HENDERSON & GUDMORE MEN'S WEAR

Finds Canadian Art Dynamic and Virile

VANCOUVER, Oct. 25.—"Nowhere in the world today is there a school of landscape painting to be compared with that in Canada. It is so dynamic, so virile and so related to background and environment," declared Mme. Jehanne Biety-Salinger of Toronto, well known Canadian art critic, in an address before the Women's Canadian Club here today.

"It is a sane art in Canada," asserted Mme. Biety-Salinger in opening a series of lectures throughout the Dominion on Canadian art. There was no eulogism nor futurism in art in this country, she said, but everything depicted by Canadian artists was related to environment and engendered by the creator's love of his country.

Distinctly Canadian art was found only among the English-speaking people of Canada, declared Mme. Biety-Salinger, who explained that other races in the Dominion had come to Canada with pre-conceived ideas and traditions, whereas those of the English tongue were practical first, and when leisure was gained turned to various schools for inspiration. But the result was a type expressive of Canada. Just now there was a pause in creative art in Canada, she said, artists not

feeling the inspiration strong enough within them to drive them to expression.

ST. PATRICK'S ROAD

Members of St. Patrick's Road Women's Institute met for their monthly meeting at the home of Mrs. Chas. Kneabone with an attendance of eleven members and six visitors. Meeting was opened by Victoria selections, followed by recitation of the Creed. Minutes of last meeting were read and signed. Roll call was answered by riddles. Report of committees were given and new ones appointed for next month. A contest was put on and won by Mrs. Jas. Myers. Meeting was brought to a close by National Anthem after which lunch was served and social hour spent. Next meeting at Mrs. Jno. Birt. Roll call answer to be "My most embarrassing moment."

Single Button Is Size Of Teacup Saucer

Flowers and buttons—Paris is going in for them in extremes! There is, for instance, the frock which features one single button as trimming on the bodice—the button itself is the size of a teacup saucer. Square buttons are seen, with two eyes. One color which is mentioned in buttons is porcelain blue as contrast.

Minard's Liniment eases Neuralgia.

CENTRAL GUARDIAN

CITY TAXES.—Monday, Oct. 31st, last day for 2% discount on City Taxes. 5734-10-29-31.

SEE "CHUCK" JEMMETT for gas and oil and car greasing. Battery service and anti-freeze—Opposite Guardian Office, Grafton St. 5767-10-31-31.

AUCTION FORTY-FIVES at Holy Name Club tonight. Good prizes. 5777-11.

POLICE COURT—At the Police Court Saturday morning one drunk was fined \$3.00 or five days.

WATER RATES—A few water takers have neglected to pay their rates for the current quarter. After Monday, the 31st, all unpaid services will be shut off without further notice. 5768-10-31-21.

WENT LIKE HOTCAKES—Following his usual practice Hon. Justice Arsenault of Prince Edward Island forwarded a barrel of the famous Malpeque oysters recently to Mr. C. K. Howard, convention manager of the C.N.R. at Montreal. The barrel was opened at the Queen's hotel and quickly disposed of by assembled members of the Tourist and Convention Bureau—Moncton Times.

LARGELY ATTENDED FUNERAL—The funeral of the late Mr. Eustace Heath Haviland was held Saturday afternoon and was largely attended. A short private service, conducted by Rev. H. D. Raymond at the late residence of the deceased on Upper Prince Street was followed by a public service in St. Paul's Church, conducted by Rev. H. D. Raymond and Canon E. M. Malone, who also conducted the service at the grave. Interment was at the St. Peter's Cemetery. The Honorary Pallbearers were: Mr. Justice Hazard, Messrs. H. W. Longworth, Robert N. Cox, H. J. Palmer, P. J. Oliver. The Active Pallbearers were: Messrs. W. A. Huettis, Edgar MacNutt, Murdoch Ross, James E. Harris, Samuel Tuplin, H. M. Simpson. The Mourners were: Messrs. Arthur G. Peake, Ernest DeB. Peake, George Peake, Arthur Peake, Leith E. Brecken, Charles Leigh, George D. DeBlais, Noel DeBlais, Robert L. Cotton, C. N. Bisset, James Peake, R. V. Longworth, Albert Leigh.

Opal-October's Birthston

If you seek the treasure That lies at the rainbow's end, The rain-bow hued opal Will luck to your venture lend.

The flaming colors of autumn are caught in October's birthstones, the opal and tourmaline. Both stones are remarkable for the gorgeous hues imprisoned in their hearts. A shower of brilliant fireworks pours forth from the opal while the tourmaline, not to be outdone, displays a bewildering array of contrasting colors, varying them from different angles.

