THE GOOD OLD FLAG

SIR:—"A Flag for Every Home" is the most patriotic movement ever conducted by a Canadian newspaper. It is such as touches the heart of every loyal citizen no matter what creed or descent he belongs to if loyalty is in his veins.

There should be a flag in every home, no matter whether war or peace is in the air. Every person who lives under its folds should set the example of our forefathers who would not live under any other flag; and this is the best way to do so if you cannot go to the battlefield, as our bravest have done.

This movement "A Flag in Every Home" in Canada will never die. The flag of the loyal hearts. Any home which is furnished with a flag when the world's greatest war is raging will grow green from generation to generation.

I am Sir, etc. ROBERT McENMAN, Vernon, P. E. I. June 1st, 1915.

"ABEGWEIT"

The Indian "Abegweit"—cradled on the waves; the early French explorer's "La baffe et belle life"—low and beautiful island; and the Islander's "Garden of the Gulf" are sobriquets as eloquently descriptive of Prince Edward Island today as when they were first bestowed on this province surrounded by the sea.

Situated in the Gulf of St. Lawrence Prince Edward Island is separated from the shores of New Brunswick and Nova Scotia by the Straits of Northumberland. From tip to tip the island is one hundred and thirty miles, while the width varies from two to thirty miles. The surface is gently undulating. There are no mountains and no forests to speak of, but the lack of forest does not mean that the country is bare; for copses and clumps of trees are visible on every hand, giving a charming variety to the agricultural scene, and wild bits of woodland are still to be found.

The "Island" as its people love to call it, for where else in America can be found its duplicate—is in sum a garden of perfect beauty fanned by cooling breezes from the Ocean, with mile after mile of sandy beaches. Invading the land and moulding the red cliffs into fantastic shapes is the ever restless sea. Everywhere are verdant fields, prosperous farms and comfortable homes. Arms of the sea cut into the land in all directions, forming landscapes and seascapes of surpassing loveliness.

The north shore of the Island has a chert and a comfortable body state. The Island has 274 miles of railway owned and operated by the Canadian Government under the name of Prince Edward Island Railway. The highways have a reputation for general excellence and a driving tour of the island is one of the most pleasant experiences and one of the means of thoroughly appreciating its many attractions.

Accommodation for summer visitors is provided by numerous hotels, bungalows, private homes and farm houses at surprisingly reasonable rates. The hospitality of the Islanders is proverbial. There is an absence of conventionalities and the perfectly natural life that may be led is not the least of the charms of the Garden of the Gulf. Assuredly the Island is an ideal spot for a summer sojourn.

OYSTER MAY SOLVE HIGH COST OF LIVING

WASHINGTON, D. C., June 1.—As a consequence of the increase of population greatly exceeding that of land areas, and the consequent ultimate reaching or limitations in food production the Oyster Growers and Dealers' Association of North America at the seventh annual convention to be held here June 15-16, will endeavor to combat the question of the high cost of living by impressing upon America's population the food value of the bivalve. Attention is called to the fact that Mr. D. E. M. Smith, commissioner of the U. S. Bureau of Fisheries has stated the oysters are the world's most valuable water crop, regarding the purity and healthfulness of which there can be no timidity. The present crop can supply 550,000,000 meals annually and through cultivation and conservation this crop may be increased manifold.

TELL BELGIANS OF ITALY'S ACTION.

HAVRE, June 1.—Belgian aviators have flown over the greater part of Belgium dropping hundreds of thousands of leaflets bearing the following notice:—"To the people of Belgium and the German soldiers: Italy has gone to war against Austria and Germany, and more than 1,000,000 men have entered the arena on behalf of the great cause of liberty and civilisation and to crush German barbarism. Long live Italy, the Allies and Belgium."

"ITALIAN MOTHER SHIP FOR SUBMARINES."

(Special to Guardian.) The participation of Italy brings to the Allies great additional strength both in the army and in the navy. That the Italian Navy is the most modern in every sense is amply shown in many ways. In the matter of communication for instance, Signor Guglielmo Marconi, the wizard of wireless telegraphy and more recently of wireless telephony, has been called to Rome and put in so much charge of telegraphic and telephonic services in the field. Again, in connection with the navy, the Italian naval staff have built and thoroughly tested a vessel of a very exceptional type. It is known as a mother ship for submarines and provided a large bulk head opening into a long cylindrical chamber which runs nearly the length of the hull and is provided with ways to receive a submarine. Within the hull, and along one side of this chamber, is provided a workshop fully equipped; on the upper side is a large sick bay for the injured crew and other points are arranged the various other quarters for the ship's forces and supplies. We will suppose that a submarine has been injured and foundered. The mother ship starts at once for the scene. It locates the submarine, attaches hoisting cables, hoists it up and in between the catamaran stern sections, opens the bulk head door, and draws the submarine into the cylindrical chamber. The door is then closed, the submarine crew liberated and repairs work started. The whole idea is so simple and practical that it seems very strange that the submarine has been so long in us and gone through so many accidents before this mother ship has been finally brought into real actual use. However, the fact that Italy has several such vessels in her fleet, makes her of exceptional value in this war, wherein the submarine is playing so important a part, and where, therefore, a rescue ship for submarines is badly needed. POPE WILL NOT LEAVE ROME

MADRID June 1.—Senor Dato, the premier, stated today that in view of the new situation created for the Pope by hostilities between Italy and Austria, he had offered the Pontiff the hospitality of Spain, placing at his disposal the palace of the Escorial, as accommodation for His Holiness, the cardinals, and the necessary Vatican officials.

The Pope, in reply expressed his deep sense of the kindness of the Premier's suggestion, but declined the offer, stating that he had no intention of leaving Rome at present.

BIG ADDITION TO THE MILEAGE OF I. C. R.

OTTAWA, June 1.—General Manager Gutelius, of the government railways, has returned to Ottawa from Montreal where the question of the acquisition by the government of the Lake Superior division of the Grand Trunk Pacific was taken up with the officials of that company. Mr. Gutelius will remain here for a day or two and will place the result of his negotiations before the minister of railways. Hon. Frank Cochrane. It is as yet too early to outline the basis upon which the road will pass into the possession of the government. There is a mass of detailed estimate to be passed upon before an agreement is reached and ready for submission to the government.

ITALIANS RUSH TO JOIN THE COLORS.

ROME, May 31.—A cry of alarm has been raised over the possibility of German or Austrian spies being hidden in the catacombs, which extends for many miles outside Rome. The major part of the excavations of the Catacombs herto have been directed by Germans. The Catacomb San Sebastiano was until a month ago, the active scene of German spy work. It was not very far from important defensive posts. So enormous has been the rush of volunteers to join the colors that the authorities have temporarily suspended voluntary enlistment. Despite this order recruiting bureaus are still crowded daily with applicants in the prime of manhood pleading for enrollment in the combatant ranks.

How sleep the brave who sink to rest By all their country's wishes blest! When Spring, with dewy fingers cold, Returns to deck their hallow'd mould, She there shall dress a sweeter sod Than Fancy's feet have ever trod. By forms unseen their dirge is sung; There Honour comes, a pilgrim gray, To bless the turf that wraps their clay; And Freedom shall a while repair, To dwell a weeping hermit there.
