Magnesia Best For Your Indigestion

Warns Against Doping Stomach With Artificial Digestents

Most people who suffer, either occasionally or chronically from gas, sourness and indigestion, have now discontinued disagreeable diets, patent foods and the use of harmful drugs, stomach tonics, medicines and artificial digestents and instead, following the advice so often given in these columns, take a teaspoonful or two tablets of Bisurated Magnesia in a little water after meals with the result that their stomach no longer troubles them, they are able to eat as they please and they enjoy much better health. Those who use Bisurated Magnesia never dread the approach of meal time because they know this wonderful anti-acid and food corrective, which can be obtained from any good drug store will instantly neutralize the stomach acidity, sweeten the stomach, prevent food fermentation, and without the slightest pain or discomfort. Try this plan yourself, but be certain to get pure Bisurated Magnesia especially prepared for stomach use.

TO TEACH HISTORY IN NEW FASHION

PEMBROKE, Ont., Sept. 29. — "Due emphasis has never been laid on citizenship," said Premier G. Howard Ferguson at the opening of the new college institute in Pembroke this afternoon.

"The pupil should be taught that the basic underlying principle, and the guarantee of individual freedom is British citizenship. The most uninteresting book in the curriculum to-day is the British and Canadian history. Instead of the present day teaching of history, I am going to endeavour to change this and see that history is taught by biographical accounts of men. The history that should be taught is the life and actions of such men as Howe and Archibald and the teacher should spend an hour every day with the pupils in this manner.

"Fo instance the history of the school in Pembroke dates back to the thirties when the late Lieut-Col. Peter White got the first school house for Pembroke. Yet how many of the townspeople know this."

MAGGIE'LL BE MAD AS SHE READS THIS

LONDON, Sept. 29. — A bright looking lad of fourteen or so was walking across the rich lawns of Queen's Park, accompanied by a splendid specimen of an English bulldog. There was something strangely familiar about the expression on the dog's face.

"What's your friend's name?" asked an interested animal lover, as he met the boy and his pet. "Jiggs, sir," was the proud and smiling response. The resemblance was uncanny! "Of course it is," laughed the questioner, "I ought to have known that, you named him so on account of the striking family likeness, I suppose?"

"Oh, no, sir," was the lad's response, "he used to be called 'sport', but he's awfully fond of dad, and most every evening he runs down to the street car stop to meet him when he comes hame from business. The rest of us used to laugh and say that Sport was 'bringing up father,' and after a while why we just naturally started to call him 'Jiggs.'"

A verdict of accidental death was returned.

Choose Your "B" Batteries Correctly

THE life of your "B" batteries depends on their size in relation to your set and on how long you listen in each day. Here are the simple rules which tell the right size "B" battery to use.

On 1 to 3 tubes — Use Eveready No. 772.

On 4 or more tubes — Use the Heavy Duty "B" battery No. 770.

On all but single tube sets — Use a "C" battery.

When these rules are followed, the No. 772 will last for almost a year, and the No. 770 for about eight months, when listening at the year round average of two hours a day.

NOTE: An Eveready "C" Battery not only increases the life of the "B" batteries, but adds a quality of reproduction unobtainable without it.