PERSONALS

Mrs. Percy Dickson of Moncton is the guest of Dr. and Mrs. Dewar.

Mrs. Thos. Griffin left Saturday morning for Boston on a visit to friends.

Commander H. L. Leadman of the Hydrographic Survey steamer "Cartier" left Saturday morning for Ottawa.

M. and Mrs. W. D. Murphy, who have been spending the summer at their cottage in Southport, left Saturday morning on return to Boston.

Mrs. S. R. Jenkins, accompanied by Mr. Charles and the Misses Margaret and Helen left Saturday morning for Montreal where they will reside for the winter.

Mr. and Mrs. H. J. Gordon, of Saint Stephen, N. B., are coming to Charlottetown to take up residence within the near future. They will reside on Villa Avenue. Their daughter has been attending Prince of Wales College in Charlottetown during the past three years, and has made many friends.

BIRTHS

DOUCETTE—In the City Hospital, Oct. 17, 1932 to Mr. and Mrs. Wilfred Doucette, city, twin daughters.

CHISHOLM—In the City Hospital, Oct. 22, 1932, to Mr. and Mrs. Joseph Chisholm, city, a daughter.

BROWN—In the City Hospital, Oct. 22, 1932, to Mr. and Mrs. Alexander Brown, Vernon, a daughter.

GAUDET—In the City Hospital, Oct. 24, 1932, to Mr. and Mrs. Wilfred Gaudet, city, a son.

BISO—In the City Hospital, Oct. 24, 1932, to Mr. and Mrs. Peter Biso, city, a daughter.

GALLANT—In the City Hospital, Oct. 28, 1932, to Mr. and Mrs. Jerome Gallant, city, a daughter.

N. D. MacLean UNDERTAKER EMBLIMER Charlottetown and North West Side Phone 149

Trinity United Church MONDAY

3.30—Intermediate G. G. I. T. regular meeting—Social Hall.

7.00—Trail Rangers, regular meeting—Social Hall.

7.30—Willing Circle of King's Daughters, regular monthly meeting—Ladies' Parlour.

The many friends of Trainman Earl B. McLean of the C. N. R. will regret to learn he has entered the City Hospital for treatment.

Dr. Bruce M. Bigelow and Mrs. Bigelow, of Providence, R.I., have arrived in Charlottetown by way of Detroit from Montreal. Dr. Bigelow is a graduate of Harvard and was on the faculty of the Mass. Institute of Technology for some time. At present he is Director of Admissions at Brown University, Providence. His mother, Mrs. E. D. Bigelow, formerly Miss Ina MacMillan of Charlottetown, who has been visiting relatives here will return to Providence with Dr. and Mrs. Bigelow.

Opal-October's Birthston

If you seek the treasure That lies at the rainbow's end, The rain-bow hued opal Will luck to your venture lend.

The flaming colors of autumn are caught in October's birthstones, the opal and tourmaline. Both stones are remarkable for the gorgeous hues imprisoned in their hearts. A shower of brilliant fireworks pours forth from the opal while the tourmaline, not to be outdone, displays a bewildering array of contrasting colors, varying them from different angles.

The opal has ceased to be feared as an omen of ill-luck. That so unwarranted a superstition should ever have become fastened upon the lovely stone, which for centuries has been prized as a good-luck charm, is deeply regretted by all lovers of this exquisite gem. The superstition is of comparatively recent origin; it is thought to have been engendered by the wide reading of Sir Walter Scott's popular "Anne of Geierstein," an imaginative tale of an unfortunate enchanted heroine who happened to wear a huge opal in her hair. The October-born have the selection of the gardenia or the orchid as their natal flower.

Ankle-Length Gowns For Dinner Wear

A new sleeved dinner gown—willowy and worldly—has made its debut with the winter fashions of 1932.

While arms are covered, however, ankles often are revealed and slit skirts slashed in six or eight places are sometimes part of the design. Hemlines vary from floor length to five inches from the ground, waists are slender, and the simplicity of the silhouette is more sophisticated than the most elaborately trimmed frock.

Sleeves Vary

The sleeves in these new evening models vary widely in design. Sometimes they are elbow-length puffed affairs, again they sweep to the wrist and again they are only abbreviated capes. This general effect, however, is to offer contrast to the décolleté of the evening mode.

