

WAS VERY WEAK NERVOUS AND MELANCHOLY

Mrs. Geo. McKenzie, Campbellford Ont., writes:—"A short time ago I was troubled by a very bad headache and nervous, the cause of it, I think was my going through the change of life."

"I was very weak and melancholy and so nervous I could hardly bear to hear a clock ticking, and I did not sleep well."

"I was advised to try

so I sent at once for a box; took them and got an other, and before they were all gone I felt good, my nerves are fine, I do not mind any noise, and I can sleep well. I can not recommend them too highly to those suffering as I did."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The Land We Love

By Frank Yeigh

Dollier and Galinee

Q. Who were Dollier and Galinee?

A. Dollier and Galinee were two Frenchmen the first Europeans known to have ascended the Great Lakes to Sault Ste. Marie. Earthen mounds near Port Dover are the remains of their hut which they occupied during the winter of 1669-1700 and which was residence, chapel and fort. Seven other plucky Frenchmen formed their party and are entitled to fame as early pathfinders.

AN ATTIC SALT-SHAKER

By W. ORTON TEWSON. All Rights Reserved. Reproduction Prohibited

AS an alternative to the autograph album of tradition, Clare Sheridan, the painter-cum-sculptress, planted a "friendship garden" at her home in Sussex. Where she had as neighbours the Rudyard Kiplings.

"It seemed to me a living, colorful reminder of one's friend," says Mrs. Sheridan in her reminiscences: "Naked Truth."

The Public Forum

This column is open for the discussion by correspondents of questions of interest. The *Charlottetown Guardian* does not necessarily endorse the opinions of correspondents.

PEDLERS LICENSE

Sir,—The Saunders Government at the last session have had the Pedlers License Act amended as I understand on a graded basis. First, such persons as do not reside here as the cloth pedler, a license of \$200.00 per year. Second, those who import their goods as the Rawley men, \$50.00. Third, those who buy their goods from local dealers, \$20.00 per year or go from house to house taking orders. In other words, all persons who take orders for any kind of goods come under this statute, except farmers clubs. I have not read this act so I am not prepared to quote it accurately but the bill on first reading the fine was set at \$100.00. I am informed it is only \$40.00 for each offence. Sir, would it not be good business to have this act printed in the press also with a warning that all tax collectors be given instructions to hand in all names of those doing business as pedlers? Why should any private citizen be asked to notify the government of any violations of this act? Pedlers are not servants of any government but those who make up a government are the servants of the people. What are the present conditions on P. E. I.? Nothing short of a small army going through the country selling shoddy cloth, fire extinguishers, hooking machines and a dozen and one other lines, and not leaving a cent in any pocket in the country, even in many cases bunning their meals. Go to our orchards what will you find? In many cases the poorest scrub trees that can be found in any part of the world. The government needs funds and the business men have to pay the burden of the taxes whether his business is a tailor, blacksmith, or storekeeper. There are many poor mothers in the city of Charlottetown just able to get along from day to day working in tailor shops, and other mothers who have a small family and can not leave home on account of the wet toils, and they have to depend on the kind tailors sending an errand boy with the goods and after them. In the face of all this, the pedlers going from door to door selling inferior goods, not leaving one cent of revenue in this country. In the face of all this I ask all our Christian Societies, especially the Red Cross who have done so much for the children of P. E. I. to bring this very important industry to the notice of our Government heads that many poor homes are almost being run by the shoddy cloth pedler. The revenue derived from these pedlers last year was only \$240.00. I was shown a piece of cloth that a farmer paid \$15.00 for, and I can truthfully state it is not worth one quarter of it. What is going to be the outcome if our Premier and Attorney-General do not put the pedlers down here and fast on those pedlers who go around displaying false badges. The tailoring business will be a thing of the past and the poor mothers who are willing to work for a small fee if they can get the work will in many cases be a charge on the taxpayer. We hear almost every day some one appealing to the public for funds to help the poor. I think it would be a step in the right direction to protect our small industries such as the tailoring business that has been a friend to many a poor mother to feed and clothe her orphans. In concluding I will ask the heads of our orphanages to keep this important question in mind. If not ere long we will have many more such institutions. I would ask our government to borrow a leaf out of our neighbour's book across the border on protection.

I am, Sir, etc.

MERCHANT.

rette the Admiral, as the steward was offering the King cigars and cigarettes, recalled the royal preference saying, "don't hesitate to smoke your own, if you so prefer."

"If you will allow me, Admiral," said the King, "I will take one of my own."

THE steward then offered the tray to the Prince of Wales.

"What about you, young man?" said the Admiral addressing the Prince.

"The Prince smiled slightly," recalls Rodman, "and I noted my faux pas. I mean I said, 'The King and the Prince laughed audibly but very good naturedly, I still further qualified my speech by saying, "I should have said "Your Royal Highness."

