POLICE MADE NO LAWRENCE RIOTS

SALEM, Mass., Nov. 4.—That rioters and the policemen made no riot in Lawrence on the morning of January 29th, and that the effort to prevent the attacks upon cars were besieged by an organized gang of about 20 men was the testimony today of Leo Ready, one of the textile strikers, at the trial of Ettore Giovannetti and Caruso for the murder of Anna Lopizzo. Ready declared that he was near the scene of the riot that morning and that the strikers were peaceful. I saw this gang of twenty men go up and down the streets, said Ready. They were armed with clubs with which they smashed the windows of the cars. Some of them threw chunks of ice. The policemen on the street made no attempt to stop them, neither did the soldiers.

Several Lawrence women and children workers testified that police and strikers clubbed the strikers. One told of the stabbing of a fourteen year old boy by a soldier.

SHELDON CREDITORS RECEIVE SETBACK.

MONTREAL, Nov. 5.—The numerous creditors of Charles D. Sheldon, ex-financial wizard, received another setback in their suit against Mrs. Matthews, one of the eleventh hour winners in the pool, when the Court of appeals dismissed the inscription entered by the curators against the judgment rendered by Mr. Justice Greenshield a year ago. Disrobed of legal terminology, Justice Greenshield's ruling was in effect that Sheldon's pool was a risk pure and simple, and that all engaging therein entered on a species of gamble. The majority had lost; Mrs. Matthews had won. Such were the fortunes of those courting the fickle god of chance. Hence no one had reason to complain.

Mr. Justice Archambault, speaking for his colleagues of the higher court declared that what the court might have been inclined to modify Mr. Justice Greenshield's ruling the contract which all clients entered into with Sheldon was a gaining contract pure and simple, and it did not behoove the court to deliberate upon a dispute arising from a gaming contract, which was publicly known as such to all interested parties.

It is not known whether the curators will take the matter to a higher tribunal. Just what action will be taken will be decided at the meeting of the creditors of the insolvent estate, when the questions at issue will be discussed by those acting for the mass of creditors of the estate. It is thought, however, that Mr. Justice Greenshield's ruling, as well as the brief but pithy expression of opinion of the judges in appeal will effectively dispose of the bones which in regard to securing the return of money drawn out by the eleventh hour winners of the pool. For Mrs. Matthews was but one of these latter and the action taken against her was in the nature of a test case.

BOSTON MERCHANT KILLS HIMSELF.

BOSTON, Nov. 4.—William E. Butler, president of the department store company of the same name, one of the able and promising retail merchants of this city, shot himself in his private office.

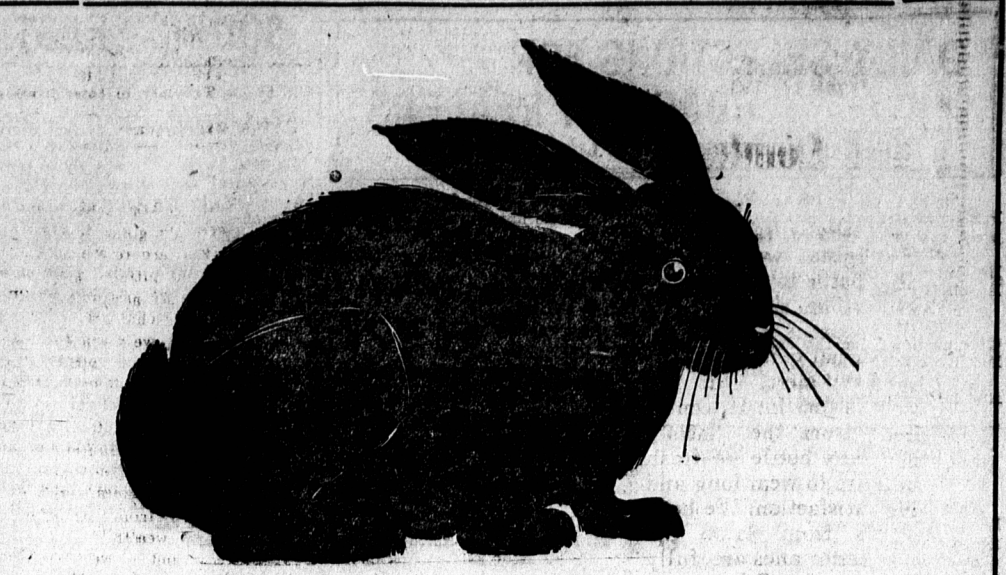

The act was the direct result of overwork.