Velvets are among the favorite fabrics for the new dinner frocks. A violet velvet gown is designed with a dropped shoulder line, elbow-length puffed sleeves and a back décolleté slashed twice to the waist, while a blue and black stripe velvet is fashioned on the Princess silhouette with a broadened shoulder line.

Loos And Pebbled Crepes

Loos and pebbled crepes have stepped into the limelight, too. One designer offers a black crepe (waxed) lace with a yoke and upper sleeves of shell pink chiffon topped by a little black lace bolero as the essence of sophistication in dinner wear, while another shows a heanna tone pebbled crepe, the slender silhouette of which is topped by a brief matching jacket with elbow-length puffed sleeves.

For the woman who wants something different there are scores of interesting designs. A geranium-tinted crepe concentrates its interest on swooping bishop sleeves, a black chiffon is finished with short sleeves edged in black coq feathers, while a turquoise tulle silk has a black décolleté laced with dark brown velvet.

Green has become extremely popular with the housewife during the past year, according to reports of manufacturers of home furnishings and equipment. In the kitchen, especially, does green come to the fore, with linoleum, gas stoves and the handles of cooking utensils predominately in green.

CHANGE OF SEX IN OYSTERS ON ATLANTIC COAST

Curious Fact Demonstrated At P. E. I. Marine Station of Biological Board

(Dr. A. B. Needler, in Atlantic Biological Station Circular)

In the common American Atlantic oyster, Ostrea virginica, it has been assumed until recently that the two sexes were quite distinct. In some other oysters, found in various parts of the world it is known that the individuals may function at one time as males and at another as females—a phenomenon known as "sex reversal". For instance in the common English oyster, Ostrea edulis, each oyster apparently alternates between male and female phases throughout its life. Recently it has been shown that the American Atlantic oyster of commerce is also capable of changing its sex.

The fact that this oyster can change sex has been demonstrated with certainty at the Prince Edward Island Marine Station of the Biological Board of Canada by keeping marked oysters of known sex from one year to the next. Of 100 marked in 1930, and 200 marked in 1931, 63 survived for a year, and it proved possible to determine the sex of 36 of these, with results as follows:

Of 24 males, 5 were females in the following year, while the remainder had not changed their sex.

Of 12 females, 5 were males in the following year, while the remainder had not changed their sex.

But these oysters were not kept under conditions as favourable as those prevailing in nature. To get an indication of what changes of sex normally take place some thousands of oysters from various grounds, in Bidsford river Malpeque bay, have been examined since the spring of 1930, together with a few from Connecticut and Long Island (kindly supplied by Mr. J. B. Giancy of the N.Y. Biological Station of the Oyster Growers and Dealers Association of North America). In the case of each oyster a record was kept of the size, age and sex. Some were from beds that had been cleaned and planted with spat so that the age was known, while in others the age was estimated by examining the zones on the shell. It was thus possible to compare proportions of the sexes in population of oysters from various localities and of various ages.

Conclusion

As a result of these investigations the following conclusions were reached. The majority of oysters in any one population mature first as males and later change to females. They may again return to the male sex, but the general tendency is for most of the younger oysters to be male and most of the older ones female. The bigger an oyster is for the first winter of its life the more likely it is to be mature in the next spawning season and to produce eggs rather than sperms (though it is much more likely to produce sperms than eggs when only one year old). Thus the females at first tends to be larger than the males at the same age, and continue to be so until they have reached their fourth summer, after which the advantage is somewhat lost. In accord with this tendency of the oysters that are growing best to reach the female phase first, is the fact that the higher the average temperature of the water over the bed from which the oysters are taken, the greater the proportion of females to males at any given age. This is simply due to the oysters growing faster in the warmer water and the temperature factor may be counteracted by some other factor such as over-crowding, which will work in the opposite direction. In other words the onset of the female phase is hastened by a favourable environment.

A few oysters (1% or less) were found which were definitely hermaphrodite, that is to say, mature male and female products were present in the same animal at the same time. It was shown experimentally that self-fertilization is possible in these hermaphrodites and it is believed that it may sometimes take place in nature, but it is unlikely that self-fertilization is normal. It is probable that the eggs do not begin to develop until the sperms have been extruded or vice versa, and that a winter usually intervenes between one sexual phase and the next.

The experiments with marked oysters showed that our oysters

Important Case In Probate Court

Last week in the Probate Court a caveat was filed before Judge H. L. Palmer against the will of Charlotte Elizabeth Dower by George J. Tweedy, acting for the executors under a former will, also by R. N. MacNeill, acting for the trustees of the Prince Edward Island Hospital, a beneficiary also under the former will.

