## The Indoor Circus

A record breaking attendance was on hand Saturday night at the Garden City Indoor Circus, now running in the Market Building. The concession booths were all well patronized by the hopeful, and many very nice prizes were won.

Longaphie Won.

Gus Longaphie, stellar little local boxing performer, did not take long in putting away Rudolph of Halifax in their boxing bout, the latter taking the count in the first round.

CAUGHT "GOLDEN HADDOCK"

BOSTON, April 5.—A "golden haddock" weighing a little more than

five pounds was caught in the nets of the trawler Cormorant off Georges Banks on March 25 and had not been caught in a great many years and the specimen was held at the offices of the Commonwealth Fish Company. Later it will be turned over to the department of zoology at Harvard College. It was about 20 inches in length, and of a golden hue.

Minard's has Wonderful Antiseptic Power.

## Church Services

TRINITY UNITED CHURCH

The beautiful weather yesterday brought out good congregations at all services. In the morning Rev. Mr. Brown delivered a very helpful sermon on "The Grace of God," taking as his text 2 Cor. 6-1, "We beseech you that ye receive not the grace of God in vain" and emphasizing that it is the gift of God, freely given. The outpouring of the heart of God upon undeserving men. By grace we are saved and there is no need for a man to be lost, to be discouraged, or to remain as a backslider. The whole message of the Bible is that "where sin abounded, grace did much more abound." The service was broadcast by C. H. C. K.

Announcement was made that commencing this evening there will be two weeks of devotional services held in Hearts Memorial Hall beginning at 7.30 o'clock marking the ascent towards Easter. The theme for this week is Jesus on his way to the city. The services will close Good Friday evening with the rendering of the Cantata "From Olivet to Calvary."

Rev. Dr. Ramsay at night spoke from the text Matt. 11:27, "All things are delivered unto me of my Father" and made a very strong and impassioned appeal to the young people, of whom a very large number were in the congregation, to enlist under the banner of Jesus.

The choir rendered anthems at both services and in addition Mr. P. W. Small, gave the solo "There is a Green Hill."

On the first Sunday of each month the collection in the Sunday School is for missions. The collection yesterday was \$43.70, a most satisfactory increase over the same Sunday of last year.

## Y. M. C. A. SERVICE OF SONG

About four hundred and fifty young people joined in the service of song in Zion Church last night. The choir, composed of the C. G. I. T. girls of the church, rendered two beautiful selections. Zion Church male quartette rendered a splendid number. Miss Isabel Andrew read the scripture and Miss Isabel Brown led in prayer. Mr. Fulton gave the address of the evening dealing in his usual forceful manner with the great Christian leaders of the sixteenth century. Mr. Fulton in the course of his remarks dealt with the Renaissance period of the early 16th century, when the famous Erasmus visited the universities of England and was received with acclamation. The teachings of this eminent scholar were brought to the notice of Hugh Latimer by Thomas Blinney, who accepted the new teaching. The text that was instrumental in bringing both of these men to the light was "This is a faithful saying and worthy of all acceptance, that Jesus Christ came into the world to save sinners of whom I am chief. The chairman, Mr. Garland Brooks, thanked the people of Zion Church and their pastor for their kind invitation to hold the Y. M. C. A. service there. The thanks of the committee are also extended to Prof. L. D. Thompson for arranging the musical programme and for his kind services all through the evening.

## ZION CHURCH

The morning sermon by the Minister was from II Cor. V, 16, and was a splendid exposition of this very difficult passage. The theme of the discourse was "The Christ of Experience." Yet now we know Him no more.

Mr. Fulton proposes to continue this subject next Sabbath; his theme will be "The Christ of History." An excellent Sabbath School and Bible Class attendance was noted, the number present exceeding 250. Great interest is evidently being taken in the Young Men's Bible Class, which is a new department and will be our third organized Bible Class. Their teacher is Mr. George W. McLeod.

At the evening service the Zion C. G. I. T. furnished the special music, and led the congregation in the praise service, and assisted the minister by reading the Scripture lesson and announcing the hymns. The evening offering was received by the Boy Scouts of the Church and was done in a very orderly manner. The 'Y' Service of Song was held in the Church Auditorium at 8.30 p. m.

At the morning service the adult choir rendered the anthem, "O Praise God in His Holiness," by Rev. Geo. Foster, and in the evening the girls of Zion C. G. I. T. occupied the choir loft and led the service of praise in a very capable and pleasing manner. The song "Sandown to the Londonderry Air" was rendered as a special number by Misses Elsie Warren, Alice Patricia, Margaret Ross, Freda MacMillan, Blanche Laferty and Lorraine Sampel.

