

NEW LAMP BURNS 94 PER CENT. AIR Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas, has been tested by the U. S. Government and is found to be superior to any other lamp. It burns without odor, smoke or noise, no pumping up, is simple, clean, safe. Burns 95 per cent. air and 5 per cent. common kerosene (read only).

SUNDAY SCHOOL ENTERTAINMENT.—A splendid program including a Christmas Cantata by the children, has been prepared for the Christmas Sunday School entertainment in St. James Hall Friday evening.

WEDDING BELLS.—Married at the Mansie, Clifton, on Dec. 27th, by the Rev. Mr. Miller, Bellinda A. Glover, second daughter of George G. and Mrs. Glover of Norboro, to James H. Andrews of Hunter River. They were unattended. After the marriage ceremony was performed the young couple drove to the home of the bride, where a reception was held, the immediate friends of the contracting party being present. After supper was served they were entertained by a large group of serenaders. After a social evening was spent, the happy couple drove to their future home at Hunter River. The groom is a son of Mr. and Mrs. Robert Andrews of Norboro and is one of our returned men having served over three years in the late war, who with his young bride is deservedly popular among their friends. They were accompanied by many beautiful and useful gifts and best wishes for a long and happy wedded life. Congratulations.

THE SEMI-ANNUAL examination of the school took place in the school room on Thursday morning, December 22nd. Owing to the inclemency of the weather the attendance of ratepayers and school officers was not so large as at former examinations. Those present expressed much interest in the progress of the school and the programme rendered by the pupils. Miss Katherine McLaren, on behalf of the pupils presented the teacher, Mr. Sidney McBeola with a camera accompanied by the best wishes of the pupils under his charge. Although taken entirely by surprise he fittingly replied thanking the pupils for their kindness and expressing the good fellowship which had characterized the work of the school for the past year and a half would continue throughout the next term. The meeting closed by the singing of the National anthem.

IN MEMORIAM

ANDREW MCKAY

There passed peacefully away at Clifton on Tuesday, December 13, after an illness of ten days, Andrew McKay in the 68th year of his age. Besides a surviving widow there are left to mourn a large number of relatives.

The funeral service was conducted by the Rev. George Millar, assisted by the Rev. J. M. Murchison and the large number in attendance testified to the high esteem in which he was held.

The pall bearers were: John McKay, William McKay, Andrew McKay, Wilbur McKay, Bert McEwen and Joseph Sheehan. Interment was made in Clifton Cemetery.

Are You Sure Your Children's Eyes Are Right?

A responsibility rests upon every parent to give his child every possible advantage in life; to give the child the best weapons with which to meet the struggle of the years ahead. Surely good eyesight is the "prize" gift that your child should have. Remember that poor eyesight means poor concentration and will retard the youngster's progress. Many a child considered dull or lazy in school or music studies has simply been suffering from defective vision. And after corrected glasses have changed entirely the record of performance. Perhaps your youngster's report-card is reflecting the presence of eye-strain. Perhaps you are not doing your own child full justice. Have an examination made and know. Consult

ADDRESS AND PRESENTATION

On Christmas Eve Miss Katherine Cameron, who for many years conducted a Bible Class for children in her own home at Springton, was waited upon at the home of Mr. and Mrs. D. M. McDonald and presented with the following address, accompanied by the presentation of a suitable gift. Her brother, Mr. Alexander Cameron, was also generously included in the Christmas observance and addressed the kind words and valuable gifts were greatly appreciated and acknowledged. Mr. Daniel Lamont presided and owing to the unavoidable absence of the Pastor, Rev. H. Stavert, called upon Mr. D. M. McDonald to read the address. The pupils made the presentations. Following is the address: Miss Katherine Cameron, Dear Friend:

In the grand old book of Books, with the study of which you are so familiar, you will remember that it is written "to everything there is a season and a time to every purpose under the heaven."

This we believe to be perfectly true and among the most of occasions specified are the following: "a time to love and a time to hate, a time of war and a time of peace."

Now, the time in the season in which we hear most about peace is the Christmas season. It is the one time above all others that we seek to bring peace with each other.

