CHINESE SEIZE RUSSIAN OWNED RAILWAY

(Special To The Guardian) MOSCOW, July 13.—The Tass agency, publishing its first report of seizure by Chinese officials of the Russian owned Chinese Eastern Railway, said tonight that Manchurian troops, including well armed Russian White Guards had advanced to "the very frontier" of eastern Siberia and Manchuria.

Its report read, in part: "Simultaneously with news of seizure of the management of the Chinese Eastern Railway, came the report of concentration along Soviet frontiers of Manchurian troops, fully armed and on a war footing which had moved to the very frontier."

According to the same reports, Russian White Guard detachments, which the Manchurian commanders intend to send forth on Russian territory, were lined up with the Manchurian troops facing the frontier.

TOKIO, July 13.—Despatches to the Japanese news agency Rengo, say that the former Russian manager and assistant manager of the Chinese Eastern Railway left for Siberia tonight with their families and other Soviet officials, in compliance with the Chinese order for their deportation.

COMPULSORY INSPECTION OF POTATOES

Motion To Petition Federal Government To Adopt Regulation For P. E. I. Adopted Unanimously.

At a meeting of potato growers and dealers held on Saturday in the Prince of Wales College hall it was unanimously decided to request the Federal Department of Agriculture to put into effect compulsory inspection of all tablestock potatoes for interprovincial and export trade, beginning with the season of 1929.

The meeting was presided over by Hon. W. M. Lea, Minister of Agriculture.

Mr. MacIntosh in his address said there seemed to be a growing tendency throughout the Dominion for more inspection of perishable fruits and vegetables. When the system of inspection on request was introduced, it was felt that as soon as that service became sufficiently popular to warrant a reduction in the inspection fee, this reduction should be made.

Inspection in Prince Edward Island last year, according to the records given Mr. MacIntosh before leaving Ottawa, amounted to between 3,400 and 4,000 cars, which represented an increase over the previous year. An increase has been noticeable in like manner in almost every Province except Nova Scotia, and there was some increase noted there (his year). The distributors in Ontario, from Toronto, around the Bay to Niagara Falls, covering approximately 8,000 car loads, have already decided on compulsory inspection measures as have also New Brunswick producers. Every car of fruit and vegetables moving out of British Columbia will move under Government supervision.

Extending Trade

Right Hon. Philip Snowden, Chancellor of the exchequer, announced in the House of Commons that communications were going forward to the Dominion looking to the summing up of an imperial economic conference. Its purpose, he said, would be consideration of ways and means of extending intra-empire trade.

Relations Of Church With State Uneasy

LONDON, July 13.—The Archbishop of York today recommended that the next church assembly of the Church of England appoint a committee to inquire into how revision of the Prayer Book may be carried out.

Speaking before the convocation of the Synod of York he stressed that there was at present no open conflict between Church and State, but that rejection of the Prayer Book Measure in Parliament might easily lead to disestablishment.

"The situation resulting from Parliament's action is one wherein he cannot and ought not to acquiesce," he said. "If we do not immediately demand disestablishment we are bound to put on foot a most serious inquiry into the way that the evils of the situation may be remedied."

(Special To The Guardian) MONTREAL, Que., July 13.—A carrying on her deck what is said to be one of the tallest spars of Douglas fir shipped out of British Columbia by the Canadian Ranger, Canadian National Steamship, Captain Miller, reached here today from Vancouver via Panama. This spar is 186 feet in length, measures 36 inches at the butt and ten inches at the top. It weighs 25,000 pounds and contains 5000 feet board measure. It was cut by the Timberland Lumber Co. and forwarded as a gift to the Canadian National Exhibition at Toronto, the Canadian National Steamships and the Canada Steamship Lines agreeing to further the gift by furnishing transportation from the coast through the St. Lawrence waterway to Toronto.

It is quite an undertaking to load and unload the spar and the powerful floating crane of the Montreal harbor commissioners has been ordered for an early hour Monday to lift it on the dock of the inland vessel, the Lethbridge. In addition to the spar, the Canadian Ranger carries a large consignment of British Columbia lumber for local industries and some of it will afterwards appear on the railways as part of the material used in making cars. A great quantity of British Columbia timber and lumber is being carried to Quebec and Montreal this season, the Canadian National Steamships sharing largely in this trade. There are other good things on the Canadian Ranger including tinned pineapples from Singapore, salmon from British Columbia packers, and rice from the Orient.
