

FORMAL CLOSING YESTERDAY

(Continued From Page One)

Addresses were given by Hon. Dr. McMillan and Mr. R. H. Rogers, Superintendent of Education who congratulated the students and staff upon the good showing made.

THE PRINCIPAL'S REPORT OF THE YEAR'S WORK

Tonight's proceedings bring to an end the fourth year of operation of the Prince Edward Island Agricultural and Technical School.

This has been a successful year—the most successful since the school was established four years ago. There has been a very gratifying increase in attendance, three hundred and one is the number of students enrolled in day and night classes this term.

The first year we registered 105, the second 127, the third 172, and the fourth 201.

We also notice a marked improvement in the quality of work done. This is due to a variety of causes; lessons learned from the experience of previous years; regularity of attendance; a marked absence of contagious or infectious diseases; but more particularly is the improvement due to a superior quality of the students who came to us this year.

The Federal Director of Technical Education in his fourth Annual Report states that four provinces of the Dominion made satisfactory progress last year, and Prince Edward Island was one of them.

The courses given were as follows: Agriculture, including Live Stock, Field Crops, Dairying, Woodworking, Motor Mechanics, Agricultural Chemistry and Physics, Biology, English, Arithmetic, Civics and Economics.

2. Motor Mechanics, including English, Arithmetic, Physics, Civics, Woodworking, and Motor Mechanics.

3. Three weeks' Course in Cookery, Millinery, Dressmaking, and Home Nursing for girls.

4. Two weeks' course in Cheese and Butter making and in grading dairy products for cheese and butter manufacturers.

5. Night classes in English, Arithmetic, Show Card Writing, Radio, Woodworking, Motor Mechanics, Electricity, Cookery, Dressmaking, Millinery, and Home Nursing for the city students.

Certificates of merit are awarded to all day class students who attended the required number of days, passed the necessary examinations, and otherwise complied with the rules and regulations of the school.

Following is the Honor Roll: The competition for first place in the graduating class is always keenly contested, and this year was no exception to the rule.

The student who stands highest in the Agricultural Class, 1st year, is Alvin Myers, Hazelbrook, 2nd year, Walter Gill, Union Road, in the Motor Mechanics Class, 1st year, Victor Cahill, North River, 2nd year, Charles Rice, Montague.

We did not classify the students of the Household Science Department. We did not feel equal to the task.

to the best student in Mathematics, Motor Mechanics Class, won by James Miller. Ninth prize, Five Dollar Gold Piece—Presented by the Atlantic Auto Co., Amherst, to the student ranking highest in subjects of the Second Year, won by Walter Gill.

Home Economics. The following is a list of students of the Three Weeks' Short Course in Home Economics who received certificates at the Technical School last night.

November - December Class: Margaret Jones, St. Eleonors; Hazel Stead, Wheatley River; Hilda Fraught, City; Helen Gates, Gates Mills; Jean Emma, City; Frances Connolly, City; Millicent McNutt, Darnley; Mrs. J. P. Crockett, City; Helen Clark, City; Hilda McCallum, City; Erma Gay, City.

January - February Classes: Inez Bryenton, Union Road; Olga Buntain, Wheatley River; Helen Roby, Cornwall; Doris Harper, City; Lulu Myers, Hampton; Lucy Horton, Summerside; Rena Love, City; Lucy McQuaid, Johnson's River; Irene Nicholson, Cardigan; Marion Pendergast, Hope River; Evelyn Walsh, Mount Stewart; Margaret MacDonald, Southport.

February Class: Ethel Buell, Murray Harbor; Muriel Hughes, City; Harriet McLean, Nine Mile Creek; Genevieve McLean, Union Road; Janet Cairns, Stancheil; Margaret LaMont, City; Ruth McKinnon, Canoe Cove; Annie McRae, Canoe Cove; Katherine Nicholson, Cardigan; Jean Semple, New Glasgow; Rita McDonald, City; Mabel Pound, Glen Valley; Mrs. J. A. McIsaac, Cardigan.

The outstanding feature of our work this year was the establishment of courses in Household Science for girls. These consisted of a three weeks' Short Course in Home Economics for students from the city and country and courses in Cookery, Home Nursing, Millinery, and Dressmaking for Night Class students from the city. I am not going to take up your time pointing out the value of these courses—courses that every young woman who has any serious notion of assuming grave responsibilities of housekeeping and home making should take. The success of these courses was most pronounced. Forty students enrolled in the day class and the number in the night classes was one hundred and twenty. I want to take this opportunity of publicly expressing my appreciation of the skill and tact and good judgment exercised by the Supervisor of Household Science classes and her assistant, together with the instructors of the various subjects all of whom performed their allotted tasks with the greatest efficiency. When I first learned that the Household Science Department was moving into the Technical School, I said to myself: "Here is where our trouble begins." But we didn't have any trouble. Everything went along just as smoothly and as expeditiously as if the Director of Household Science Department was a man.