It was the culmination of mental depression from which Mr. Butler had been suffering several weeks.

Three years ago Mr. Butler has a severe attack of typhoid fever from which he never fully regained his physical strength. This also left him with a slight nervous trouble that overtook him whenever he overtaxed himself.

He had been under a tremendous strain for a year or more owing to extensions of his business, and he had set his heart, but the strain on mind and body was too much for him and he began to show the effects of it about two weeks ago.

He was the kind of man who took and carried most of the responsibilities of his large business on his own shoulders. His were the plans and he worked to carry out his plans in a large measure himself. It was this self-containment that led to the untimely end.

A Serious Joke on The Rabbit

The U. S. Gov't has been experimenting to discover the poisonous quality of Caffeine (found in tea and coffee).

57 healthy rabbits were given an average dose of 5 to 10 grains.

-- They all died

See Gov't Bulletin No. 148.

Bureau of Chemistry.

A cup of coffee contains over 2 to 2 grains of Caffeine; enough in two cups to kill a rabbit.

A cup of tea contains over 1 to 2 grains--enough Caffeine in four cups to MORE than kill the rabbit.

Of course this joke was on the rabbits.

A goodly number of humorous Americans play the same joke on themselves and keep it up until some fixed form of disease sets in, as a result of the daily dose of Caffeine, in quantity enough to kill a rabbit, but only enough to.

Cripple a Man.

Not at one blow, but by little blows repeated daily

Of course some systems are strong enough to stand all kinds of abuse, but when a man or woman observes a growing nervousness, of heart trouble, stomach, bowel or eye disturbances, it is time to quit the daily dose of coffee and see if Nature will begin to heal.

It is easy to shift from coffee to Postum. The food beverages has the deep, seal-brown color which turns to a golden-brown when cream is added. The flavor has the crisp tang so winning to the palate and the cup is made instant by one struck spoonful of the powder.

INSTANT POSTUM

HALIFAX HAS MILK FAMINE.

HALIFAX, Nov. 5.—The Halifax milk famine has assumed serious proportions, so serious, in fact, that during the week-end restaurants, hotels, etc., not to mention private households, were left markedly short of their supply.

The scarcity of this great essential out of milk (some 1,000 quarts) was received at the I. C. R. depot from points this side of Truro, as that coming in on Saturday. This constitutes less than one-tenth of the usual full supply.

The scarcity of this great essential is being sorely felt throughout the city today, and consumers are demanding relief. They are the ones to suffer, and if that relief is not forthcoming thru one channel then other means must be worked out. The suggestion thrown out by the mail on Saturday, in effect, that a night train be put on the D. A. R. between Halifax and Annapolis in order to pick up a sufficient supply, is meeting with much approval among the consumers. When it is considered that thru the valley milk is being sold the creameries for from 2 1/2 to 3 1/2 cents per quart, when the producers along the I. C. R. are demanding 5-1-3 cents per quart, it would seem that that is the channel thru which relief might easily come.

There is a wild scramble all over town today for milk—everybody wants a full share, but when one-tenth of the usual supply only is available, the situation assumes the proportions of a famine in all that the term implies.

The local dealers hold that they are powerless. To attempt to buy milk at 5-1-3 cents, and sell it for 8 cents and downward would simply mean losing money. They say 9 cents per quart will give them no more than a bare living profit.

FROM SCOTLAND TO YUKON FOR HUSBAND.

NEW YORK, Nov. 5.—Another Scotch romance will be ended in matrimony just as soon as Miss Helen MacPhee, of Crief, Scotland, can reach Dawson City, Yukon, and there meet Gordon Runyon, formerly of San Francisco, who has \$100,000 laid aside for their housekeeping expenses, all of it in gold nuggets that he dug from the soil of Alaska.

Miss MacPhee came on the Anchor Line S. B. California from Glasgow, where she has been with her family, and she did not waste a minute in attending to her baggage, jumping into a cab and hastening to the railroad station.

Around her throat was an odd looking necklace of gold nuggets, sent

her by the man whom she met in the French Hospital in San Francisco and nursed to health from an accident in which several of her ribs were fractured.

Miss MacPhee was a nurse there several years ago, and when Gordon Runyon was brought in she was assigned to the case.

Cupid took a station there, too, and when Runyon got well he started for Alaska with the avowed purpose of making \$100,000 and then marrying his mastering angel.
