

INDIAN TROOPS

Ten Thousand More Sent to China.

MORE BOXER RISINGS

Baron Cromer to Be Secretary for War - Other Cabinet Changes

MORE INDIAN TROOPS FOR CHINA.

HONG KONG, Oct. 11.—Ten thousand more troops from India have been requisitioned for Hong Kong.

The Sixteenth Bengal Lancers and Hong Kong regiment have been re-called from the north to Hong Kong.

MORE BOXER RISINGS.

Present indications are that there will be Boxer risings similar to that which occurred in north China.

The whereabouts of rebels in Hinterland is not known, but it is believed to be ten miles within the British border.

CHINESE TROOPS MOVING.

A detachment of one thousand Chinese troops took up a position at San Chung yesterday and ten thousand more arrived there to-day.

BARON CROMER RECALLED.

LONDON, Oct. 11.—Baron Cromer, British diplomatic agent and consul general in Egypt, has been summoned to England according to the Daily Express.

It is understood in Cairo that he will not return to Egypt and it is believed he will become a member of the new cabinet.

WAR OFFICE RECONSTRUCTION.

The Express suggests that it is possible Baron Cromer will replace the Marquis of Lansdowne, Secretary of State for War, and says that the combination of Baron Cromer, General Kitchener and Lord Roberts would insure public confidence in thorough reform of the War Office.

GIVEN UP TO DIE.

Was Mr. E. N. Stowell, but Dodd's Kidney Pills Cured Him.

BROCKVILLE, Oct. 8.—When an eminent physician notifies a sick man that his case is hopeless and that he must die, he is to be taken for granted, in a pretty bad way.

That was the position of Mr. Ed. N. Stowell, of this city, not long ago. He had suffered all the agonies of Bright's Disease for several years. The ablest physicians had pronounced his case hopeless, and he had begun to set his home in order when a friend urged him to try Dodd's Kidney Pills. One box put new life in him, seven boxes cured him. Now his friends hardly know him for the same man. Score one more for Dodd's Kidney Pills.

A REAL HURRICANE

Passed Over the Province Yesterday Evening.

GENERAL DESTRUCTION

Wires Destroyed, Chimneys Blown Down and Trees Uprooted.

"The winds howled, the rains descended and the floods came" was truly applicable to the storm of yesterday evening. At seven o'clock it was almost impossible to stand on the streets. As the struggling pedestrian passed along he would notice here and there discarded umbrellas evidencing that the owner had been bereft of the same and had continued upon his journey regardless of the downpour.

At the fire department the fire alarm constantly sounded, indicating the fury of the storm without. During the evening all the shutters fell.

The record of the telephone system, the bells of which kept up a continuous ring. The destruction to the lines is great and cannot be estimated at time of writing.

At 7:30 the electric wires commenced to give evidence of the disconcert of the atmosphere and one by one they fell. A gentleman who had to accompany his lady clerks to their homes, noticed a lady standing on the street almost surrounded by live wires. He quickly hastened to her rescue and had hardly passed from the spot when a large tree succumbed to the breeze and fell across the wires, cutting off the entire street system.

When the lights went out citizens expressed relief instead of disappointment as great fear was entertained by reason of the falling wires.

Those passing along the street did so with fear and trembling as very dangerous was on the descent. Roofs were stripped of shingles and bricks apparently had lost their staying qualities.

The glass in a window in Messrs. Weeks & Co's store was blown in. A chimney belonging to Miss McEwen's house near Large's Livery was blown down.

A fence belonging to Mr. Chas. Hermans was demolished. As Mr. Arthur Thorne was passing along Queen Street a gate blew open striking him on the breast, knocking him almost insensible. Fortunately no bones were broken, but Mr. Thorne was severely shaken up.

The large smoke stack of Mr. N. Rattenbury's Pork Factory was levelled to the ground. A portion of the wall of Worth's livery stable could not withstand the straining of the wind and it too was carried away. Shade trees are badly damaged and dozens are lying on the ground, notably Fitzroy, Water, Grafton Streets.

