING.

C. E. MacKenzie.

There are approximately 3600 patrons of factories, creameries and such in the province of Prince Edward Island but how many can show records equal to the leading patrons at one or two of our leading butter factories for the last year, perhaps many can but the vast majority cannot. If we look into how these yields were made we may be able to show that the majority of our dairy farmers can, with a little thought, and proper herd conditions, make as good a showing if not better than these leaders have done.

When we read of tests made at public institutions or on college farms or by the rich breeder, we say "oh yes the people are paying for them or they have no other way of spending their money. While I need not mention names I have one case in mind that I will use as an illustration of how we make dairying pay.

In this case this patron of one of the first co-operative cheese factories on P. E. Island, decided that his herd of ordinary cows could be made more profitable.

## Five Dollars For A Letter

A Cheque for Five Dollars will be sent to the author of what, in the opinion of the Editor, is the most interesting letter for publication. All envelopes should be addressed "Letter Box," care of the Editor, "The Charlottetown Examiner, P.O. Box 39, Charlottetown. Communications must be original and exclusive. Preference will be given to brief letters bearing name and address for publication and dealing with questions of public policy, especially regarding agriculture and its problems.

## Dainty China for the June Bride at Black & Co. Sunnyside.

This decision to improve the herd is the initial move that many stockmen should make. It will change their career and their lives. The next step of this patron and used it on his herd. These initial steps were taken before we had government aid in individual cow testing and to overcome this difficulty this farmer, who by the way was milk drawer to the cheese factory, weighed each cow's milk and at regular intervals during the season he took samples of each cow's milk to the cheese factory and had them tested. In this manner he started his foundation stock on the best he could get, that is he only kept the heifers from his best cows and of these when they came into milk he kept an accurate record of production during the first twelve months and upon this hung the fate of the heifer.

By following this system of weighing and testing and always using a sire of the right kind for the past twelve years, this farmer for eleven months of 1919 derived at the creamery over \$2,200.00 worth of cream from nine mature cows and five heifers that came in at different times during the year, besides the calves received some whole milk and two households were kept in milk, cream and butter.

The record sheets for the year show the production of an average of almost 10,000 pounds of milk per cow.

Besides this farmer had say \$4,000 pounds of skim milk for feeding on the farm, which at say 60 cents per hundred pounds would be an extra income of about \$600 which when fed to young stock and hogs would result in an additional profit.

My contention is that in ten years a dairyman can improve his herd to a profitable working standard. By buying, of course, the herd can be built up more quickly but there is nothing to prevent breeders through weighing and testing and the use of a good sire improving the herd more economically. The fact of the matter is that many patrons of cheese factories do not average 3500 pounds of milk per cow during the factory season.

In such a herd there is room for a vast amount of improvement and the first generation of proper breeding should show a great improvement. More of this testing and culling enthusiasm is required by most dairymen. They have the ability, they have the resources and they have the chances as the Federal Department of Agriculture through R. C. J. Cooke, Kensington who is supervisor of that branch for the Province will make arrangements for any group of farmers that wish to take part in a decision to make each season's record better than the previous one would soon result in more profitable operations and a greater degree of prosperity.

### ATTENDING TRIAL OF ISLAND GUNMAN

HALIFAX, June 20.—A year ago when the government fishery patrol boat J. L. Nelson was getting in some fine work with lobster traps set out of season along the western shores of Prince Edward Island, somebody was foolish enough to try and intimidate Captain Wrayton by discharging a load of buckshot in the direction of his vessel. Instead of running away he took some of his crew ashore and started after the man who did the shooting. He did not get his man, but he got pretty good evidence of who he was and had him arrested trying to get out of the country. When the trial came up, the accused was not there, having jumped his bail. Now the trial is on again and last week Captain Wrayton, with four of his crew, left for the island to give evidence.

The J. L. Nelson is at present in the dockyard. She went there to undergo repairs, but the strike is holding her up and nobody can predict when she will be ready to resume her work of protecting the inshore fisheries.

## Eczema

You are not expecting when you see Eczema and Skin Irritations. It relieves at once and gradually heals the skin. Sample box of Chase's Ointment free if you mention this paper and send a stamp for postage. One box all dealers or Edmanston, Bates & Co., Limited, Toronto.

## THE WESTERN GUARDIAN

—IT PAYS to buy in this Province. —SHOP FROM HOLMAN'S catalogue. 9045-5-22 ft.

—LOST BETWEEN LOT 11 and Grand River a small suit case containing some valuable papers applied to Box 658 Summerside.

—Miss Alice Strothard returned to her home in Pictou, N. S., for a few months holidays when she will leave in August for Japan to resume her missionary duties.

