

STORE GOSSIP From ALLEY'S GREAT SHOE SALE

Saturday was a corker — we waited on 437 satisfied customers. Our records show it.

Children's Shoes are now better displayed, easier for your choosing. We did not have the room at first. This is a golden opportunity — bring the kiddies and have them properly fitted. Their future feet comfort depends on this.

Old Ladies' Comfort Shoes are specially displayed for this week, and easy of selection. Slippers and Oxfords, wide toes, \$1.35. Cushion Soled Oxfords, \$2.85.

Stout Ladies will find a section devoted to their shoe wants.

The Men are having a big time. Every customer a sale, and well satisfied.

Make this week a hum-dinger, and we are satisfied.

Sale stops Saturday at 11 p.m.

ALLEY & CO LIMITED FASHIONABLE FOOTWEAR

Pret not! Who bear the cross to-day shall wear the crown tomorrow

See The LADIES' CHINCHILLA WINTER COATS AT \$14.95 AND UP

Guaranteed to fit and tailored to individual measure. Also Tailored to Measure Dresses in many models and varieties of goods. Many shades, no hand-me-down garments carried by the house. So get fitted.

Mackerel Plentiful In New England

(Canadian Press.) BOSTON, Sept. 13.—Mackerel are plentiful in New England waters, particularly in the vicinity of the South Channel, and receipts of the fish are expected to surpass the record catch of 1926, according to Frederick F. Dimock, secretary of the Boston Fish Bureau.

Records of the fish bureau show that the catch in 1926 amounted to 304,490 barrels, compared with 203,961 barrels in 1925, 102,067 barrels in 1924, 121,982 barrels in 1923 and 53,703 barrels in 1922. Mackerel have been more plentiful on this coast in the last few years than at any other time since the early 80's when the demand was light as compared with today. Some vessels will remain out for mackerel until December 1st.

In November of last year a large school of mackerel was located off Cape Cod and the seiners landed the best catch ever made so late in the season. The largest receipt of mackerel ever received at the Boston Fish Pier for a single day during 1926, amounting to 712,000 pounds, were landed last November 8, Secretary Dimock said.

Lewis N. Radcliffe, deputy commissioner of the United States Bureau of Fisheries, who was in Boston recently, said that investigation had shown that the cause of the rapidly mounting mackerel catch dated back to 1923. In that year sea conditions were particularly favorable to egg hatching, he said.

"It is extraordinary that Mrs. Jenks can never see any faults in her children," observed Mrs. Smith. "Mothers never can," remarked her husband.

"What an absurd idea, James! So like a man, I'm sure I should see faults in our children at once — if they had any."

Gladys—He's so romantic. When ever he speaks to me he starts: "Fair lady!"

Edward—Oh, that's force of habit. He used to be a street car conductor.

A teacher asked a California boy in the sixth grade to write an essay on the zones. He handed this in:

"The world is divided into two zones, the male and female. The male zone is temperate, intemperate or drunk. The female, frigid, torrid, or horrid."

Rev. W. H. McEwen Writes Of His Trip

We had a delightful vacation on P. E. Island, we met so many of you at the several church services we attended. Sorry we were not able to meet more at your homes. We appreciate beyond expression the courtesy and kindness received from all.

We wish to write a few lines to tell you of our trip and assure you of our safe arrival home. We left Charlottetown Aug. 18, morning by easy stages (averaging 250 miles daily) arriving at Boston Mass Aug. 20th. Here we spent two days.

From Boston via the Berkshires to Rochester, N. Y., passing through Albany and Syracuse two large industrial centres. We spent a couple of days at Rochester visiting friends. We left Rochester Friday, going over the Honey-moon trail, a wonderful highway to Niagara Falls. Crossing into Canada at St. Catharines. Here we were inspected by Canadian officials, to see whether we had any fire-arms. The only gun in our possession was the one we used to oil our car. After some pleasant banter he said "You are not Yankees anyway."

The roadway through Canada called "The million dollar hi-way" was a delight over which to travel. Among the towns through which we passed in Ontario were Hamilton, London, Chatham and then Windsor where we stopped over Sunday at the Tourist Park. Windsor is a bustling city. Saturday eve we crossed to Detroit to see some of our Island friends, among whom were Roddy McDonald, Willie and Angus McLeod of Grand View, and Dan McPherson from Kinross. These chaps are all doing well in this hurrying city of Detroit. Sunday we attended Divine Services in the Central United Church of Windsor.