The back range tower near the old asylum grounds was upset and destroyed. Until a new tower can be erected or means provided for a temporary light vessels

The best that money can buy should be your aim in choosing a medicine, and this is Hood's Sarsaparilla. It cures when others fail.

Prof. Koch Announces That he Has a Positive Cure.

TACOMA, Wn., Oct. 7.—Passengers who arrived here yesterday from the Orient report that Prof. Robert Koch has arrived at Hong Kong. The eminent bacteriologist of the Berlin university has devoted a year to scientific investigations in the Dutch East Indies and in the German colonies of East Africa for the purpose of testing his cure of malaria, which was only partially successful in Germany before his departure.

The scientist now announces to the medical world that his cure is positive and that every malarial district can be shortly purged of the scourge. Dr. Koch announces that his medicine is both for curative and preventive purposes. He wants it known that he has found a way of ridding countries of the malarial parasites and mosquitoes.

On his arrival in Berlin he will present his official report to the German government and will recommend that measures be taken at once to introduce his method of exterminating the parasites and the cure for malaria, which he claims can be manufactured at once in all countries.

DR. A. W. CHASE'S CATARRH CURE 25c.

WONDERFUL ELECTRIC GUN VISITORS

It Pours Fourth Shot at the Rate of 9,000 a Minute.

A machine gun of a novel character has been invented by Mr. James Judge, a well known engineer of Newcastle, Eng., who thus describes it:—

"The gun is a patent centrifugal quick firing machine gun; it is 5 feet high, and weighs about five hundred weight. It is intended for battleship, earthworks, and garrison purposes. The motive power is electricity, transmitted to a motor attached to the side of the gun. The motor causes a disc to revolve at a very high rate of speed. The bullets, which are introduced into the interior of the disc at the axle, travel along curves in the interior to the circumference, and are there impelled through a barrel. It is claimed that this disc will rotate, under the influence of the motor, at the rate of 12,000 revolutions a minute and will eject shots from the muzzle of the gun with an initial velocity of 2,000 feet per second. One of the chief characteristics of the gun is that it will maintain a continuous fire. If necessary, a shot may be discharged at every half revolution, but in practice one shot each fourth revolution will be found sufficient. The bullets are spherical, and measure 9-16th in diameter. The following are the result of the tests already made with the gun:—13,000 rounds of shot at the rate of 3,000 a minute have been discharged from the gun. These shots consisted of nickel steel, some of brass (as used in France), lead, and chilled metal. It was tested seven times privately; no motor being used nor is one yet attached to the

gun, although the gun is constructed for an electric motor. The tests were made by means of a belt driven by means of a steam engine. Under these conditions the velocity required, and which it is maintained the electric motor will produce, was not, of course, attained but the practical working of the gun was fully demonstrated. A long range could not be had, because of the necessity of secrecy, and the testing was done in a covered shed at Blyth Dry Docks. A steel target, 3-32in. thick, was shattered, the disc of the gun revolving at a speed of 2,500 revolutions per minute. From the penetration of the target it is calculated that at a distance of 400 yards a penetration of a similar character will be effected on a plate of 7-16in. thick under the influence of an electric motor. There is no heating of the barrel of the gun, because of the continuous stream of cold air which is impelled through it by the turning of the disc. The disc itself is also free from heating, on account of the special bearings on which it is constructed. These bearings are highly complicated mechanical contrivance, and are similar to those used in Parson's turbines, which can revolve at the rate of 22,000 revolutions a minute, and Leval's motor, which revolves at the rate of 30,000 revolutions a minute. To test the gun thoroughly it will be necessary to affix a motor, which will be a five horse power motor coupled direct on to the shaft."

entering the harbor must bring the remaining light to bear North, magnetic at the point where the Brighton Range intersects the Haszard Range, just south of St. Peter's Island Spit B.A.K. 3117. A message from the Telegraph Co. last night stated that owing to the storm, the electric light and telephone wires had fallen across the lines and they were unable to get the usual despatches.

A very large tree in front of the residence of Conductor McDonald, Water St., was blown down and blocked Water Street. Those on the sidewalk were able to pass under.

