INQUEST Continued from page 1

like "Here goes." The suspicions of the witness were aroused when he saw that the tires were all right. The deceased appeared to be quite sober.

Dr. I. J. Yeo, sworn, stated that Walter Mutch, Southport, came to his office about 8.10 a.m., stating that a man had jumped over the bridge. They proceeded to the bridge. There was a man rowing a boat to the west of the bridge toward the Railway Wharf. In the rear of the boat there was a body huddled up. Witness took the car and drove to the Railway Wharf. The body had been landed on a steamer, and some officers were working on the body attempting to free the chest from water. The man was pulseless. As the water had been expelled from the lungs witness had the body re-bathed to a cabin. The heart was not beating. Members of the crew applied artificial respiration, but witness did not believe that it would have results. Dr. Seaman, who came about that time, concurred in the opinion that the man was dead.

Dr. Yeo supposed that the man fell about 25 feet. The force of his striking the water might stun him. There was considerable water in his lungs. He died of asphyxiation.

Dr. Ledwell, port physician, stated that he saw the deceased on the Brant. He had the appearance of a man who had been drowned. The Indian told him the story of picking up the man. The man died of asphyxiation. The reason that the man had not moved was doubtless on account of a spinal shock which would paralyze the nervous system, and render the man unconscious.

Walter Mutch, student at P. W. C., stated that as he was driving to college on his wheel a car followed slowly behind. The car had stopped on the bridge. Witness stopped to pick up his books. Mr. Brown called to the witness. He saw the body floating in the water. Witness called an Indian to get a boat and pick the man up. Witness got Doctor Yeo, and returned to the bridge, where he turned the car over to the doctor.

Michael Thomas, Indian, Southport, stated that he had begun to cross the bridge. Two men called him to get the boat. Witness saw a body in the water, he hastened to the boat and rowed out to the body. The body was about 200 yards from the bridge. Witness pulled the man out of the water, turned him over to get the water out of him, and rowed to the railway wharf. Witness landed him on the steamer Brant. The man showed no signs of life. He was face downward in the water. It would be ten to fifteen minutes before the witness reached the body. He had to row about 500 or 600 yards.

Dr. G. F. Dewar gave evidence as to the man's mental condition. Evidence was also given by Mr. W. L. Higgins.

Island bacon in thinly sliced strips put up in half-pound packages by Davis and Fraser is now ready for retail to the public. Prepared and delivered daily to the stores, Island bacon in this style should gain immediate favor among the people of the Province. Greatest care is exercised at the plant in the preparation of meat. Sanitary conditions are maintained at all times, and the plant is under the constant supervision of a government inspector. Meat of Island grown hogs is recognized to be of a quality equal to that of meat put up in any other place in Canada or elsewhere.

Put up in Cellophane wrappers, the bacon retains its delicious flavor for which Davis and Fraser meats are famed.

"Douglas' Egyptian Liniment is unrivalled for speedy relief in muscular rheumatism, lame back, inflammation, burns and felons.

Fish Valuable Article Of Food

The value of fish as food is seldom realized by most people, yet fish has a high place in the consideration of dietitians. It is important then that this article of food be carefully prepared.

At J. A. Lawson's Meat and Fish Market greatest care is exercised in the preparation of this food. Only the highest quality fish is sold. Mr. Lawson, a specialist, cuts the fish for sale ready to boil, bake or fry. Cod, haddock, fresh fillets, halibut, salmon and mackerel are available in their season.

High quality meat of all kinds is also sold from this market.

Reliance Means Dependability

Reliance means dependability, the greatest asset that any business can have. Not incorrectly named is the Reliance Garage, as many motorists will testify. This garage, which is located at 44 Grafton Street, is under the capable management of Mr. J. F. McGuigan, the proprietor. Repair work is done by an experienced staff of mechanics, who have in their work the advantage of the best available equipment. Prompt and efficient service is therefore the maxim of Reliance Garage Co. The new Weaver wheel Alliger is an important part of the equipment.

The Reliance Garage carries a full stock of accessories, and a line of Willard Storage Batteries. The company has the agency for Nash, Graham, Hudson, Essex, Oldsmobile, Hupmobile, Packard, and Geo cars.