But it is not merely a time of peace only but also a time of good will toward men. It is the one particular time of the year when we forget ourselves and make an especial effort to show our good will toward those whom we come in contact with on our way through life. And in making this a season of good will to others and of forgetfulness of self, it also becomes a season of joy.

This evening, Miss Cameron, a number of your friends have assembled to show their good will toward you. For some thirty years or more you have been teaching the younger people of this community the great truths of the old Book of Life. Under your teaching many a life has received strength and inspiration. Some of those who used to attend your class have returned to their places. They often look back with joy to the evenings spent under your teaching. The younger people who have in recent years assembled at your home have appreciated very much what you have done for them and this evening they have come together to tell you how much they have enjoyed your Bible class and in some tangible way to try to express their attitude to you. And in coming thus, let us assure you that it brings us great joy and that we trust that you will value this gift as much as we do because of our visit will be none the less great.

We would now ask you to kindly accept this small gift as a slight token of the esteem in which you are held by us.

We trust that you will value this gift as much as we do because of our visit will be none the less great.

Although taken completely by surprise Miss Cameron replied in her usual pleasing manner and it part said that the interest manifested by the pupils throughout the many years in which she conducted the class more than repaid her for her efforts. Words failed her, she said, to express the gratitude she felt for the kindly words and valuable gift she had received at the hands of her friends. Owing to the absence of her brother she expressed what she knew would be his sentiments, namely an expression of since a thanks and appreciation.

A programme of speeches, solos and recitations was excellently carried out and the proceedings wound up with a dainty luncheon kindly provided by Mrs. D. M. McDonald. The evening was most pleasantly spent and made a fitting preparation for Christmas Day. (Patrol please copy.)

PERSONALS

Mr. R. M. Emman of Mt. Allison Academy is spending his holidays at his home in Vernon.

Mr. S. Drake of the Canadian Bank of Commerce, Main Branch, Halifax, has been transferred to

Miss Marjorie Trainer, Supervisor's Dept. of the Royal Bank of Canada, Halifax, is spending the holiday at her home in Prince Edward Island.

Mr. Bruce Taylor, the efficient and obliging manager of the Queen Hotel was very agreeably remembered by his staff on Christmas eve. The Hotel dining-room was very artistically decorated for the happy season and the Christmas men left nothing to be desired.

At the Threshold of the New Year

Nineteen-Hundred Twenty-Two

"Ring out the old, ring in the new, Ring, happy bells, across the snow; The year is going, let him go, Ring out the false, ring in the true."

In expressing our appreciation of the good will and patronage extended to us during the past year we also wish our friends a Happy, Healthy and Prosperous New Year.

During 1922 we shall keep pace with every advance in the science of pharmacy, we shall handle the best goods ONLY, shall give prompt, courteous and thoroughly reliable service, and endeavor by every means in our power to promote the welfare of our customers.

A Fair Business

C. E. McKenzie

With all the raw materials at the price they were in previous days and with butter at nearly fifty cents for fat, the dairy cow can truly be called the mortgagee. Some dairymen do not get the best of the advantage of the farm into road cars which produce other farm animals. The net returns depending on the amount of milk and but or fat produced, together with the price of the manufactured articles, is not so great.

The average yearly production of milk per cow in this province is barely sufficient to pay for feed consumed, but the possibilities of production are great.

The process of weaning out the poor producers and giving the selected ones proper feed and attention is a high producing and profitable herd may be built up.

However all the weeding and selection possible cannot be a success unless the feeding out of the business is done intelligently.

Some dairymen do not get the best of their herds for the reason that they do not study how to feed to a profit.

Any business run to its full capacity is generally a paying proposition provided the right kind of machinery is installed.

This is true with regard to the dairy cow. The breeder should select the one that will give the greatest return for feed consumed and then work her to her full capacity by supplying the proper feeds in such quantities that they will give the best results.

To the wide awake farmer, winter dairying, taking everything into consideration, is more profitable than summer dairying for the following reason, namely that his cow is cheaper than in summer and that the prices of the finished articles is higher.

With a proper ration it has been proved that stable feeding gives larger returns per acre of fodder grown than does pasture.

One instance came under the writer's notice early in the winter of 1920. It was a case of a laboring man who could not procure pasture for his cow. He decided to try what he could do by stable feeding the whole year.