"AT once to put me at my ease," the King said: "Well, after all, he is a fine young man, isn't he?"

"He certainly is," I said. "He's a peach."

"That seemed to be the last straw," chuckled the Admiral, for both the King and the Prince laughed outright. And the Prince is a peach—a fine young fellow and a jolly good chap."

HOW are these for salty yarns—told by Admiral Rodman:

An army quartermaster's safe was lost overboard at Zamboanga, Philippine Islands, in seventeen fathoms (16 feet) of water. A native Morya pearl diver, without apparatus of any kind, took the end of a manila rope and diving down, made it fast through the handles of the safe, thus making it possible to recover this valuable part of the quartermaster's equipment.

AT Hikueru, an atoll not far from Tahiti, a noted pearl diver in an official test recovered one-pound lead which he had thrown overboard in twenty fathoms (120 feet) of water, remaining under water one minute and fifty-seven seconds.

A YOUNG officer who had been celebrating shore leave in a foreign port was arrested and lodged in jail, charged with having tried to arrest a policeman. One of his shipmates rushed on board, evidently in the hope of enlisting assistance to get him freed. In the course of his efforts some one said: "Why didn't you bail him out?"

"Bail him out be damned," he said. "I didn't have any stomach-pump."

"You'll do, Admiral!"

A CLEVER Boston doctor who is very popular at social occasions discovered that at such times his lady patients are not above obtaining gratuitous medical advice from him, chuckles Edward W. Bok in "Perhaps I Am." On one such occasion when the doctor cheerfully greeted a certain lady at a musical with an inquiry as to how she was, she answered:

"Quite well, doctor, only, as you see from my red nose, I have a dreadful cold."

"So sorry," answered the physician, on the alert for the next move.

"Now, doctor, I know you are not supposed to practice when you are out socially, but would you just tell me, in a word, what is the best thing for a cold such as mine?"

"Surely," cheerfully answered the physician, as he started to move away. "I should recommend a handkerchief, madam, and if you find one is not enough, I would try two."

WHICH is on a par, (says Mr. Bok) with that excellent answer made by Judge Gary, of the Steel Trust, to a woman who took him aside at a dinner party, and said, almost in a whisper:

"Judge, would you mind telling me if you think steel stock is going up or down?"

"Certainly," replied the urban Judge. "I think it will, you see, madam, it rarely stands still, and it cannot very well go sideways."

Investment Council

Honest endeavour and careful study cannot of themselves appraise safely the real value of securities.

Advice based on our experience of judging investment values is offered without obligation alike to those who purchase in hundreds or thousands of dollars.

We would be glad to get an unbiased report, without charge, on any security an investor may be interested in and we would caution the Public against making an investment or speculation without first getting a report through a Banker or a reputable Investment Banking House, especially on the so-called **GIT RICH QUICK OFFERINGS**, where unscrupulous salesmen promise and in some cases guarantee, enormous profits in a short period of time.

Modern Etiquette

By ROBERTA LEE

Q. Does it show good taste to fold napkins in all kinds of intricate forms?

A. No, they should be folded square and placed on each plate. Napkins folded in intricate forms are considered to be boarding-house or hotel style.

Q. What is the first thing a bachelor should do if he desires to give a party or a reception?

A. He must first secure a matron of his acquaintance to act as chaperon for the affair.

Q. Is it ever permissible for a person to arrest the attention of an acquaintance by touching him?

A. No, it is sufficient to speak to him.

HOUSEHOLD SCRAP BOOK

Perspiring Hands

A remedy for perspiring hands is made of a tablespoonful of alum dissolved in a quart of water. Hold the hands in this solution for half an hour before going to bed every night, until relieved.

Grass Stains

Cover grass stains with lemon juice and salt and hold over a steaming kettle. Or rub lard on the spot, then wash with soap and cold water and rinse well.

Meat

Meat can be kept nice and fresh during the hot summer months by placing it in a bag of dry bran.

Organized Canadian Labor

CAN MUSTER 290,282 MEN

A RAPIDLY INCREASING FORCE

Historians

The ranks of Organized Labor have increased rapidly in Canada within the past few years, and at the rate now progressing will reach a figure that will show that they can be relied on to keep the country safe. In fact, they have well nearly doubled within the past five years.

It is admitted by the best statisticians that the departure of working-men from a town, city, or country sounds the death knell of progress and prosperity. On the other hand when the labor is prospering and contented it is the surest index of that the place they live in is marching onward and upward.

The statistics furnished below are evidence of growing strength and numbers—are more complete than have been collected from labor sources, and by men who are well informed and reliable. They therefore show that this portion of the country's population are facing in the right direction. All the provinces are represented and were as strong as we ought to be in manufacturing. Canada's population would be more satisfactorily, because many of those now classed as laborers would become merchants, traders and occupations.

