**Black as Dirt About the Eyes**

Liver Was All Upset and There Was Pain Under the Shoulderblade—Two Interesting Letters

So many people suffer from derangements of the liver that we feel sure these two reports, just recently received, will prove interesting reading and valuable information to many readers of this paper.

Mrs. F. L. Harris, Keating P. O. Sask., writes: "I was suffering from liver trouble—had a heavy pain under one shoulder blade all the time, and was nearly as black as dirt around the eyes, so I concluded to try some of Dr. Chase's Kidney-Liver Pills. I did so, and before I had taken one box the pain had left me and I concluded to get a fresh and by the time I had taken two boxes, I was completely cured and felt like a new person. My trouble was caused by heavy work out-of-doors, and of course heavy eating and constipation. I would advise anyone suffering from kidney or liver trouble to give Dr. Chase's Pills a trial."

Mrs. Charles Terry, Twoed, Ont., writes: "Before I was married I was troubled with enlargement of the liver. My liver became so enlarged that I could detect the swellings on either side, and it was only with difficulty that I could get my clothes on. I cheerfully recommend Dr. Chase's Kidney-Liver Pills to anyone having them. I commenced this treatment, and used nine boxes, which cured me at that time. Then, about two or three years afterward I was troubled again with the swelling, but only on my right side. I secured some more of Dr. Chase's Kidney-Liver Pills, and took them, which finally cured me. I have not been troubled in this way since. I cheerfully recommend Dr. Chase's Kidney-Liver Pills to anyone having kidney or liver trouble."

He also found Dr. Chase's Linseed and Turpentine excellent for coughs and colds. In fact, any of Dr. Chase's medicines which we have used have been good."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c a box, 5 for \$1.00, at all dealers, or Edmansons Bates & Co., Limited, Toronto.

**THE TRAINS**—The latest report at 11 o'clock last night, regarding the island trains, is as follows: The Georgetown train reached Mount Stewart, but was sent back to keep the line clear. The Summerside train has only reached New Glasgow. The Edinburgh train had only advanced one mile through all day yesterday. The City train, Borden bound, had reached Emerald junction at 10 o'clock and was ordered to keep on to Borden. The train outward from Borden had only gone 3 miles so it was ordered back to clear the line for the train from Emerald. The Tignish train left Alberton and is 2 miles east of Elms Lake. At Plusville this train encountered cuttings that submerged the telegraph wires and posts. The Murray Harbor train is at Wood Islands. The Souris train put back Tuesday night. A relief train was sent from the City yesterday at 9.40 a. m. and made the eastern town late last night after the most successful run since Saturday. This was the first train to make its destination since Saturday. All the trains reported, except the Souris relief, have been on the road fighting since the early hours of Monday morning.

**THE THOUSAND DOLLAR A DAY GIRL**

"The Knight of tenderness and pity across the world," was the name General Petain called that wonderful British girl, Miss Kathleen Burke, when she—the only woman to whom the honor has been accorded—visited Verdun, and she is known throughout France by that name. "The Thousand Dollar a Day Girl" she was called in the States, and later by her courage, her unflinching energy and earnestness, she won in Canada, and our United States, the title of "Our Beloved Girl."

Her story in the English Daily Mail, Miss G. Lynders, of New York.

"To have founded an entirely equipped and maintained for more than a year a Scottish Women's Hospital of 300 beds in France is itself an achievement to be proud of; yet this is but a portion—though a very substantial one—of the wonderful results of the work in the United States. Canada of Miss Kathleen Burke, who has just returned to England, in 1915. Miss Burke, under the auspices of the Scottish Women's Hospital, arrived in New York with a girl who had been in the hospital in Serbia, Belgium, and France, and in England of Irish parents, educated in France, and working in America for the relief of our European allies. She made an instant appeal to the character of the general, the American people opened their hearts and their cheque books.

"During the last twelve months, her daily average has been \$200, and she has traveled over 120,000 miles. She has crossed the Atlantic four times, made six tours across the continent, and with untiring energy every principal town and city in the United States and Canada.