The express arrived in the city at 10:45, but she did not have the C. P. R. passengers or mails owing to a washout at Sussex. The St. John mail arrived, however. The passengers by the Northumberland are loud in praise of the ship during the gale. The lights were lost sight of and the lead was constantly used.

It was impossible at midnight to find out when the Princess would leave Pictou. It is probable that she will arrive in port at an early hour this morning.

Owing to the wires being down there was an entire absence of cabmen at railway station last night. A number of trees in the gardens are destroyed, one large one being blown down.

The storm abated shortly after 8 o'clock.

CHICAGO MARKETS.

CHICAGO, Oct. 10.—The following are the closing rates:

Oct. wheat, 75; corn, 40; oats, 21; pork \$16.90.

Nov. wheat, 75; corn, 37; oats, 22; pork \$11.27.

Dec. wheat, 73; corn, 34; oats, 22; pork, \$11.50.

MALARIA.

PUNCTUALITY.

We look at him with silent awe, The man who's never late, His record is without a flaw, The man who's never late. He's always where he said he'd be. Right on the dot you always see (Proud of his punctualitee) The man who's never late.

And yet he loses lots of time, The man who's never late, Although his promptness is sublime, The man who's never late. In fact his life is full of care, For when he turns up anywhere The man who said he'd meet him there Is usually late.

—From The Somerville Journal.

ENJOYED HIMSELF SIX HOURS.

And Then Found His Neck Was Broken.

NEW YORK, Oct. 9.—For six hours Conrad J. Lang, 33 years of age, of this city, walked, talked, laughed and enjoyed himself with his family in ignorance that his skull was fractured and his neck broken. It was not until he had retired and his pillow pressed upon the broken bone of his neck, that it was known he was injured at all. Then he died.

Lang was a truckman. Last night he fell from his truck. He landed on the back of his neck and head and was for a time unconscious. However, before an ambulance could be sent for he sprang up, declared he was all right except for a slight headache.

One of the small bones of the neck had been chipped off, and it was the pressure of this on the spinal cord when lying asleep that killed him.

WINDWARD NEWS.

Peary Steamer Was at Godhavn August 10—Good Fopes Entertained.

NEW YORK, October 9.—News two weeks later than any previous information has been received from the Peary steamship Windward, in a letter written by Captain Samuel W. Bartlett to a friend in this city, under date of August 10. Captain Bartlett stated that he had arrived at Godhavn on that date and that all were well aboard.

Half the distance of the voyage from Sydney had been accomplished under sail. He expressed the anticipation of a good run to Cape York and was hopeful of finding Peary there.

DEPART

Mr. James Cuming and Daughter, Australia

VISITORS TO THE CITY

Accompanied by Mr. M. A. Cuming, N. Y. Impressions of Melbourne.

Yesterday's westbound express had on board Mr. Jas. Cuming of Melbourne, Australia, and his daughter Miss Grace Cuming and Mr. M. A. Cuming of New York. All of the above party have been visiting Mr. Charles Cuming of this city. Mr. Jas. Cuming has been a resident of Australia for the past 38 years. Mr. Cuming was born in Banffshire, Scotland, and at the age of 13 he left home and emigrated to St. John N. B., where he remained for some three years after which he removed to Portland, Me. After remaining in Portland for about four years he removed to Australia where he has resided ever since. Mr. Cuming is now the senior partner of the firm of Cuming & Smith, chemical manufacturers. The fact that Mr. Cuming has remained in Australia is strong evidence that he likes the country and its climate.

From Mr. Cuming THE GUARDIAN learns the following particulars:

Mr. Cuming has been six months en route to the Island. He came by way of the Cape of Good Hope and from there he took passage by the Castle Line steamer to London. While in Europe he visited England, Scotland, Switzerland, Belgium, Germany and while in Paris visited the Exposition.

Among the Exhibits at the Exhibition Mr. Cuming noticed an Australian exhibit of a single fleece of wool, nicely put up in a glass case, the weight of fleece was 33 lbs.

In July Mr. M. A. Cuming of New York crossed the Atlantic and met his brother in Glasgow and spent some two months visiting the principal points of interest in Europe with him.

