FIGHTING THE FLY.

There has been a deal of vague talk about the menace to health in the prevalence of the common house-fly. It requires, however, something more than generalities to arouse an antipathy toward this familiar nuisance. The requisite incitement to a crusade of extermination appears to be contained in the following "fly catechism," which is being distributed among the school children of North Carolina.

- 1. Where is the fly born? In manure and filth.
2. Where does the fly live? In every kind of filth.
3. Is anything too filthy for the fly to eat? No.
4. (a) Where does he go when he leaves the vault and the manure pile and the spittoon? Into the kitchen and dining room. (b) What does he do there? He walks on the bread, fruit and vegetables; he wipes his feet on the butter and bathes in the buttermilk.
5. Does the fly visit the patient

Minard's Liniment Co., Limited, Yarmouth, N. S.

Gentlemen,—In January last, Francis Leclaire, one of the men employed by me, working in the lumber woods, had a tree fall on him, crushing him fearfully. He was, when found, placed on a sled and taken home, where grave fears were entertained for his recovery, his hips being badly bruised and his body turned black from his ribs to his feet. We used MINARD'S LINIMENT on him freely to deaden the pain and with the use of three bottles he was completely cured and able to return to his work.

South Side Queen Square

sick with consumption, typhoid fever and cholera infantum? He does—and may call on you next.

- 6. Is the fly dangerous? He is man's worst pest, and more dangerous than wild beasts or rattlesnakes.
7. What diseases does the fly carry? He carries typhoid fever, tuberculosis and summer complaint. How? On his wings and hairy feet. What is his correct name? Typhoid fly.

- 10. Where are the most flies? Where there is the most filth.
11. Why should we kill the fly? Because he may kill us.
12. How shall we kill the fly? (a) you cannot remove, call the office of the Board of Health, and ask for relief before you are stricken with disease and, perhaps death.
13. Kill the fly in any way, but kill the fly.
14. If there is filth anywhere that you cannot remove, call the office of the Board of Health, and ask for relief before you are stricken with disease and, perhaps death.
