

Neuralgia Plenty of people will doubt that Neuralgia can be cured by Griffiths' Menthol Liniment, but that does not alter the fact that it does cure. First bathe the painful parts with warm water, then rub it right in to where all the pain comes from. It will penetrate to the aching nerve, allay the inflammation and bring about almost instant relief. You will not doubt this when you try Griffiths' Menthol Liniment.

Hand-some In-grains There's no form of wall decoration so much used this year as plain Ingrain paper with wide borders. Among our new samples - You'll find every shade of Ingrain and the handsomest borders shown in town. We'll get them for you at a few days' notice. Come early - memo of room sizes. MCGOUGAN & WRIGHT Summerside

Estimates Passed in House (Continued From Fifth Page.) The understanding that there is a sinking fund. The sinking fund is always a guarantee and a security to the buyers of debentures. In 1839 there was to the credit of the College, to meet debenture issues of 1893 and 1899, \$1,502.50. Tuition fees received in 1900 were \$1,153.50, not sufficient to pay the interest. He wanted to know why the amount was not debited and credited in revenue and expenditure. The board made by the Government that the expenditure and revenue would be made to meet was not valid. He contended that there would be a deficit and that the Government knew it at the present time. There is still a wide gulf between the two sides of the ledger of the Province and the finances are all adrift. During Mr. Matheson's speech an altercation occurred with the Premier and the arguments advanced on both sides were listened to with closest attention.

The House then resolved itself into a committee of the whole with Mr. Simpson in the chair. Mr. Hughes regretted that there was no appropriation for exhibitions. He found the people throughout the Province were asking for it. It appeared to him that the exhibitions held in the past have been great educators for the breeding of live stock. Spasmodic efforts in the way of exhibitions causes a retrograde step of many years. Nothing would be said even if the entire amount spent on exhibitions was a deficit. He then read a resolution passed at the annual meeting of the Exhibition Association and contended that such a resolution was not receiving the consideration of the Government. This season the farmers will not have a chance to exhibit at all. Exhibitions are being held all over the world. In Upper Canada the associations proposed by the Government are conducted jointly with exhibitions. A very fair offer has been made by the Exhibition Association. The committee which waited upon the Government proposed to take \$4,000 and bear all expenses of \$3,000 and the Government to defray half the deficit. He considered it very unwise to pass over the Association's offer. He would say that the city would again give a proportionate grant. He urged the Government to bring in supplementary estimates to defray the expense. He was surprised that the farmers in the House did not take a more determined stand. The Exhibition Association was organized and buildings constructed and repaired especially in the interests of the farmers. He believed if there was any Province in Canada, Prince Edward Island should hold exhibitions.

Mr. Rogers said the matter had received careful consideration. He was not sure that the benefits were general although the grant was general and came from all parts of the Province. Some time ago there were held county exhibitions and complaint was made that the Provincial Exhibition was not a general advantage to the agricultural population or a substitute for the exhibitions held in the different counties. He contended, however, that due weight must be given the demands of the gentlemen represented by a committee. He understood that there is a talk of having the exhibitions held alternately in by Provinces. He expressed himself as in favor of provincial auctions of pure bred stock such as are held in Ontario. In that way the best prices could be procured.

Mr. Matheson asked the Commissioner of Agriculture if the pure bred bull recently purchased by the Government was bought at auction? Mr. Rogers said the animal was not

purchased at auction but was bought at private sale for \$350. He was afterwards offered at auction to see the real value of the animal and it was demonstrated beyond doubt that the animal is a valuable one as the Government were offered \$25 more than was paid for it.

Hon. D. Gordon, asked whether the grant for societies included \$1,000 toward the Maritime Agricultural College in N. S. The Premier replied that the Government were not committed to give \$1,000 to the college now being constructed in Nova Scotia. A delegation went to Nova Scotia and talked over the matter but no grant was pledged. The matter was talked over and it was conceded that \$1,000 was the proportionate amount. He contended the college would be a great advantage to the young men of the Province. In the past students had to travel to Guelph. It was impossible to conduct a well equipped agricultural college in this Province.