Early Monday we left on our homeward trip, passing through some beautiful sections of Michigan to Chicago, Illinois South Bend, Ind., and Dubuque, Iowa—reaching Battle Creek Thursday noon Sept. 1st. The speedometer on our car registered 6000 miles from the time we started until we returned. In all we had a very pleasant trip, meeting different people in tourist camps and seeing the country. On our way to P. E. I. we motored via the Southern route, crossing seven states; on our return trip we passed through five states and part of Ontario. We had a chance to see the country in general and judge land values in a small way. In our opinion Iowa leads first as to richness of soil and prosperity with P. E. Island or Ontario a close second.

We notice in the Island papers what is being said about certain sections of the Island as being entrancing to tourists. I do not see mentioned Grand View, Kinross, Orwell Cove, Vernon, Murray River, Morell, St. Peter's. Those places have few in their class as to comfortable homes and rich farm lands.

The residents of these sections are too much like Mary, who when applying for a position did not tell her nationality, and when asked by her employer why she did not say she was Scotch replied: "I did not want to boast." Boast about your communities, they are worth while.

The people of Battle Creek gave us a warm welcome. We are glad to be home again in the Manse and very thankful to our Heavenly Father for His loving care over us, all through the trip.

We will always have a warm spot in our hearts for P. E. Island and our many friends there.

W. H. AND MRS. McEWEN The Manse, Battle Creek Sept. 7, 1927

Woodmen of Arden Still in Existence

(Canadian Press.) LONDON, Sept. 13.—With the annual meeting of the Woodmen of Arden, the lawns of Packington Park recently were the centre of picturesque scenes. The Woodmen were in existence as a semi-military force before they became an organized body in the latter part of the 18th century, and have had a continued existence ever since.

They were meeting in the days when John Randolph, of Roanoke, a Virginian planter and Congressman, visited Warwickshire friends early in the last century, and in his diary he descants on the gatherings of fashion which belonged to the shooting days. The founder of the Woodmen of Arden was the fourth Earl of Aylesford, and a peer bearing this title is usually Lord Warden, though, since the death of the eighth earl a couple of years ago, the office has been held by Captain the Hon. Finch Knightley.

Part Time Gardener Not Man Servant

English Tax Payers Much Disturbed Over Another Turn in Taxation Screw.

LONDON, Sept. 13.—The suburban dweller who resides at The Oaks, The Elms, Garth View, Clovelly, or Buckingham Villa, is gravely disturbed over the apparent resolution of the revenue authorities to make an extra twist of the taxation screw.

At Odham, Hampshire, Police Court a number of local residents were summoned and fined £1 each for keeping a manservant without paying tax for so doing. The offenders had permanently engaged a gardener, but the gardener was not necessarily a wholtime employee.

To keep a man-servant for domestic purposes involves payment of a tax of 15 shillings yearly. The average thousand-or-thereabouts-a-year householder, however, is inclined to imagine that the term "man-servant" is limited to the employees of war-profiteers and other wealthy folk who dwell in marble with vassals and serfs at their s-l-i-d-e. They certainly never believed, when they engaged some ancient denizen of their rural abode to "do up the garden" in his odd time, that in the eyes of the revenue authorities they would be considered to be "keeping a man-servant." Consequently the householder who takes his office worries home with him, now finds another worry awaiting him at the garden gate.

However, it seems that the situation is not as bad as it might be. The official definition of a man-servant is:—"Any man working three days a week regularly, as distinct from casual workers." So suburbia breathes once more. The tax, of course, applies to butlers, chauffeurs, valets, and the like—but then a butler or a valet is not often encountered at "Rydal Mount," or "The Nest."

Is the Human Body An Electric Battery?

(By British United Press) LONDON, September 12.—The French Academy of Sciences has been intrigued by claims made by MM. Muller and Arny, of the Saltr's Institute, Zurich, Switzerland. The two Swiss scientists claim to have proved the existence of emanations from the human body which can materially change the conductivity of air, silk, and other materials.

That the human body is more or less an electric battery has been known for some time. But the emanations whose existence is now claimed to be a scientific fact, and which are designated "Anthropoflux 'R'" by its discoverers, remain mysterious.