We feel that these figures will be read with interest, therefore we submit them with renewed confidence to our country. They are as plain as ink and type can make them, and are as follows:

The 17th Annual Report on Labor Organizations in Canada, for the year 1927, which has just been published by the Department of Labor, discusses the various classes of labor bodies which make up the trade union movement of the Dominion, and which includes (1) local branches of international craft organizations having headquarters in the United States; (2) One Big Union, an international industrial union, with headquarters in Winnipeg; (3) local branches of the Industrial Workers of the World, a revolutionary industrial union which seeks to abolish the wage system, with headquarters in Chicago; (4) Canadian Central labor organizations; (5) independent trade union units, and (6) National and Catholic Unions.

The international craft union group, which consists of the Canadian members of 85 organizations, has 1,669 branches in the Dominion, with a combined membership of 180,755.

The One Big Union reported 50 local units, with a combined membership of 19,245.

The Industrial Workers of the World has seven local branches, with 4,400 members.

Canadian central organizations, which number 24, have 537 local branches, with a membership of 48,425.

The independent units number 37, the combined membership being 12,447.

There are 104 National and Catholic unions, with a membership of 25,000.

These figures indicate a net gain in branches of 89 and an increase in members of 15,978, making a grand total of 2,604 branches of all classes of unions in Canada, with a combined reported and estimated membership of 290,282.

The province of Ontario has 1,014 of the total of 2,604 local branch unions of all classes in the Dominion; Quebec is second with 476, and Alberta third with 263; British Columbia, 254; Saskatchewan, 184;

DR. PEARL'S CREDENTIALS

Sir,—My letter yesterday on the subject of Dr. Raymond Pearl's qualifications to speak as a scientist has had the "bluff" of the Patriot prohibition oracle and has caused him to turn a complete somersault. To the explicit charge in the article of June 7th, that Dr. Pearl had deliberately doctored the evidence he submitted on the subject of alcohol and longevity I replied by enumerating Dr. Pearl's attainments in the scientific world and asked if it was reasonable to suppose that a man of such international scientific reputation could be induced to prepare a "canned" article for the "Inquirer" press. In the article of the information given in my letter, the suggestion was obviously ridiculous; and so, since the facts given about Dr. Pearl are incontrovertible, there was but one decision for the Patriot writer to do. That was to withdraw his statement.

But this would mean an admission either that the "oracle" had been wrong in his estimate of Dr. Pearl or that he had himself deliberately misrepresented the facts.

Yesterday's Patriot came out with the surprising statement that there had been no attack made upon Dr. Pearl at all, and that I had "represented" the editorial of June 7th suggesting that it is hard to believe that such an extraordinary volteface could be made in the space of twenty-four hours, and this without the slightest apology or retraction; yet such is the case, as the following extracts prove:—

On June 8th, the Patriot stated: "The 'we' advocate reproduced from the Mail and Empire one of those specially prepared 'canned' articles attempting to prove that alcohol, moderately used, tends to prolong life. The foundation of this is a computation, made for the purpose,

Investigations Started on New Station

A Dominion Range Experiment Station comprising about 16,000 acres has been started under the direction of the Dominion Department of Agriculture Experimental Farms Branch. The station is located in the vicinity of Maryberry, Alberta, about 45 miles south of Medicine Hat.

The opening of this station marks the commencement of a new phase of agricultural research which will be under the direction of the Forage Plant and Field Husbandry Divisions of the Experimental Farms.

The object of the research work is to attempt to solve many of the problems confronting the farmer, who finds that his crops are not capable of carrying so formally. Forty-two projects will be started as quickly as circumstances permit.

The economic value of such work will not be immediately apparent, but if ways and means are ascertained of improving the quality of the range pastures, more animals will be able to be carried, and the output of meat, hides and wool will be improved.

The United States is engaged in similar work, while the Imperial Economic Committee of the Empire Marketing Board is using some of the funds devoted to Scientific Research, to pasture investigations at the Rowett Institute, Aberdeen.

Research is also being conducted in the highlands of Kenya, in New Zealand, and in Australia. The Imperial Economic Committee estimates that the grass lands of the Empire support 200,000,000 head of cattle and 200,000,000 sheep.

TORONTO, June 7.—With a farm population 2,000,000 less in 1924 than in 1919, and using less land, the farmers of the United States produced about one seventh more in the five years period up to 1925. The foundation of this is a computation, made for the purpose,

Your 25 Golden Years

"From an income-producing point of view, the average man's life is divided into three distinct periods. The first, from 20 to 30, is the period of preparation. The second, from 30 to 55, is the time of accumulation. The third, from 55 on, is the age of retirement."

This is an excerpt from the June issue of "INCOME," a bright little monthly publication which discusses financial and investment matters in an informative and entertaining manner. If you wish to receive it regularly, send us the coupon.

JOHNSTON AND WARD
McCurdy, Bldg., Halifax.
GUY E. LESLIE, Manager.

Please place my name on your list to receive "Income" regularly.