Mr. McLeod said he could sympathize with the people who thought that the irregular holiday of exhibitions was detrimental to the Province. But the exhibition calls for additional expenditure and we cannot afford it. If he carried out his promise to make revenue and expenditure meet he could not vote for a grant this year. He did not like the way of going into additional expense when we have not the money to pay.

Captain Read said that as a breeder he was in favor of exhibitions. He thought however, that the Exhibition Association got a big fat plum last year and they have got to be satisfied with going without the grant this year. This year the Provincial Government will only get \$15,000 from the Dominion Government. The benefit derived from exhibitions is largely derived by the citizens and hotels and some questionable resorts. He would sooner see the amount spent in bulls.

Mr. Matheson thought it would be a deluge of bulls. He wanted to know why the statement was made in the stock farm report that the bull was purchased at Ottawa at a sale. Now it seems the animal was bought at a private sale. Why was the animal set up at auction? Was it for an honest purpose? As a matter of fact there is no record that there was a valid bid. If there was one bid of 50 cents the courts would have awarded the animals in spite of the attempted fraud. It was a small act for a man of such a high and mighty position as Com of Agriculture. Why has the other animal been slighted? He wanted to know why the poor animal did not have a rug. He also wanted to know why he did not purchase an animal for Kings Co.

Mr. Rogers explained that Triumph was bought for the Stock Farm. The animal was bought without a rug and that was why his name appeared in connection with the purchase of a rug. The Government did not intend to purchase a second bull until the delegation went to Ottawa. Patriarch was sold in Summerside because the Government understood that there were good animals in Kings County. If the Hon. member continued to throw cold water upon the agricultural question it will not be an indication that the assistance of the department is needed by his constituents.

House took recess. EVENING SESSION. Regarding exhibition Mr. Smith regretted that there was no grant this year. He considered exhibitions were a great boon to the country. He thought the dairy industry should be encouraged perhaps by giving prizes for the best make of cheese. He hoped that next year there would be an exhibition.

Hon. Mr. Gordon referring to education noticed that the amount was \$1,000 less than last year. He paid a high compliment to Judge Warburton whose articles in the P. F. I. Magazine on educational system are very instructive. He said the clerk of the education department should be a teacher.

Hon. Mr. Farquharson said that when the Liberals came into power they did not find a teacher acting as clerk in education Office. Only one teacher could get the office out of 400 or 500.

Mr. Matheson thought the Government would do well to provide for the promotion of the teacher so that good men may be induced to remain in the profession. Mr. McNeill the former clerk, acquired through long training a thorough grasp of his duties and was a very capable official. It is essential to have a teacher as a clerk in the office of Superintendent, as he is often consulted in educational matters in the absence of the Superintendent.

Attorney-General Peters said that the Liberal Government had simply followed in their predecessors' steps when they appointed Mr. Farquharson. It will become the Conservatives to complain when the Liberals are paying \$200 less and to-day the secretary receives only \$600.

Mr. Rogers said that Mr. Matheson did not know a great deal about the duties of the educational department. He had stated in the afternoon that a number of schools are in existence contrary to law. He then quoted from the act to prove his contention.

Mr. McLean said that one half of the schools have been opened for political purposes. He contended that there should be only one half of the present schools. He claimed that \$10,000 could be saved in the department of Education.

Hon. Mr. Rogers claimed that there are 34 schools with 12 scholars and under. There are schools in Canada where the professors are engaged in teaching only a few pupils.

that he agreed with the Hon. member from Souris. It seemed to him that a great many of the schools could be re-arranged. It had been repeatedly brought to his notice that in many schools the attendance is very small. He would be in favor of bigger districts with a more efficient service. He did not think the reference to the Clerk of the Superintendent of Education was called for.