Messrs Tweedy and MacNeill are asking the executors of the second will to prove it in solemn form, alleging that undue influence had been used.

The deceased, who was housekeeper for many years for the late James Farquharson, of Mermaid, had no immediate relatives on the Island. She died on July 23rd, 1932.

In her first will, dated December 1st, 1931, she made the following bequests: Matilda Gay, Mermaid, \$200; Mrs. George Robinson, Belfast, \$200; Albert Farquharson, Mermaid, \$200; Lila Maud Wood, Sherwood, \$1,000; Church of Scotland, Mermaid, \$500; P. E. I. Protestant Orphanage, \$500. The residue of the estate, amounting to more than \$2,000, was bequeathed to the Prince Edward Island Hospital. This will was filed July 26th, 1932 by George J. Tweedy and John I. Wood, executors.

In the second will, dated July 16th, 1932, the following bequests were made: Church of Scotland, \$500; Protestant Orphanage, \$500; Zion Presbyterian Church, \$2,000. (to be used as the Session and Trustees may determine); Margaret Robinson (Mrs. George Robinson), Belfast, \$200; John Wood, \$200, and his daughter, Lila Maud, Wood, Sherwood, \$600; Mr. and Mrs. Albert Farquharson, \$400; Mrs. William MacNaughton Charlottetown, \$2,000; Rev. G. C. Webster, \$2,000; Cyrus MacDonald, Mermaid, \$200; Joseph Power, Mermaid, \$200. The session of Zion Church \$1,000 for the education of young people for the ministry. Deceased's house on Passmore Street, Charlottetown, is left in trust to Violet Matilda Gay for the lifetime, and at her death the property is to be sold and the proceeds together with the residue of the estate, used by her executor for such charitable purposes as deemed advisable. There is also a bequest for a gravestone for the late James Farquharson and some minor bequests. The second will was filed July 27th, 1932. Rev. G. C. Webster, being executor.

The case opened before Judge Palmer on Monday, and after evidence was heard was adjourned until Thursday when the executors completed their case. Donald MacKinnon, K. C., and A. A. MacLean, K. C., appeared on behalf of the executor, Mr. Webster.

The case was then adjourned until those interested under the first will may determine what action they will take.

R. O. P. ENTRIES ARE UP

A statement issued by the Poultry Division of the Dominion Live Stock Branch shows that the number of entries in Record of Performance of poultry for the 1932-33 record year show a gain of 26 breeders and 4,455 birds over the number of entries received on the same date (October 1st) last year. One of the principal reasons for this gain undoubtedly is the greater opportunity for benefit to the breeder entered under R. O. P. through the sale of male birds under the federal policy of Cockerel Distribution.

can change their sex from male to female or from female to male. The determinations of the sex of oysters growing under natural conditions showed that they usually mature first as males and that the proportion of females increases at greater ages. In these characteristics our oysters are similar to the English native oysters, but they differ from the latter in that, whereas the English oysters may change their sex more than once in a year, in our oysters a winter usually intervenes between one sexual phase and the next.

From the point of view of oyster culture the above findings have significance. If a new area is being stocked, large oysters should not be planted exclusively, for these will tend to be almost all female and there may not be enough males to fertilize the eggs, so that very few larvae will be produced. If the bed is planted with oysters of various ages there will probably be a suitable proportion of the sexes. Again all will be well if the bed is planted with spat. In the first spawning season only a few of the oysters will produce eggs but next year a larger proportion of the oysters will be female, and from then on a fair production of larvae may be expected if other conditions are good, for, as a greater and greater number of the original oysters become female, young males will be developing to fertilize the eggs.

ANNOUNCEMENT ANNUAL COLLECTION FOR PROTESTANT ORPHANAGE OPENS MONDAY, NOVEMBER 7th. 5803-10-24-mwf-61.

RELIGIOUS SERVICES

ST. PETER'S CATHEDRAL

At the 11 o'clock choral Eucharist in St. Peter's Cathedral yesterday the Rev. Canon Malone preached a most interesting and instructive sermon on the Oxford Movement of 1833, which movement restored to the Church of England more fully Catholic practices which for a few centuries had in part been neglected. The centenary of the movement will be observed by the Church of England in July next. The Archbishops of Canterbury and York are sitting on the committee which is making the arrangements for the celebration.

At the evening service Canon Malone preached from the words, "Without Me ye can do nothing." Next Tuesday is All Saints Day and there will be a choral celebration of the Holy Eucharist in St. Peter's at 7.30 in the morning and the office for the dead will be sung in the evening at 7.30.