At the close of the evening service the Y. M. C. A. held their service of

## Late Market News

(Canadian Press)

MONTREAL, Que., April 6.—Prices per pound. Arrivals during the week fluctuated more than usual on the 3,330 boxes. Owing to a demand dairy and produce markets here last for Ontario colored cheese advanced week. There were daily drops in but-19 1/2 cents to 19 1/4 cents per pound, ter prices and a slightly lower trend. The week's receipts were 247 boxes, to the egg market. Cheese, although one cent reduction in prices to retail-quiet, exhibited a firm tone. Newers were made by some dealers on maple syrup, owing to increasing ar-the local egg market. The action fol-owed to some scarcity here. Poultry cases. Potatoes advanced towards the toes advanced substantially in price country. The receipts were 15,548 owing to some scarcity here. Poultry cases. Potatoes advanced towards the toes advanced substantially in price country. The receipts were 15,548 owing to some scarcity here. Poultry cases. THE BIG CAKE prize will be awarded, the Indoor Circus tonight. 2893

AUCTION SALE of choice horses Tuesday morning at 11.30 sharp at the stables of Parker Horne, 106 Elm Avenue. No reserve. 2895-21

MUCH IMPROVED—Mrs. Bruce Muir, who has been seriously ill for the past ten days, was reported considerably better yesterday.

DONT FORGET—Attend the sale of horses on Tuesday, April 8th, at 11.30 a. m., at Parker Horne's Stables, 106 Elm Avenue. 2895-21

LENENT SERMONS—At the Church of the Most Holy Redeemer yesterday Rev. Father McCormick preached on the subject "The Seven Dolours of the Blessed Virgin Mary." The Benediction was pronounced also by Rev. Father McCormick, and music was rendered by the boys' choir. At St. Dunstan's Basilica the sermon was preached by Rev. Father McGuigan. Music was rendered by the Corpus Christi Choir.

## DUNCAN T. MACEWEN

In the passing of the late Duncan T. MacEwen which occurred on Mar. 16th, 1930, the community of New Dominion was called upon to surrender one of its best known and most highly respected citizens. Until the last two years he had enjoyed apparently good health, and had proved himself to be a very successful farmer. About two years ago his strength began to fail and soon he became confined to his bed. With patient forbearance he faced what proved to be a gradual weakening of the physical until the last thread of life was cut. Thus in his seventy-fifth year he peacefully closed the experience we call life. The late Mr. MacEwen was a man always found active in any work which was for the general welfare. He was interested in the building up of the community in which he lived and especially in the work of the church. He was a regular attendant of the United Church, and took a deep interest in all departments of her work.

The funeral service was conducted by his pastor, Rev. E. M. Atken, B. A. and the esteem in which he was held was evidenced by the large number who were present to pay their last tributes of respect and followed in the funeral cortege to the New Dominion cemetery where his body was laid to rest. The pallbearers were his five nephews, Messrs Gordon MacEwen, A. M. Wright, George Dixon, Robert Lowther, Clarence Murchison, together with Mr. Hector MacLean.

He leaves to mourn one daughter Mrs. A. MacDonald who was with him till the last; four sisters, Mrs. Hector Murchison, York Point, Mrs. George Wright, Montague, Mrs. Eleanor Bennett, Los Angeles, Calif., and Mrs. Hannah MacKenzie, Riverside, Calif.; and one brother, Mr. William MacEwen, New Dominion, together with a large number of relatives and friends.

The floral tributes were, Pillow-Daughter, Beesie; Crescents, Mrs. song in Zion Church, and the six girls of the C. G. I. T. above mentioned contributed "Sandown," and "Crossing the Bar." Zion male quartette also sang the favorite negro spiritual, "Goin' to shout all over God's Heaven."

Much praise is due Miss Frances Moore and Mrs. Jas. MacPadyen, leaders of the C. G. I. T. for the efficient way in which the girls conducted the musical part of the evening service.

North & Mary Lowther, Mr. & Mrs. J. L. Douglas, George Wright & Mrs. Wright; Sprays, Brother William & Family, Mrs. Hector Murchison & Family, Olive & Murial Lowther; Wreaths, Ladies Aid of West River United Church, New Dominion Women's Institute.

## TO PHOTOGRAPH TROPICAL FISH

BOSTON, April 6.—A motion picture studio in the heart of a submarine jungle with the myriads of tropical fish as actors is soon to be established by Mr. and Mrs. Arthur C. Pillsbury who will sail about the middle of May from San Francisco for the Fiji Islands.

The studio, probably the most remarkable that man has ever conceived, will have for its stage a bed of white coral, its scenery will be the gorgeous and fantastic plants which abound in tropical waters and the background will be a coral forest of every imaginable color. A battery of delicate and elaborately constructed cameras housed in special boxes, with remote controls for operation, will photograph the denizens of the deep, who, from the beginning of time have lived their lives far away from the prying eyes of mankind.