Premier Farquharson said he did not feel at all delicate about the matter. The appointment of clerk to Superintendent of Education was made above board and if the Government decided he would retain the office for some time to come. It would be a very difficult thing to re-arrange the school districts. He asked Mr. McLean to put his hand on one school that had been opened for political purposes. He knew of two or three cases where the Government gave way and allowed a school, but there was no such thing as a universal system as has been charged. Suppose that the Government gave the families \$10 or \$20 to drive their children to school. The parents would take the money and the Government would not have a guarantee of attendance. Another proposition had been made for the Government to drive the children to the schools.

Mr. Matheson then quoted from section 15 of the School Act and contended that the Commissioner of Agriculture should pay attention to the text books of Agriculture in order that he may know more about the duties of his office than he does about law. He claimed that a school with an attendance below 20 lacks emulation and is invariably a poor school.

Mr. Whelan contended that the awarding of scholarships was not made with justice to the City. He claimed that scholars in the City should have the same opportunity as the boys and girls who come from the country. At present the college fee only is cancelled.

Captain Read said some schools might be amalgamated but none in his district. Hon. Mr. McLeod spoke favorably of the work of the female teachers in Summerside.

Mr. Arsenault thought the Superintendent should visit and rearrange the districts. Mr. Bruce spoke of the improvements over former years and said one of their best teachers in Valleyfield was a lady.

Hon. Mr. Cummiskey thought a teacher could give more attention to five scholars than to 40. Mr. Smith spoke of the proposed North River bridge which would benefit 7,000 people. It would cost \$20,000 to repair old bridge. He suggested that no action be taken until the lower site is looked into. The district affected had no railroad facilities and as a matter of justice should have the bridge. Capt. Read said his district wanted two bridges, one across the Dunk River and the other across the Wilmet River.

Premier Farquharson said for the present the old bridge would be repaired. With in a year the matter would be settled. Hon. Mr. McLeod supported Capt. Read's claim for new bridges. A Committee of three was then appointed to bring in an appropriation Bill. The Bill amending the Controverted Elections Act passed its third reading on a straight party vote. The House went into committee on the Bill to amend the assessment Act of 1891. It will be read a third time today. House adjourned shortly before midnight and will meet at sharp 10 this morning.

GAS ON THE STOMACH. result of imperfect digestion pressing up against the heart, it excites a alarming symptoms. Instant relief is afforded by taking half an hour after the meal, ten drops of Polya's Nervine in a little sweetened water. Nervine aids digestion expels the gas and imparts a sense of comfort. Nervine is good for lots of other things and wise people keep a 25c bottle in the house for rheumatism, cramps, neuralgia, toothache &c. Try it.

TORPEDO BOAT'S TRIAL. QUINCY, Mass May 7.—The torpedo boat Lawrence had another speed trial in Massachusetts Bay yesterday and attained a maximum of 27 knots and a fraction.

HUMORS. Come to the surface the spring and in other season. It's a pity they don't run themselves all off that way; but in spite of pimples and other eruptions, they mostly remain in the system. That's bad. Hood's Sarsaparilla removes them and cures all the painful and disgusting troubles they cause. Nothing else cleanses the system and clears the complexion like Hood's.

BRUSSELS TO PARIS BY ROYAL TROLLEY. BRUSSELS, May 7.—Le Petit Bleu announces that King Leopold intends to create a network of electric railways requiring a capital of a million of francs (about \$200,000,000) to be constructed in the following order: Brussels to Antwerp, Brussels to Ostend, and Brussels to Paris.

DISEASES OF CHILDREN. Measles, Scarlet Fever and the many exhausting diseases of childhood, frequently leaves the little sufferers in a weakened and debilitated condition of health from which it is difficult to rescue them except by the regular use of Dr. Chase's Nerve Food. This preparation is admirably suited to the requirements of children, and has such an invigorating and restorative influence on the system as to make weak, puny children healthy plump and active.