—APPOINTED COMMISSIONERS.—Just before the closing of the Supreme Court in Summerside on Tuesday Mr. Frank Long of Truro and Mr. T. Hume Hopgood of Malpas were appointed commissioners for the taking of affidavits in Supreme Court.

—WELL KNOWN LADY DEAD.—The death occurred at her home in South West, Lot 16, on Monday evening of Mrs. John Yeo at the age of 68 years. The deceased was just recovering from a paralytic stroke when suddenly she was stricken with a similar one, which took away her life. She leaves to mourn three sons and one daughter. The funeral took place Wednesday afternoon to the Methodist Cemetery Lot 16.

—SUNDAY ADDRESS.—Miss Elma Inman delegate of the Des Moines Students' Convention will address a meeting in the Bedouque Methodist Church on Sunday evening June 27th at 7.30 o'clock.

—SUPREME COURT.—The Supreme Court closed at Summerside Tuesday forenoon. The last case was that of the King vs McNeill which came up before Mr. Justice Fitzgerald and the prisoner McNeill was charged with firing shots at the Cutter J. L. Nelson in the service of the Dominion Government when patrolling the coast at Alberton and watching out for illegal lobster fishing. She was in the act of taking up lobster traps in Alberton Harbor, at the time the shots were fired. One of the latter shot the bell on the cutter and another grazed the arm of the first mate. The Attorney General after producing some evidence, and owing to the fact that some of the witnesses had left the province, directed under Criminal Code, that no entry be made by the Clerk of the Crown that proceedings be stayed. The prisoner was then ordered by the Court to enter into a recognizance that he would appear before the Court when called. Mr. E. H. Strong appeared on behalf of McNeill.

—Major Blankitt, returned to his home in Toronto on Tuesday morning.

—Mr. C. E. Strong and daughter Helen are spending a few weeks holidays with friends in Chester, N. S.

—Miss Lillian Sprague of Sackville, N. B., is visiting in Summerside the guest of Mrs. H. R. Crockett.

—Mr. Benjamin Brooks was a passenger west en route to his home in Haliburton from the States.

—Mr. Benjamin Brooks, was a passenger west en route to his home in Haliburton, from the States.

—Mr. Lawrence Rully passed through Summerside en route to his home in Cape Wolf after spending some time in Boston, Mass.

—Miss McDonald, West Point returned to her home on Monday after recently undergoing a successful operation for appendicitis in the Prince County Hospital here.

—The Misses Crues of Boston, Mass., arrived in Summerside Monday evening to spend a few weeks with their mother Mrs. D. D. Crue.

—Miss McDonnell, who has been spending a few days in Summerside the guest of Mrs. Arthur Brennan returned to her home in New York.

—Mr. John Deering and his young bride, formerly Miss Josephine Bailney, spent a few days in Summerside on their honeymoon trip. Mr. Deering is in the employ of the C. N. R., St. John, N. B.

### TO CREATE COMMUNITY SPIRIT

One of the last official acts of Franklin K. Lane, before resigning office as United States Secretary of the Interior was to call a conference to discuss community organization. Mr. Lane's idea was that the people of the different communities throughout the country should make an attempt to get acquainted with each other's personalities and needs through community discussions, celebrations, songs, dances—"an experiment in good will."

In support of his action Mr. Lane called attention to the fact that "except in the more sparsely populated sections of the country the old type of intimate village life has almost disappeared, our holidays are celebrated more or less individually and we do not have common festivals comparable with the old-time husking bees or Halloween parties. Even our sports are commercialized, and our city baseball teams represent not the ability of our community to play ball, but the acumen of a professional manager."

One of the purposes in mind was to make the immigrant from a stranger and a real part of the community in which he has made his home, and in this connection, Mr. Lane very wisely said: "The immigrant needed not so much to be told what to do in a patronizing fashion as to be encouraged to contribute to the common fund his particular viewpoint. To be made welcome in community activities we must make the foreigner not a subordinate, a separate class, but a partner."

### DICKY DIPPY'S DIARY

THURSDAY:— WAS TAKING MY SUITCASE TO THE TRUNK-MAKERS TO HAVE IT REPAIRED, WHEN I SAW ADA CUTTER. AS SHE DREW NEAR, I PRETENDED THE SUITCASE WAS VERY HEAVY.

"ARE YOU GOING AWAY, MR DIPPY?" SHE ASKED  
"YES," SAID I, "I'M GOING ON A TRIP I'M VERY FOND OF

TRAVEL. I THINK TRAVEL BROADENS THE MIND."  
"YES, IT DOES," SAID SHE, AND THEN SHE ADDED:

"WHY DON'T YOU TAKE A TRIP AROUND THE WORLD?"