Messrs. Cuming are now on their way to their respective homes. Mr. Jas. Cuming before returned to Australia will visit Colorado, Salt Lake and a number of other western cities and will leave San Francisco in December sailing by one of the Oceanic Steamship Company's steamers and will call at Honolulu, Samoa, Auckland, and from thence will go direct to Melbourne, reaching there early in the new year. Mr. Jas. Cuming is a lover of all genuine sport and is the president of the Footscray Football Team. Footscray is Mr. Cuming's home and is a beautiful suburb of Melbourne.

Melbourne is the capital of Victoria and is as our readers are aware the largest city of Australia, situated on the Yarra River and Port Phillip Bay. When Melbourne is spoken of, it comprises the city proper and numerous suburbs, including Fitzroy, Richmond, Emerald Hill, Collingwood, and Prahran. It has important commerce and general manufactures, and exports gold, wool, hides, etc.

Melbourne has the advantage of being one of the chief seaports of the southern hemisphere and has a world-wide reputation for its fine public buildings and parks, university, national museum, mint, exhibition building, parliament houses, treasury, government offices, library, etc. It was settled in 1835 and made the capital in 1851. Population exceeds half a million.

The commerce of Melbourne is very great especially with the mother country for exceeding that of any Canadian port. The climate of Australia Mr. Cuming says is all that can be desired. The Island is bordered on the east by the Pacific, by the Indian Ocean on the northwest, west, and Southwest and is separated from Papua by Torres Strait on the north, and from Tasmania by Bass Strait on the south.

It is regrettable that during the visit stay in the city they were greeted with almost continuous rain and in consequence they were unable to see the country.

CECIL RHODES

Again Active in Cape Politics.

MEN'S NEW UNIFORMS

Some Liberal Gains in British Elections—Their Leader's Comments.

CAPE TOWN, Oct. 11.—Cecil Rhodes received an ovation today when he was appointed the President of the Congress of the South African League.

In his address he attributed the South African war to "mugwumps," and said that but for them Mr. Kruger would never have dared to send an ultimatum to Great Britain.

CONCILIATORY REMARKS. Generally speaking, Mr. Rhodes was conciliatory in his remarks. He declared that now that "Krugerism" had vanished Great Britain would establish a Liberal Government and would do everything possible to unite the i.e.e.s of South Africa with those of the Empire.

OTTAWA, Oct. 11.—The volunteers returning on the Idaho will likely be detained at Halifax three or four days as it is intended by the Militia department to give them a complete outfit of clothes.

SOME LIBERAL GAINS. LONDON, Oct. 11.—The Liberals have been doing far better in the Parliamentary general elections than they did in the boroughs.

Yesterday they gained two more seats in Cardiff, and the Otley division of Yorkshire. This equalizes the party gains. The Ministerialists and the Opposition have now gained 27 seats each.

BANNERMAN'S MAJORITY REDUCED. Apart from Sir Henry Campbell Bannerman's reduced majority in the Stirling burghs, and the success of Sir Edward Reed at Cardiff, a seat formerly held by Mr. James M. McLean, prominent in Indian affairs, who did not seek reelection, there is little of interest in yesterday's elections.

The Ministerialists now hold 357 seats and the Opposition 205.

SATISFIED WITH THE RESULT. Sir Henry Campbell Bannerman, addressed his supporters after the poll had been declared, said that he was satisfied with the result considering the state of the register and the most disadvantageous circumstances for an election that an ingenious government could devise.

Kumfort Headache Powders are safe, pleasant and harmless.

Gents—Our new fall and winter stock of gloves has just arrived. It will be to your own advantage to call and examine them. We feel sure you will buy, as the quality is first-class and the price as low as good gloves can be sold.—R. H. Ramsay & Co. 941

Be wise, buy Ramsay's gloves. They're fitting, lasting, good looking gloves at moderate prices.—R. H. Ramsay & Co. 1041

Plan of Tiding—Now is the time to have your piano tuned and repaired. The piano is used more during winter than any other time during the year. Leave your order with F. Hutchison, the jeweller, and have Mr. Morris call and attend to it. 1141