Most users of wireless sets are familiar with the effect of the hand upon a wireless set—how its proximity to the receiving-set affects conductivity. The reason for this, say the Swiss scientists, is the presence in the knuckles of the left hand of "Anthropoflux 'R'" in its most active form.

This at first sight, fantastic theory was arrived at by a series of experiments in charging wet cells. Cells were found to charge more quickly if the knuckles of the left hand were placed close to the condenser attached to the cell. The removal of the charge in the same way, was accelerated when the left-hand knuckles were brought near.

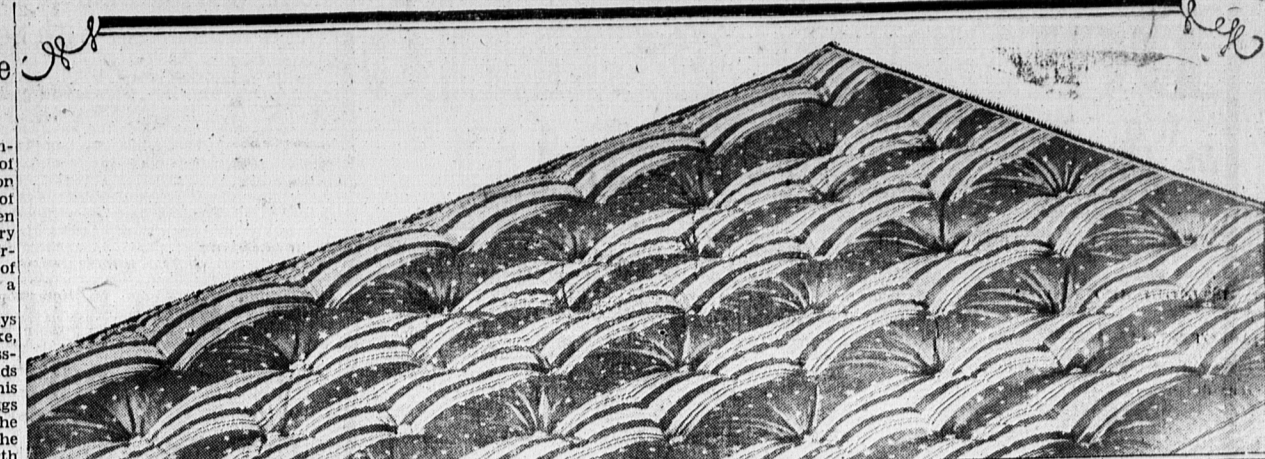

All parts of the body were found to give off these mysterious emanations in varying degrees. It was even found that the breath itself gave off a measurable quantity of Anthropoflux 'R'.

But of the exact nature of this force the Swiss scientists remain in the dark, and they have yet to discover the laws that govern its operation. For example a bleeding finger was found to give off stronger emanations than the same finger banded tightly so as to check the flow of blood.

Why do some people succumb to quite slight shocks, while others seem impervious to heavy electric charges? These vagaries of resistance to electric shock, it is asserted, have a direct relation to the strength of the "Anthropoflux 'R'" or the individual.

PRINCE EDWARD ISLAND PROSPEROUS—INKSTER

"I never met a finer class of people, thrifty, industrious and God-fearing," declared Rev. John Gibson Inkster of Knox Presbyterian church who with Mrs. Inkster and family has just returned from a 3,300-mile motor trip to Prince Edward Island

How much should you pay for a mattress?

24-karat, 18-karat, 14-karat, 10-karat—all are gold. You buy the one that is priced to suit you. Ostermoor, Snowflake, Star, and others—all are Simmons. Buy the one that is priced to suit you. All offer splendid values. Gold is always gold and Simmons is always Simmons.

There are Simmons mattresses made to sell at all prices from a few dollars to almost a hundred, but the price of each is the lowest at which a mattress of its quality can be built of safe, clean materials and by sanitary methods. Simmons are the largest manufacturers of mattresses in the British Empire—the oldest in Canada. Their volume of output and their long experience in this line of manufacturing enable them to put the maximum value into every mattress they sell.

You can rely on a mattress which bears the Simmons label. You know that no cheap, insubstantial or made-over materials are hidden within an attractive covering. A Simmons possesses through and through quality—in the ticking, the felt, the workmanship.

Buy a good mattress—it will give you more years of greater comfort. But be sure to look for the Simmons label.