Needless to say gasoline and motor oils of all brands are procurable at the Reliance Garage.

NURSES

Continued from page 1 from its doors, either rich or poor. Last year \$9,000 of work was done free in the hospital. This is done by the help of the community. The hospital rates in Prince Edward Island are lower than in any other province in Canada. The aim is now to build the most modern hospital possible. The report of the building committee will be presented at the annual meeting in two weeks time. The project will cost \$400,000, and will probably be increased to \$500,000. Both local political parties are sympathetic. The assistance of the whole public is also necessary.

The program of the evening has been put on by the Ladies' Aid to the Hospital. On behalf of the organization, the chairman thanked Governor Dalton for the interest shown. Dr. Houston's address showed an intimate knowledge of human nature. The chairman also thanked the people of St. Pauls Church for the use of the Hall, and the entertainers who contributed to the success of the program.

Lieutenant Governor Dalton in presenting the diplomas congratulated the nurses. Their success is the reward of hard work. The calling of the nurse is one of the greatest professions for the good of humanity. Nurses are trusted by the doctors, and by their cheerfulness they endear themselves to their patients. His Honour made reference to the new hospital to be built.

In addressing the graduating nurses, Dr. Houston first extended congratulations on behalf of the staff of the Hospital. Success has been achieved in spite of difficulties and many unpleasant duties. Many girls contemplating entering the nursing profession judge the work necessary from external appearances, neglecting to note the facts of long hours and trying ordeals. Physical fitness, adaptability, and a well balanced nervous system are qualifications which an applicant should possess.

In giving the nurses some helpful advice, Dr. Houston stated that each should have a dual aim, an immediate aim; something ahead to strive to reach. In connection with the first aim, Dr. Houston said "Always remember you are working with sick human beings, and not on mere interesting cases. There is a strong tendency nowadays to treat the case rather than the patient. The growing standardization of modern medicine with its lack of interest in the personal feelings of the patient is inclined to have that effect."

Dr. Houston's injunction was, "Always remember you are a woman first, and a nurse afterwards," "All things whatsoever ye would that men should do to you, do ye even so to them." In other words, nurse your patients as you would have a nurse look after you, if you were sick."

The importance of attending to small details to keep things running smoothly was next stressed by the doctor. A patient is not so much interested in a nurse's technical knowledge as she is in her attention to details which ensure comfort and ease. Rigid economy should be practised in the private home as far as practicable. Satisfaction to the patient

P.E.I. Presbytery In Session

The Presbytery of Prince Edward Island met in regular quarterly session at Zion Church hall yesterday morning and afternoon, there being present a large number both of clergymen and laymen.

An unanimous call was extended to Rev. Thomas A. Rodger, Belfast, from Knox Church, Calgary. After due consideration Rev. Mr. Rodger decided to accept the call. His work will terminate in his own congregation in the latter part of the summer.

Arrangements were made for the induction on May 25th of Rev. J. K. Fraser, D. D., recently of Renfrew, Ontario, to the Presbyterian Church at Alberton also for the designation on May 25th of Miss Elizabeth McDougall graduate deaconess at the Presbyterian Church, Wood Islands. Miss McDougall has been appointed to labour in the mining districts in the vicinity of Glace Bay.

The General Assembly asked for nominations for the position of Synodical Missionary for the Maritime Provinces. Two names were submitted to the Court, Rev. S. J. McArthur, of Moncton, and Rev. H. R. Staver, Hunter River. On a vote by ballot being taken it was found that the name of Mr. Staver prevailed and later Mr. Staver's nomination was made unanimous.

The nomination list opened in March for the Commissioners to the General Assembly, when Rev. Fred Williamson, Malpeque, and Rev. R. H. Staver were nominated, was completed yesterday by the appointing of the lay members of the commission, namely Messrs Thomas Ramsay, Kensington, with George Paynter, Free-town, as alternate and D. A. MacKinnon St. James church, Charlottetown with Murdoch Ross, Zion Church as alternate.