Sea-urchins of tremendous proportions, jelly fish that can shoot thousands of poisoned darts, hermit crabs and tropical starfish, the beautiful and spectacular sea-anemone which is an animal, not a flower, will all be "shot" by this scientist and his wife, clad in bathing suits plus diver's helmets and lead shoes, from a safe distance behind the cameras. Not only will every movement of the little characters be reproduced as the action takes place, but they will be photographed by the latest process of natural color photography in both still and motion pictures. Mr. Pillsbury expects the temperature of the water to be about 70 degrees and plans to stay below the surface about an hour at a time.

The man who is to undertake this assignment is considered one of the leading micro-photographers and pictorialists of the world. He is a former New England man, living in Medford, Mass., before moving to San Francisco. He began his career as a news photographer on the San Francisco Examiner at the time of the great earthquakes. He was the first man to fly through the Grand Canyon with a motion picture camera and during the last two years he has started the scientific world as well as the American public with his motion pictures of microscopic subjects hitherto unknown. Mr. Pillsbury is the first man to photograph successfully by X-rays the blooming of a rose, from bud to blossom; the knitting of a fractured bone in a rodent's leg, the pulsations of the corpuscles of blood and asp in a frog's foot and in an oak leaf respectively, and the fertilization of the protoplasm and nucleus of a grain of pollen at the very moment that the pollen germinates and life begins. His scenes are the first ever to be shown on a screen with a magnification of more than one hundred thousand times. A six foot man would appear to be 186 miles high if he were photographed and magnified on the same scale.

Mr. Pillsbury plans to bring some of the specimens to the surface for further study and for this purpose he has had constructed, out of optical glass, thirty aquariums ranging in size from four to six feet down to three to four inches. "One of the chief difficulties in using the portable aquariums on this expedition," Mr. Pillsbury stated, "will be to keep fresh salt water circulating through the tanks at all times and at the same temperature that exists below the surface of the sea. I have built a very elaborate thermostatic control, which, with a pumping control will, I believe, solve the difficulty."

The scientists will be able to show the living conditions of his subjects below the surface of the ocean by taking the pictures at the regular speed of sixteen pictures a second and by bringing the same specimens to the surface, in varying stages of age and development and placing them in aquariums, it will be possible

by the stop motion, or lapse of time method, to show the actual growth of the animal or plant from birth to death.

The photographic apparatus which Mr. Pillsbury plans to use under water will be encased in special boxes constructed of brass with optical glass windows. These boxes have been put through rigid tests to ensure their reliability. They were submerged in San Francisco harbor for twelve days under sixty pounds pressure and when taken out were found to be absolutely dry. He has also built a new type of tripod, weighing sixty-five pounds, out of monometal.

Pillsbury has no delusions concerning the dangers of this assignment. "If I should happen to step into the open shell of one of those tropical clams that are in some instances three feet across and weigh from 200 to 500 pounds, it would be all over, or again, if we should be interrupted by a pack of barracuda, who dash through the waters with jaws agape, it would be very discouraging." When questioned about the 200 pound clam, he said, "I have seen a photograph of one of the natives giving a baby a bath, and using one of the clam shells for a bath tub."

Many and varied forms of dangerous fish life abound in the waters which this scientist has chosen for his headquarters. Poisonous jelly fish of enormous breadth, a mere contact with which spells instant death, the stingaree, the octopus and the under-sea monster which can deal a paralyzing electric shock to anything caught within its hairy arms will form an ever constant menace to the plans and safety of Mr. and Mrs. Pillsbury. Too, the waters are infested with man eating sharks, but both the scientist and his wife feel that like the beasts of the wild land jungles they will not molest human beings if they are left alone, so, disregarding warnings from more timid scientists this naturalist will undertake his task with the feeling that he will be too busy taking pictures to worry about the danger involved.

## Spanish Trawler Is Out Of Danger

(Canadian Press)  
 HALIFAX, N. S., April 6.—The Spanish trawler Tramintana, reported in distress fifty miles south southwest of Sable Island Friday night, is now in no danger and is proceeding with her fishing, according to word received by C. H. Harvey, agent for Nova Scotia of the Marine and Fish-

Two other Spanish trawlers reported to S.O.S. from the Tramintana and stood by ready to offer any assistance possible.

**IMPERIAL COD OIL AND DOG BISCUIT**

IMPERIAL

Their Choice  
 A BALANCED RATION

"Best and Most Outstanding"

The Manager of one of the foremost Upper Canadian ranches writes us as follows:  
 "We would not think of using any other biscuit but IMPERIAL as we consider it the BEST AND MOST OUTSTANDING biscuit on the market today."

This is the consensus of opinion of our leading Canadian Fox Ranchers and accounts for the National use of IMPERIALS as an all-the-year-round Fox Food.

The cost of food is so small compared with the value of the Silver Foxes that ranchers consider it only a matter of good business common sense to feed the best which is always the most economical.

Do not experiment with cheaper foods. Feed IMPERIALS and get the best results in healthy foxes with highest quality pelts.

For sale by leading distributors or direct from the factory.