For some years on Armistice Day the Holy Eucharist has been celebrated with special intention for those who fell in the Great War. This year the service will be held at 8.30 a. m. on Remembrance Day, when it is expected a large congregation will be present to remember before God the sacrifices made during the Great War and to give thanks for the blessings of peace.

THE BAPTIST CHURCH

The Rev. A. C. Vincent continued an interesting series of sermons on the Fruits of the Abiding Life, taking as his morning theme, The Abiding Life and Fullness of Joy: St. John 15:11, "These things have I spoken unto you that your joy may be in you and that your joy may be full." The life abiding in Christ, has as one of its gifts the fullness of joy, experienced through a conviction of oneness with God, through a glad sense of victory, through the confidence of a useful apostleship.

The large congregation of the evening heard with great interest the second of a series of sermons by Dr. Vincent on "The Message of the Whirlwind." The thought of last evening's discourse was whirlwind answers the questions of man.

BOLD KIDNAPPING OF LOS ANGELES CHILD

LOS ANGELES, Oct. 29.—The bold kidnaping of Nancy Ruth Buchanan, chubby, blonde-haired girl of three, from her nursery crib in a residence in the fashionable Wilshire residence, filled with guests at the time, presented police with a double mystery today as they learned of the disappearance of the child's mother, Ruth Borman, 17.

Several hours after the abduction of the child, foster daughter of Mrs. Violet C. Buchanan, whose efforts to adopt the little girl had been opposed by Mrs. Borman, police located the residence in San Fernando where the mother had been living and were told of her disappearance.

Mrs. Jack McBride, with whom Mrs. Borman had resided, said she saw her last about noon Tuesday, when she left the house suddenly without her coat or hat. She was unable to offer any explanation.

The kidnaping, occurred about six weeks after Mrs. Buchanan had received two notes in which extortionists attempted to frighten her into payment of \$12,500 by threatening to abduct the girl.

Although Mrs. Buchanan was absent from her home at the time of the kidnaping, four guests, three men and a woman, were in a room adjoining the nursery, but neither she nor the men heard any disturbance, they told the police.

The crime was discovered by the child's nurse when she entered the nursery to awaken the little girl from a nap.

ST. PAUL'S CHURCH

St. Paul in his first letter to his converts at Corinth wrote that the preaching of the Cross to those who are perishing is foolishness but to those who are being saved it is the power of God. On these thoughts the Rector preached a splendid sermon at the morning worship yesterday. He said what is the central point of the Christian faith. St. Paul says the Cross. The doctrine of Christ's divinity, His birth,

His resurrection, His glorified humanity are all important points but after consideration we conclude St. Paul was correct in saying the Cross is the very centre. We are reminded continually of what the Cross means to us all. It is the Cross that counts, not petty divisions or doctrines. St. Paul divides humanity up into two classes those who are perishing and those who are being saved. God's salvation brings healing from the disease of sin and gives riches of health in body and soul. We cannot stand still, either we are allowing ourselves to fall back, or on Christianity is progressing. We must look into our lives, and come to the foot of the Cross seeking the power of God that will enable us to continue on the new highway. His salvation has set our feet on. During the offertory the choir rendered very effectively Frank Schubert's, "Come Unto Me" solo parts being taken by Mrs. Francis Holt Trainor. In the evening they rendered "Sun of My Soul, Thou Saviour Dear," the soloist being Mrs. E. W. MacKinnon. The hymn for the day included some of the old favorites, "Who is on the Lord's Side," "There Were Ninety and Nine" and "What a Friend We Have in Jesus."

The speaker at the evening service was the Rev. J. N. Blodgett B. A. of Wycliffe College, Toronto. Taking as his text, "We then as workers together with Him," said it is a source of inspiration to every Christian worker to know he is working with Christ. St. Paul saw in Christ everything, salvation, hope, everlasting life and that through Him we might be reconciled to God.

God needs our help to carry out His great plan of reconciliation bringing mankind back to Him. It is a privilege and a glorious thing to be one of this great company working effectively for the cause of the partnership. Whether our task is small or large we have cause to be thankful that we are co-workers with Him.

Tuesday, All Saints Day will be observed in St. Paul's Church by a celebration of the Holy Communion at 10.30 a. m.

CERTIFIED SEED COBBLER POTATOES

We will be buying until Nov. 5th, delivery must be made on or before that date. Call and get what bags you require.