# Three Big Outstanding Features

- (1) The largest stock in any one store on P. E. Island.
- (2) Only one value (The Best.)
- (3) No Luxury Tax to pay. All our clothing free of the tax.

Clothes for men and young men, spring and summer suits and topcoats in all sizes, styles and fabrics. You judge a store by the service it gives and satisfaction you get from its merchandise. Judge us that way. If your purchase is not satisfactory let us know and we will make it all right.

Men's suits \$22.00 up to \$45.00.

See our big range of men's waterproofs. Popular prices.

## WE ARE PROUD OF OUR BIG BOY'S CLOTHING DEPARTMENT

There is no doubt about the quality of our smart looking clothes. They will endure hard wear, coat has slash pockets.

All our boys suits are well made and are bound to give satisfaction.

Buy your boy's clothing here and be satisfied.

Large boy's suits \$7.50 up. Smaller boys suits \$6.50 up.

## War on Insects

"Our work," said Dr. Marshall, the Director of the Imperial Bureau of Entomology, to a National News representative, "is to help the men in the field preserve their crops, to assist civilization in the great food problem, and to alleviate human suffering and disease."

"There are countless thousands of insects destroying the food of the world and the health of humanity. They attack the crops in all parts of the world; they spread disease and death among countless millions, and it is our work with the association of entomological representatives in every country, to endeavour to prevent their spreading and becoming omnipotent."

"From a small number of distinguished entomologists the organization has grown into the present Imperial Bureau of Entomology of which Lord Harcourt is our chairman, and he has spared neither time nor trouble in assisting this great work forward.

"When the Bureau was first formed it was realized that we must have members in every country and that a periodical meeting should be held in London in order to discuss questions germane to economic entomology. At last

week's gathering we had a record attendance from all parts of the Empire.

Prevention of Disease.

"What the Bureau does is to identify insects sent to us by representatives, or, indeed, by any farmer, doctor or veterinary surgeon puzzled by a tick or pest which is worrying his animals or plants. The insect is placed in the hands of a special research staff and its identification accomplished by means of our special reference works, or in some cases by experts who lend their valuable assistance to particularly baffling cases.

"A record is kept of every insect that passes through our hands, and in our two publications, "The Review of Applied Entomology," and "Bulletin of Entomological Research," the former deals with plant injuries caused by insects, and insects harmful to domestic animals and mankind. It also contains abstracts from current literature, and by its means all medical officers, veterinary surgeons in the remotest part of the globe are able to keep themselves informed of the latest developments in their special subjects. The latter publication almost entirely consists of papers contributed by zoologists and other investigators interested in the Bur-

eau. Weevil's £40,000,000 Damage.

"Cotton is more liable to be attacked by pests than any other crop and its two deadly enemies are the boll weevil and the pink boll worm. In the United States the former has created terrible ravages throughout the cotton belt, with enormous losses to the growers. It has been estimated that the loss of seed in one crop averaged £5,000,000, which means that one insect is responsible for a loss of £340,000,000 in one year.

"The identification of these insects is a colossal task, for since 1913 more than a thousand collections have been received by the Bureau, and they comprise in all about 300,000 insects. A third of these were blood-sucking pests, and besides the usual investigation work over 20,000 specific identifications had to be made.

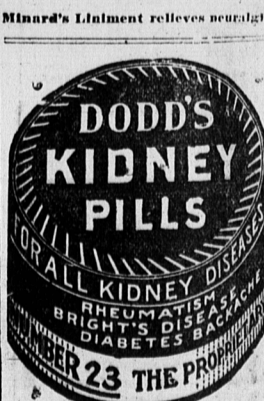

"We have organized and equipped special expeditions to deal with the habits and distribution of the tsetse fly, which conveys sleeping sickness; the mosquito in the regions of the Panama Canal, which is found to convey the germs of yellow fever, a terrible disease which is a menace to Eastern Asia. "The Bureau has done considerable work in assisting the farmer

in England, for now, by the method known as rotation of crops where by cereal crops are replaced by root crops the following year, the elimination of cereal pests is avoided. The root crops absorb and destroy the cereal pest, which cannot accustom itself to the new conditions."

In conclusion, Dr. Marshall said: "Unless the countries of this world determine to combat the insects and pests which ravage their crops and infect humanity, they will find themselves in a dire condition. Everyone must recognize that unless we are thoroughly protected from the entry of foreign pests into this country, our crops will be ruined. And this can only be prevented by the co-operation of the Government."
