EARRINGS DATING BACK TO 3500 YEARS AGO ARE PUT IN MUSEUM

(United Press) CHICAGO, Sept. 14—Gold earrings which archaeologists believe were worn by the ladies in waiting at Nebuchadnezzar's court 2500 years ago are on display at Field Museum of Natural History. Three pairs were found in the ruins of the ancient city of Kish in a Babylonian grave dated as belonging to the period of Nebuchadnezzar who ruled over both Babylon and Kish. The ornaments illustrate both the skill of the ancient jewell smiths and the trend of style which the royal ladies followed. A third example of Babylonian craftsmanship is intricate. It is a large gold earring an inch and three quarters long. From a gold wire loop attached to the ear lobe depends a lunate ornament decorated with three rows of tiny light pearls. Below this is a fluted ball fastened to a plain collar decorated around the base with the small pearl motif. Beneath this is a fluted ornament from which hang two rows of six smaller and round ornaments. At the base of each ball is a triangular ornament of six round beads in the shape of an inverted pyramid. The central lower portion of the earring consists of two larger beads placed one above the other and terminated by an inverted pyramid consisting of 10 small beads.

The trouble lasted nearly four years. I read different advertisements for Cuticura Soap and Ointment so purchased some. I got relief at once, and after using two cakes of Cuticura Soap and one box of Cuticura Ointment I was completely healed." (Signed) Miss Elsie Bertrand, 303 Mainland St., Peterboro, Ont.
