ALLEY & CO. LIMITED

Why A Farm Needs A Milwaukee Air Power Water System

Combined in a few words the answer is: Because it is the best investment a farmer can make.

Time spent in carrying water, in pumping water and in taking the stock to the watering trough is time that can be used to better advantage at other work.

The matter of home comfort also is important. Isn't the wife of the farmer just as good as the city woman?

What about the children? Is there any reason why they should not have a home equipped with a bath room and inside toilet just like their city relatives?

And to think what it means in case of fire to have a hose handy and eighty pounds of water pressure to fight it with.

Call in the next time you are in town and look over our demonstrating outfit.
