Coral and Kindness

Queen Helena of Italy has set a new fashion in Rome. For the last few years the coral fishermen of Torre del Greco, near Naples, have had bad times. No one wanted the red stone of the seas. They appealed to the Queen, and the consequence was that at a Court ball at the Quirinal, instead of the magnificent pearl necklace which she usually wears, Queen Helena wore round her neck six rows of coral, and her beautiful hair was crowned with a diadem of diamonds and coral. Coral at once became the fashion. Old coral ornaments that have slumbered for years in their cases are being furbished up, and the jewellers are being besieged with orders for the blood-red stones. Queen Helena's kindness has succeeded, and the fishermen of Torre del Greco are happy again.

Invention of Waterproofs

One Thomas Fearnley Wiley, of Bedford, took out a patent 25 years ago for a waterproofing process known as "cravenette," which he evolved quite by accident. It so happened that some material had been badly, or wrongly, dyed, and he directed his men to wash out the surplus color with alum. This was done, with the result that the material was so vastly improved that another alum wash was ordered. The cloth was then sent to the wetting machine, but it was found that the material, though passed through the water, came out dry! And that is how the discovery that cloth can be rendered waterproof and yet remain porous was made.

Salt Bed In the West

The discovery is reported of an extensive salt bed at Kwinitsa, Mile 45 on the main line of the Grand Trunk Pacific east of Prince Rupert. The importance of this find lies in the fact that about the only other deposits of commercial value in Canada are situated in Ontario at Kincardine, Goderich, Windsor, Parkhill and on Lake Huron so that, so far as the western Provinces are concerned British Columbia may be the distributing centre for this essential of the culinary art

To Save Fenceposts

A new bulletin is now available at the Forestry Branch, Ottawa, describing some simple and inexpensive methods of preserving fenceposts from decay. It has been found that the generous application of hot creosote to well-seasoned posts stripped of bark, even when only painted on with a brush, will add at least ten years to the life of the least durable woods. Many common Canadian woods which hitherto decayed too rapidly to be so used are thus made available for fenceposts. The saving in first cost and transportation more than balances the cost of treatment, while the cost of placing the post will be much less when considered as an annual charge.

Tatooed by Insects

Commander Herbert A. Edwards, who was lent by the British Government to direct the Survey Commission, has completed a survey of 300 miles of disputed frontier between Bolivia and Brazil. The expedition suffered great hardships.

A tiny insect known as plum settled in thousands on every exposed portion, injecting a poison which, though not dangerous, occasioned intense pain and gave the explorers the appearance of having been tattooed.

Insects of every description made life almost unbearable, among these being a hornet measuring almost an inch and a half in length, and a spider whose body was three to four inches in circumference, and which left an angry red trail over the flesh.

World's Smallest Coin

The smallest coin in the world circulates in the Malay Peninsula. It is simply a thin wafer made from the resinous juice of a tree, and has current value of 1-10,000 of a penny. In the southern parts of Russia the peasants use a coin of such small value that a quarter of a million of them are worth no more than $1.25. The old Japanese mouseng was worth 1-224 of an English penny. In Portugal the reis is the lowest standard of value, but no 1-reis pieces are coined. An 8-reis piece is equivalent to 6-100 of a cent.

Forests Are Valuable

The forests of Corsica, the little island upon which Napoleon was born, are managed by the French government. They produce lumber, firewood, and turpentine, and all parts of the tree are far more closely utilized than in America.

When through old age the bodily functions become sluggish,

Na-Dru-Co Laxatives give gentle, timely and effective aid, without discomfort or distress.

NOTICE

THE FIRST OF MAY J. J. Gay & Son, will again presume business in the Charlottetown market, at the old stand, which has been thoroughly renovated.

They have not been hibernating this past winter like bruin as many may think, but have been very busy preparing for Spring business, and have even now hundreds of thousands of plants starting up, many thousands of celery, tomato, cauliflower, cabbage, lettuce, peeping above ground, and in different stages of growth. Also innumerable quantities of bedding flower plants being forced for the spring trade.

There is not a doubt but they are in a better position than ever before to supply the wants of the public in their line of trade.

They would remind the public, (farmers in particular) that they will have as usual vegetables seeds, the kind they plant themselves, including parsnip, carrot and beet.

Farmers are finding these last named vegetables more profitable every year, and many acres are being annually planted for shipping purposes. Be sure to buy their seeds and secure results.

J. J. GAY & SON,
Charlottetown, P. E. I.

"And remember, John use nothing but **Brandram's B.B. Genuine White Lead** on that job."

Brandram's B. B. Genuine White Lead is the one safe white lead to use because it is corroded by the famous Brandram process, which makes it penetrate further into the wood on account of its wonderful smoothness and fineness. It can be depended upon to protect the wood longer against deterioration than lead made by any other process.

Brandram's B. B. Genuine White Lead has for over 100 years been accepted as the standard of values in white lead. If the world's verdict of superior quality is good enough for you, buy Brandram's.

Write for booklet, or ask your dealer.

Permanent Silver Foxes
Limited

Motto: Permanency. Aim: To produce the highest grade of Silver Fox pelts

High Class Foxes at $18,000 a pair.

This company has gone ahead so rapidly that its first general meeting was held on April 17th inst; its permanent officers are now elected and certificates of stock are being issued.

The Demand for this Stock is Steadily Growing

Unsolicited Subscriptions in large amounts have been received, some of them even from the Pacific Coast.

This shows that men of judgment and means are noticing the peculiar

Excellence, Worth and Promise

of this **Genuine Fox Breeders' Proposition.**

Why the Permanent is a 1915 Proposition

To build on a solid foundation in fox breeding the pups must be selected in infancy from the highest grade of Breeders. These breeders the owners will not sell at any price.

Therefore the only way for a new company that goes in for breeding and not for promoting, is to buy their breeding stock in advance so that in the future they will rank as producers of the highest grade of silver fox pelts. This is the line that the Permanent has adopted to carry out its motto and its aim.

They have thus prepared to have a ranch of foxes without a bar or reproach and unexcelled in this province or elsewhere.

Owing to its moderate capitalization and the quality of its stock the Permanent is entitled to claim that **by 1916 more money will have been returned in dividends to the investor by it than by any of the very highly capitalized companies that promise a dividend in 1914, and the beauty of it is that the dividend will always continue higher and will last longer because the stock is young.**

Applications for stock in this high class company may be addressed to any of the following:—

Alexander Ross, M. D., Charlottetown, Pres.
Col. C. S. Emery, New Port Vt. Vice-Pres.
Benjamin Rogers, Charlottetown, Secy-Treas.
