POULTRY RAISING—A MOST PROFITABLE INDUSTRY.

It is only within recent years that Poultry Raising, as an industry, has assumed its full importance as one of the most profitable forms of husbandry.

That the people in general and farmers in particular should have, for so long, overlooked this immense field for profitable endeavour, can only be attributed to ignorance of its wonderful possibilities or a belief that Canadian climatic conditions were unfavorable to the establishment of successful Poultry Farms, without the expenditure of large sums of money.

When one considers the vast home market for Poultry and Eggs—which present supplies do not adequately meet—and the immense export fields in United States and Great Britain, it becomes a matter for wonder that the Canadian Farmers have not given more attention to its development.

The old haphazard methods of Poultry Raising with their uncertain results, have been succeeded by exact scientific knowledge which has elevated this industry to a plane of importance that can be measured only by the wonderful nature of results already achieved. The invention of the Incubator was the first step on the road to sure and scientific Poultry farming, but for many years afterwards results proved that it was merely in its experimental stage. At last, however, an Incubator has been devised which, experts in both Canada and the United States have proclaimed as perfection.

This incubator, fittingly called "The Peerless" is the invention of the Lee Manufacturing Co., Limited, of Pembroke, Ont., who have proved conclusively that even the most experienced persons can raise Poultry with profit by its use.

The "Peerless" is the perfected result of years of experimentation, and was subjected to the most exhaustive tests before its inventors were satisfied that at last an absolutely reliable Incubator had been produced. To make sure, doubly sure, the Lee Manufacturing Co., Limited, shipped one hundred "Peerless" Incubators to different parts of Canada in order to carry out stringent tests of its ability under the most extreme climatic conditions.

The triumph was a greater one than their most sanguine anticipations led them to expect—the "Peerless" had proven phenomenally successful in every single instance. What wonderful possibilities the "Peerless" Incubator offers to thousands in both city and country in the building of a successful career! How simply a profitable business may be created by even the most inexperienced in Poultry raising!—"The Peerless Way" is sure and reliable. Since the "Peerless" Incubator was placed on the market by the Lee Manufacturing Co., Limited, thousands have been quick to seize this opportunity to achieve a sure and comfortable income. But even if these thousands of Poultry Farmers were followed by tens of thousands, all raising poultry in full capacity, the supply would still fall short of the demand.

To the small farmers and urban dwellers of the cities the "Peerless" Incubator affords a reliable means for supplementing the income. The

occupation is a decidedly pleasant one and offers no difficulties to begethers. To aid purchasers of "Peerless" Incubators in obtaining the best possible results from the very start, a staff of Poultry experts is maintained by the Lee Manufacturing Co., Limited. These experts will advise, suggest and instruct those in doubt on any question regarding the successful raising of Poultry.

That even persons entirely unacquainted with Poultry, can with the aid of the "Peerless" obtain satisfactory results from the beginning, is a proven fact, voluntarily endorsed by hundreds of testimonials from enthusiastic users.

To those anxious to engage in a profitable industry the Lee Manufacturing Co., Limited, of Pembroke, Ont., will at all times be willing to provide the fullest information concerning the "Peerless" Incubator and the only perfectly successful methods of raising Poultry for profit.
