**C-I-L Potato Sprays and Dusts** assure dependable low-cost protection against destructive insects, blights, other fungous diseases.

**C-I-L POTATO DUSTS**

**DETOX.** Contains 3% DDT and 7% copper, with special carrier-sticker. Highly effective against early and late blight, leafhoppers and beetles.

**DETOX S-7.** Contains 5% DDT and 7% copper. Specially prepared for control of blight and insects on seed-potato crops, or when aphid infestation is severe.

**TRON.** A 7% dust derived from fixed copper. Gives effective control of blight and other fungous diseases.

*These dusts may be applied at any time (except during wind and rain). They do not depend upon dew for their action.*

**C-I-L POTATO SPRAYS**

**DEENATE 50-W.** The 50% ultra-micron DDT insecticide. Recommended for control of leafhoppers, flea beetles, Colorado potato beetles, and many other insects infesting orchards and certain truck crops. Widely used as a barn and livestock spray.

**DECOF.** Contains DDT and fixed copper. Like Detox, it controls blight and destructive insects, and is specially prepared for growers who prefer to spray rather than dust.

*For Early and Late Blight*

**PERENOX.** A highly concentrated fungicidal powder which contains 50% copper.

**TRI-COP.** Tri-Basic Copper Sulphate, containing 52% copper. By adding Deenate 50-W, it can be used as combined fungicide-insecticide.

*All C-I-L Potato Spray materials come ready to use. Just mix with water. They will not clog nozzles.*
