

Police Commander Jesus Galindo at Mexico City said, Aug. 22, the plot to assassinate Leon Trotsky "has the aspects of an international plot. He did not elaborate. Trotsky, genius of the proletarian revolution, died Aug. 21 in police hospital. The former Russian war commissar had been exiled from Russia since 1929 and a refugee in Mexico since Jan. 9, 1937. Trotsky's brain was pierced by a bullet fired by Frank Jackson, who for months posed as a "great admirer" of the chief of the Fourth International. Beaten by guards, the assassin was taken to the same hospital. Trotsky and his widow are shown here.

United States Prepares To Protect Good Neighbor—and Good Customer

More American Money Invested In Canada Than Any Other Nation

BY MILTON BRONNER
NEA Service Staff Correspondent
WASHINGTON, Aug. 26—As the joint defense of Canada rapidly organized, the United States moves to protect its best neighbor, its second best customer (the United Kingdom is first), and the people of the United States are in a manner of life, customs, reading and amusements.
The famous 3000 miles of unfortified frontier is now more than ever a path of communication rather than a barrier. The old distrust that followed the Revolution and the War of 1812, and which has been progressively dying for 125 years, is today really vanishing between two peoples.
The Canadians, while thoroughly loyal to the British Crown and Empire, are more closely akin to Americans than to Britons. They have the same kind of cities, they developed a new country in the same way, they have the same kind of agricultural and industrial problems, and have created a civilization in the same kind of sweeping continental way.
If the heart lies where the treasure is, then a considerable part of the American heart is concerned over the safety of Canada. About one-third of all investments of U. S. money abroad is in Canada. These investments are greater than the total in any other country.
When Canada had tariff walls, trade was difficult for U. S. manufacturers. They simply built new plants in Canada.
But many, regardless of tariffs, invested in plants in Canada because there was good money to be made there.

INVESTMENT TOTAL NEAR TWO BILLIONS

Official government figures give some astounding totals. Those quoted here mean that U. S. interests had anywhere from 90 to 99 per cent control of the plants in which the money was invested; manufacturing plants, \$530,098,000; public utility and transportation, \$519,928,000; paper and wood pulp, \$268,897,000; mining investments, \$238,838,000; insurance, \$119,746,000; petroleum, \$108,138,000; wholesale distributors, \$40,309,000; retail distributors, \$38,233,000; agriculture, \$10,369,000; miscellaneous, \$61,641,000. This makes a total of \$1,938,192,000, to which should be added \$15,448,000 for American money invested in Newfoundland industries.
The figures for public utilities include \$340,000,000 in gas and electricity undertakings. Copper and nickel predominate in the mining investments.
U. S. money invested in shares in Canadian companies, not for control but merely as an investment, total \$250,000,000. A total of \$448,000,000 in U. S. money is invested in Dominion of Canada bonds. Another \$483,000,000 is invested in bonds of the

"The gratitude of every home in our Island, in our Empire, and indeed throughout the world, except in the abodes of the guilty, goes out to the British airmen who, undaunted by odds, unwearied in their constant challenge and mortal danger, are turning the tide of the World War by their prowess and by their devotion. Never in the field of human conflict was so much owed by so many to so few."—Winston Churchill, August 30, 1940.