"How many times she has spoken for her own hospital, for the American Red Cross, and for the various war organizations in the country, cannot say, but certainly she has made more than 300 different public speeches in the year. Through this medium in the work of all British women in general, and of the Scottish Women's Hospital in particular, has become as well known as the name here than at home. Mention of Burke work of British hospitals invariably elicits the remark "Oh, yes, the Scottish Women's!" The terms are synonymous. The noble work of that gallant little band of Scottish women who since the outbreak of war have fought with typhus, famine, and death in stricken Serbia and brought comfort and tender care to the sick, the wounded, and the destitute of Belgium, of France and of Russia, has reached the whole of British womanhood the home that America has so generously expressed through Miss Burke.

"Not only does Miss Burke take with her more than \$40,000 for the Scottish Women's Hospital and more than \$200,000 for France, but she also carries the confidence and unstinted admiration of the whole of this vast continent."

One of the queerest structures in the world is an electric-station building at Cristobal in the Panama Canal zone. The roof is supported by powerful central columns and the side walls bear no weight whatsoever but are suspended from the eaves by means of cantilever beams. On one side of the building the wall is made of concrete, and the other is made of steel. This unique construction was adopted to prevent the building from settling at a dangerous angle should an earthquake tremor shift the foundation.—Popular Science.

**"The Butterfly"**

From the story by Howard Kitchell Webster, which appeared in the Saturday Post.

**SYNOPSIS OF THE STORY**

To revenge himself on the woman who repulsed him, the hunchback acrobat lures her daughter to the stage. The girl becomes a famous dancer and falls in love with a college professor. A blundering detective attempts to fasten the crime on Elaine. She and the Professor escape on a moving train. The hunchback follows. There is a thrilling fight on the edge of a cliff.

Watch the local columns of this paper for further announcements.

A lot of them were fishing close to a railway bridge when suddenly a lad of the party lost his balance and fell into the river. Immediately an old fisherman standing by threw off his coat, plunged into the stream, and after a struggle brought the boy safe to land.

"Noble individual!" cried a gentleman who was passing by at the time of the accident. "Generous preserver! But for thy timely help my poor boy's spirit would now be in the land of..."

"Stow that, gov'nor!" interrupted the old fisherman. "I didn't care nuffin' 'bout the boy. But the young buggar has got all the bait in his trousers pocket."

**FIRE WASTE**

**Councillor Webster in a Paper Before the Rotarian Club Gives Some Startling Figures on the Loss in Canada Due to Preventable Fires.**

Rotarian Dr. Reid presided at the weekly luncheon of the Rotary Club in the Kozey Korner yesterday, when Councillor Webster read a paper on "Fire Waste."

It has been stated, said Mr. Webster, that, if we fight preventable fires, we shall win. Most of the fighting will be done in the European trenches. Some of it will be accomplished in the factories, in the warehouses, in the fields, and in the homes of our own country, Canada. If we are to stand any chance of winning quickly, efficiency must be developed to the highest possible point—and efficiency means Conservation.

We have been asked, if not startled, when we read the figures given out by the Canadian Commission of Conservation, dealing with Canada's fire waste. In the last fifty years, the direct loss from fire in Canada has exceeded \$350,000,000, this being exclusive of the loss in the year just ended, (1917) the high total of \$25,100,000 was reached—representing 14,092 fires. The Commission has called our attention to these losses in a striking way. It points out that the Canadian Government pays \$2,000,000 a month in subsidies to our Allies, the soldiers' wives and dependents while the Canadian people burn about \$2,000,000 worth of property every month. Canada's annual fire waste is sufficient to pay 5 per cent. interest on a sinking fund large enough to cancel the total indebtedness in thirty years. One year's fire loss in Canada would purchase 12,000 bushels of wheat for our Allies. The value of grain and other agricultural produce burned in Canada in 1917 was equal to the average annual production of 1,200,000 bushels of wheat. Canada's fire loss in 1917 would have provided 3,500 horsepower or 25,000 machine guns or maintained 20,000 men in the trenches for a year. Carelessness was responsible for the majority of these fires.

