When Your Cough Hangs On, Mix This at Home

For coughs due to colds, the best remedy that money could buy can easily be mixed at home. It saves money and gives you the most reliable, quick-acting medicine you ever use. The way it takes hold of stubborn coughs, giving immediate relief, is astonishing. Any druggist can supply you with 2½ ounces of Pinex. Pour this into a 16 oz. bottle, and fill up with plain granulated sugar syrup or strained honey. It's no trouble at all to mix, and when you once use it, you will never be without it. Keeps perfectly and tastes good—children really like it. It is surprising how quickly this loosens the germ-laden phlegm, and soothes the inflamed membranes. At the same time, part of the medicine is absorbed into the blood, where it acts directly on the bronchial tubes, and helps the system throw off the whole trouble. Even those severe coughs which follow cold epidemics, are promptly cured. Pinex is a highly concentrated compound of Norway Pine, containing the active agent of creosote, in a refined, palatable form. Nothing known in medicine is more helpful in cases of severe coughs and bronchial irritations. Do not accept a substitute for Pinex. It is guaranteed to give prompt relief or money refunded.

**A CLEAN MOUTH**  
Did you ever get your mouth so gloriously clean you can almost taste the freshness of the air?  
Not the momentary exhilaration following some druggy tooth-paste or antiseptic. But a mouth even a surgeon would call clean. So alkaline and sweet that the breath is like new-mown hay. So free from acid your teeth and gums feel slippery to the tongue.  
Of course you should brush your teeth! But it is far better to go without a tooth-brush than miss a daily alkaline rinse. Every night pour out a tablespoon of Phillips' Milk of Magnesia and slosh it back and forth in your mouth until it's gone. No water. Just the pure emulsion. Force it between the teeth with your tongue, and work it all around the gums.  
Your teeth will stay white even if you smoke a lot. Your tongue will be pink and healthy-looking. People who don't know this use of Phillips' Milk of Magnesia just think their mouths are clean.  
Dentists are urging this scientific protection from acid-mouth. And when you adopt the suggestion your dentist knows it on your next visit! You may go three or four years without a single new cavity when you alkalize your mouth in this manner and neutralize the acid that eats the enamel.