This cow, a grade Holstein, he sides feeding his family in milk and cream returned to her owner for cream sent the creamery over two hundred dollars in cash. In fact she beat the record at the creamery and the net returns were such that this man has since fed his cow in the stable the whole year round.

However, grass seems to be the natural feed for animals, and allowing the cow to pick her feed is much easier than storing food for stable feeding, but it is the greatest returns are to be obtained, the pasture and summer and fall. This applies especially to the cow in milk and one which will milk well into the winter. If the milk decreases, due to shortage of feed or poor conditions it is difficult to bring the cow back to normal flow. In fact many dairymen say you cannot do so.

Even dry cows due to frost during early winter will give a better amount of themselves if given enough feed to flesh up before dropping their calves.

Demonstrations have proven the above facts time and again, but generally speaking this is not practiced.

Deviations which allow their cows to drop in their milk flow from either shortage of feed or care are losing hard cash just as sure as if they had a hole in the cashbox.

A certain amount of feed is required for upkeep and over this amount is profit.

From the appearance of some herds they are not receiving even a maintenance ration, let alone enough feed to produce milk at a profit. Many feeders evidently fail to realize the relation of feed consumed to production. If short of feed this year make arrangements to purchase an abundant supply of milk feed as it takes almost three quarters of food consumed for upkeep therefore the more you feed above maintenance the greater will be your percentage or profit.

Therefore do not let the feed shortage frighten you so that you will let your cows dry and think to run them through the winter cheaper as you will not be making anything out of your herd and it will be all outlay and no income.

Feed as much as you think they will need to keep up the body and then some if you want to be in a paying business.

No business that does not pay dividends will keep the owner long, and this applies to dairying as well as anything else. Therefore make up your mind to make it pay and you will be surprised that you did not think of running your factory to full capacity long ago.

THE OCEAN HELL TO VISIT CANADIAN PORTS NEXT SEASON

MONTREAL, Dec. 28.—The only survivor of the once notorious "Ocean Hell," which between the years 1871-1878, transported over 167,000 men, women and children convicts from Great Britain to Australia, namely, the Success, now on a tour of the world, will touch at this port next a stay for several weeks at the opening of the next navigation season according to a letter received from her master, Captain D. H. Smith, here today. The Success was built in 1790 and was the commander of the felon fleet, otherwise known as "The Ocean Hell." She is by no means changed from her original state, and aboard are shown the airless dungeons and condemned cells the whipping posts, the branding irons, punishment cells, lead-tipped cat-o'-nails, taffs, cuffs, bath and other tortures of the age. She has been inspected by over 15,000,000 people.

CALGARY TEAM BEAT ESKIMOS

CALGARY, Alta., Dec. 27. Calgary Tigers, provided a suitable Christmas present for 5,600, the largest crowd that ever jammed in to the arena rink, and incidentally came to the front in the Western Canada professional hockey league by defeating the Edmonton Eskimos 2 to 0, this afternoon in a thrilling game, that was more brilliant from a defensive point of view than from an offensive view point. Fully 1,500 people were turned away.

Reid and Talbot, the goalkeepers, were in wonderful form. Don Stanley and Anderson starred for the Tigers, while Matz and Simpson excelled for the Eskimos.

Bread Was Gem-Studded

BERLIN, Dec. 26. Russian smuglers are taxing the resources of the customs officials and guards on Germany's eastern frontiers. Large quantities of precious stones and gold rubies recently have been confiscated from shabby looking in dividuals seeking entrance into Germany.

One of the smugglers had a black bread sandwich studded with diamonds, valued at millions of marks. Another had a large diamond buried in the heel of his boot. Yet another was munching a loaf of bread, which was discovered filled with gold rubies.

The majority of the smugglers are said to be profiteers or officials deserting the Bolshevik cause.

LONDON, Dec. 24. Striking must, calcic powder, carbon anhydride, with the result that a large proportion of them were cured.

Another doctor acting on the Paris Medical Academy, having noticed that men working in this kilns never developed tuberculosis. It is believed that his treatment can now be advocated as both a therapeutic and prophylactic measure saturated with quicklime.