In Canada the average fire loss per capita is \$2.96, compared with the United States, \$2.26; England 64 cts.; France 74 cts.; Italy, 53 cts.; Norway, 55 cts.; Sweden, 44 cts.; Austria, 32 cts.; Germany, 28 cts.; Switzerland, 12 cts.

The striking contrast between Canada's fire losses and other countries is due, first, to the general character of the buildings in Canada. Seventy per cent. of the buildings in Canada are frame structures, while outside of Norway, Sweden, and a portion of Russia, all the buildings of Europe are of solid brick and stone. Secondly, European laws punish carelessness, and thirdly, the viewpoint and civic responsibility of the individual are entirely different in Europe. In this country, when the property is insured, we do not count the fire loss; in Europe, they realize that it is necessary to indemnify the owner for the loss that can never be restored. Here we figure fire as a misfortune, while in Europe they figure fire as a crime. We labor to extinguish fires; they labor to prevent them.

A. E. Ham, Fire Commissioner for the Province of Manitoba, in his report for 1917, says: "The principal fires in that province this year involved a financial loss of \$1,362,156. Also eleven lives were lost. Many of these fires, upon investigation, have been found to be the result of gross carelessness on the part of the individual concerned. A large proportion of fires is due to preventable causes, such as the accumulation of papers, wood and other inflammable materials in places where they come in contact with heat or the accidental dropping of a match, cigar, or cigarette stub, sets up a conflagration resulting in great loss both in money and human life and, only by the continuation of educational methods, can the public be made to realize that all loss by fire is a loss to the community and

**MEAT CAUSE OF KIDNEY TROUBLE**

Take Salts to Flush Kidneys if Back Hurts or Bladder Bothers

If you must have your meat every day, eat it, but flush your kidneys with salts occasionally, says a noted authority who tells us that meat forms an acid which almost paralyzes the kidneys in their efforts to expel it from the blood. They become sluggish and weaken, then you suffer with a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sour, tongue is coated and when the weather is bad you have rheumatic twinges, the urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To neutralize these irritating acids, to cleanse the kidneys and flush out the body's urinous waste, take four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate sluggish kidneys, also to neutralize the acids in urine, so it is no longer irritating, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure, and makes a delightful after-dinner lithia-water drink.

**A 15 YEARS' FIRE**

Just think! That is the time through which Mr. H. C. Buckley endured all the fiery tortures of itching, burning eczema. His life was a perfect misery until Zam-Buk—the great herbal skin cure—brought complete relief.

Mr. Buckley, who lives at 451 East Broadway, Portland, Oregon, writes: "For fifteen years I suffered with eczema, and although I tried many so-called 'eczema cures,' nothing seemed capable of dealing with a case like mine. It was not until I had Zam-Buk recommended to me that I began to have hope. This wonderful skin healer soon brought about a change for the better. As I recovered with Zam-Buk the itching sensation got less. I found Zam-Buk was 'terribly soothing.' Gradually the patches of soreness and inflammation were reduced, and complete and permanent cure finally resulted. I would strictly advise all affected with eczema to give Zam-Buk a trial. It will give them a 'life' which they will not be disappointed."

No skin disease can resist the potent healing forces stored up in Zam-Buk, which is unequalled for old wounds, ulcers, abscesses, bad legs, scalds, sores, cuts and all skin injuries. All druggists and stores or Zam-Buk Co., Toronto, 50c. box.

**ZAM-BUK**

**A GOLF HANDICAP**

"I wouldn't say McTavish canna learn the game," remarked Sandy, as they trudged home from the links. "but it will be difficult to him."

"Aye," agreed Donald. "At times he will be like to bust, what we're so relegateous and tongue-tied."—Everybody's Magazine.