The Presbytery of Prince Edward Island is making application to the General Assembly for permission to receive Rev. M. E. Genge, D. D., a minister of the Christian Church, as a minister of the Presbyterian Church in Canada. The application was unanimously approved by the Presbytery and ordered to be sent on to the Assembly.

The Clerk gave a brief summing up of the statistical and financial report and also of the Sunday School and young people's report.

ent, and to the patient's friends, no matter how trying the latter may be, is the nurses' only legitimate means of advertising.

Industry, adaptability, and the power to assume responsibility effectively are the three qualities that are essential in the attaining of the ultimate aim, the making of a name in the chosen profession. Willingness to work is an essential to success. The nurse should always see a situation from the standpoint of others, and not fuss when she cannot have her own way.

"Earnest effort to measure up to the responsibilities that come all along the way, combined with industry and adaptability will do more to pave the way to better positions with greater responsibilities than any other thing. For instance, a nurse who can go into a house where an emergency operation has to be done, and inside of an hour or so, a room is fitted up into a temporary operating room: the surgeon finds that every little detail has been attended to, and all this was accomplished with little or no confusion. Such a nurse possesses a quality that can hardly be over estimated, and that is what I mean by the power to assume responsibility effectively.

"In conclusion I wish to remind you, that the Hospital expects something in return for the education and training so freely given you. They expect you to be not only a better citizen yourself, but that you will help to raise the standard of citizenship throughout our Province, because of that training. You have some knowledge of hygiene,—what it means to live good healthy, wholesome lives. You also had some instruction in preventive medicine, especially in reference to tuberculosis, while you were at the Sanatorium in St. John, and you also know something of child welfare,—How babies should be fed, etc. Surely there is a big opportunity for every nurse to disseminate this knowledge in the homes where they work. To be missionaries so to speak, and spread the good news of good health, thus raising the standard of citizenship in a very material way, namely, by helping to produce good healthy, strong manhood and womanhood in our land.

"May God bless you and prosper you is our earnest prayer."

"Persian Balm—Cool and refreshing. Soothing and protective. The perfect aid to beauty. Unrivalled in its softening and beautifying effect on the skin. Imparts a fresh and fragrant charm to the loveliest complexion. Banishes roughness caused by weather conditions. Safeguards the skin and keeps it smooth, soft and flawless. Use it for the hands and face. Always results in the highest expression of beauty.

Y. M. C. A.

Continued from page 1

Mon. \$1,000 additional must be acquired during the present campaign. The Ladies Auxiliary and the Y's Men's Club have been of great service during the year. A more extended report will appear later.

Mr. W. R. Cook, National Boys' Work Secretary, outlined the beginnings of the Y. M. C. A. and the work of the National Council in directing the efforts of local Association. Every four or five years a world convention is held. Such conventions will be held in Toronto and Cleveland. The latter will be of great assistance in the promotion of world peace. The Association has been a pioneering institution in boys' camps, and boys' work in general.

Mr. J. A. McMillan for the Physical Department reported ten gym classes going during the year with a much larger attendance than last year. Junior attendance was particularly increased. Handball, badminton, volleyball, and basketball were carried on as usual. Basketball was particularly successful. Three games were played with Mt. A., and the Abbie Sisters defeated Sussex and Moncton. Boxing and soft ball were also enjoyed.

Mr. J. A. McNair for the Games Committee reported that the addition of a fourth alley increased the patronage of and receipts from the bowling alleys. Fifteen leagues, with 55 teams, and an enrolment of 385 bowlers were active.

Mr. J. E. Harris for the House Committee reported that new B. C. fire ceilings were installed at a cost of \$350. A new alley, a check room and a canteen department were added. Painting and decorating were also carried on extensively. The sag in the gym floor was raised to the proper level.

Mr. C. J. McLean for the Boys' Work Committee, Regular gym classes for boys were conducted during nine months of the year. Educational lectures, illustrated travelogues, moving pictures were also given. The boys camps, hikes and outings, and the H-Y Club were also productive of good work.

For entertainment an orchestral selection was delivered by Miss Thelma Teed, Mr. Albert Dennis, and Mr. W. Fitzgerald. A solo was rendered by Mr. Allan Mosher.

