**"THE OCTOBER MAN"**  
Which comes to the Prince Edward Theatre today is a suspense picture and not a "whodunit." From the skillful pen of author-producer Eric Ambler, who wrote "The Mask of Dimitrios" and "The Way Ahead," it is directed by Roy Baker and stars John Mills and Joan Greenwood with a strong supporting cast headed by Edward Chapman, Kay Walsh and Felix Aylmer.

The setting is a typical London suburban hotel to which John Mills, as a young chemical engineer just released from hospital suffering from the results of a brainy accident, goes to live. When a girl resident who has befriended him is murdered, the police and other guests suspect him of the crime. As the film builds to its climax, Mills' resistance to his suicidal tendencies begins to give way. However, the real murderer is caught and Mills is saved from killing himself by Joan Greenwood, his girl friend.

**DAILY CRYPTOQUOTE**—Here's how to work it:  
A X Y D L B A A X R  
is L O N G F E L L O W

One letter simply stands for another. In this example A is used for the three L's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.

**CANADA NEEDS HEALTHY RAILWAYS TO SERVE HER PEOPLE**

Canada's Railways Carry 25 MILLION Tons of Food!

Yes, last year Canada's railways carried more than 25,000,000 tons of grain, meat, vegetables, fruit, butter, cheese, eggs, from Canada's farms to feed towns, cities and villages from coast to coast, and for shipment overseas.

Healthy, adequate railways are essential to bring out the produce of our prairies and farmlands. In fact no other country in the world is so completely reliant on railways! Canada is so widespread.

Every year Canada's railways haul for you, and for every other Canadian, an average of about 12 tons of freight over something like 400 miles. This tonnage is made up of your food, fuel, clothing and practically everything you use. And they haul this freight for you at the lowest freight rates in the world.

Canada's railways are this country's biggest industrial venture. The money they spend every year for wages and purchases equals 13 cents out of every dollar of Canada's national income. These are reasons why it is impossible to have a strong Canada without strong and healthy railways.

This advertisement is one of a series pointing out the railways' key place in Canada's economy. As Canada's largest builders of railway rolling stock and equipment, this company and its employees are directly concerned with the railway industry. Canadian Car & Foundry, operating eight modern plants, turns out thousands of railway cars of every type. The company is fully equipped to supply Canada's railways with the latest type passenger and freight cars to meet the growing needs of our expanding economy.