Looking 'Em Over

(BY "TEC") BOXERS ALL SET

Carl Prowse and Bill Longaphie will do some light taping off today the final act of their conditioning for the big bout at the Lyceum Hall on Friday night. This battle, which has all indications of being one of the best ever to be staged between welterweights in this city, is being promoted in conjunction with the Garden City Circus, which is now running nightly. A good card of preliminaries is also being arranged. It may be mentioned that the nightly bouts which are now under way, is more or less of an elimination contest in order to produce good preliminary talent to the bigger bouts.

BAND EXPECTED The Legion Band, to which a percentage of the proceeds are donated is expected to be present on Friday night and will render some lively and up-to-date music during intervals. A packed house is anticipated.

NICKERSON LOST ON FOUL Last night's bout between Kid Nickerson and Young Burke resulted in a win for the former on a foul in the second round. Nickerson was boxing beautifully up to the fatal moment, when the low punch was called.

THE REWARD FOR BOOSTING SPORT The following from a New Glasgow Exchange, speaks for itself.—The Maritime Branch of the C. A. A. U. apparently does not realize the value of newspapers in the promotion of athletics. At the semi-annual meeting held in Amherst on Friday the suggestion that the usual sanction fee for road races be dropped in the future, was turned down. The feeling was that the papers sponsoring such events secured the desired publicity and thus should pay for same by turning over \$5.00 to the M. P. B. All of which is pure bunk. Take the Evening News races, for instance. This paper donates a beautiful silver cup each year for the race—a trophy that costs in the vicinity of \$35.00. Members of the staff confer with runners all over the Province; secure about a dozen medals and cups—for what? No revenue is secured. Everything is free gratis. The affair is merely an endeavor to increase the interest in running and to build up the athletic prowess of this Province. Still we must pay the M. P. B. A. U. of C. \$5.00 for the privilege of doing so. Not much of an incentive to boost amateur sport, eh? We might ask what the M. P. B. itself does in the same line of work? Does the Branch stage a track and field meet annually? Does it promote a ten-mile race or a full distance marathon? Not that we know of. This paper does not worry about the \$5.00 fee. It is the principle of the thing that gets under our skin. However, we came to the conclusion that amateur sport lost most of this essential a long, long time ago. I suppose we will have to kick in the "V" and forget all about it.

Like Winter sports football is not the menace to life and limb it may appear to be from a comfortable seat along the 50-yard line. Football, amazing as it may seem, is no more dangerous than bowling. Both sports account for only two per cent, each, of the accidents listed against athletics.

How anyone manages to become a casualty by bowling is another mystery that the statistical report leaves unsolved. Perhaps cracked ankles suffered by pin boys when the maples are flying are included.

The fine showing of football is a compliment to trainers and coaches on the condition of the athletes in their charge.

HORSEBACK RIDING Horseback riding accounts for six out of every 100 sport casualties. This figure is three times as large as that of football. Ten percent of the accidents are charged to picnics which show the hideous influence of indoor baseball and that other dangerous pastime—opening pickle jars.

Baseball, basketball, tennis and golf together account for 40 percent of sport accidents. Non-professional baseball accounts for 11 percent with basketball guilty of five percent.

Tennis and squash tennis, heretofore regarded as among the gentler recreations are also responsible for five percent of the mishaps. This rates tennis as tough a game as basketball. But tell a battered and bruised floor guard that!

All sports account for only one out of six accidents. Considering the number of sprained ankles, charley horses and fractured arms and shoulder blades that blossom yearly throughout sporadic this figure seems insignificant.

MONCTON READY A recent despatch says:—The back division of Moncton's new hockey club is now complete. Jimmy Foster, diminutive goal-keeper of the Winnipeg Elmwoods, arrived in the city this afternoon, and joined his mates of last year, Bill Gill and Len Burrage, who arrived yesterday. Two complete forward lines will arrive here tomorrow to round out what is hoped to be Moncton's first Allan Cup "threat" team. Monty Muckle, right winger, and "Duke" McDonald, centre, also of the Elmwood club, will be here tomorrow, along with "Red" Cook, Nor-