We have before us tonight three graduating classes, one in Agriculture, one in Motor Mechanics, and one in Home Economics. Of these classes the smallest is in Agriculture. But what it lacks in quantity it makes up in quality. If you would give us 25 students a year such as those who are getting First Class Certificates tonight we would revolutionize agricultural conditions in this Province. And agricultural conditions need to be revolutionized.

These graduates here of the agricultural classes have been wrestling with the agricultural problem for five full months, and so far as actual, tangible results are concerned it is the best class we have ever had. They have been studying live stock and field crops with Mr. Shaw, Stock breeding, feeding management, housing, and judging, veterinary science and practice; live stock markets; soils and methods of cultivation; cereal crops, weeds and their eradication; forestry, insects and diseases affecting plants and animals and their eradication. These are a few of the problems that Mr. Shaw and his class have been worrying over for the past five months.

Mr. Shaw is a graduate of Ontario Agricultural College, a practical farmer, a distinguished newspaper correspondent and a good writer. Besides this he has other accomplishments. He was the champion bowler in the recreation club, a jump stairs until his record was broken by three or four students of the Motor Mechanics class. This class has also been taking woodworking and building construction from Mr. Waugh. Mr. Waugh received his technical training in the old country, and when we want expert teachers in strictly technical subjects we go to the old country for them. Over here is an exhibit of the woodworking department. You will have an opportunity of looking it over before you go away tonight.

Another subject of considerable importance in this school is Motor Mechanics. Mr. Whitlock is the instructor. I hardly know what I ought to say about Mr. Whitlock. He has the biggest job, and the hardest job in the whole institution. Every year he takes from thirty to fifty students, green from the country, and puts them to work on cars, tractors, and gas engines, belonging to the Department of Agriculture and of Public Works, cars in all stages of dissolution and decay, and in the Spring he turns out these same cars and tractors with a knock and guaranteed to run without a murmur. A car consists of about 2,000 separate parts. These classes completely overhauled eight cars and two tractors and two gas engines this

winter, and all these cars are being overhauled simultaneously. How does a man know that he is going to get his own car back? I don't know. I can't explain it. You will have to ask Mr. Whitlock. But this apparent miracle has been going on every term for four years, and will continue to go on as long as the Technical School endures, and Mr. Whitlock is in charge of the Motor Mechanics Department.

Another feature of the work at this Vocational School in which we take considerable pride is the work of the Dairying Department. This school has been fitted out with the very best equipment available for the purpose of testing milk and cream and of manufacturing butter and cheese.

This year we put on a two weeks' short course for cheese and butter manufacturers. The Federal Government sent down two expert graders and manufacturers from Montreal, men who know every detail of the game from the production of the raw material to the grading and marketing of the finished product.

Through the co-operation of the Federal and the Local Governments, Mr. Fraser T. Morrow, Provincial Grader, a man who understands local conditions thoroughly, was put in charge. These gentlemen with the cheese and butter manufacturers of the Province went into conference. They considered the dairy situation from every angle—from the standpoint of the producer, the consumer, the dealer, and the manufacturer. The second week they brought every pound of which graded "Special". This is work of the greatest importance and work which, I think, this school is well advised in placing special stress upon.

Besides all this work that our agricultural students carry on with Mr. Shaw, Mr. Waugh, Mr. Whitlock and Mr. Morrow, they also receive instruction in English, Arithmetic, Chemistry, Physics, Biology, Civics and Economics.

The second graduating class we have with us tonight is a class in Motor Mechanics. These young men, and other classes of a similar kind as a direct result of the training they got here, are worth to this province thousands of dollars every year. I said at our closing exercises three years in succession and I say it again—perhaps for the fourth and last time—that the value of the motor equipment destroyed each year in this province for the lack of knowledge of the mechanical and technical principles involved would more than pay the total operating costs of this vocational school. These young men after they leave here will be found working on the farms, in the garages, in the service stations; some perhaps will go to the United States or Western Canada. Wherever they go they have a training that will give their work the stamp of efficiency. Now the singular thing, the distinguishing characteristic of this work is that they did not learn it from books. They could not learn it from books—although we use books freely for reference. They will never get this kind of instruction in any elementary school. And they will never get it in a three days' short course or a three weeks' short course. A course like this means equipment and a workshop, and discipline, and a little expense account. If it did not cost considerable it would not be worth bothering with. Where will our young men get their practical training if this school should close its doors? Just where they got it before this school was established. They will go to the United States, take the first job that offers, go to Technical School at night, and push their way to the front. That is what young Prince Edward Islanders will do and it is a pity when they will do.

Ladies and Gentlemen: it will be a pretty sad commentary on educational conditions in this province when our young men and our young women are to leave home for five full months, and so far as actual, tangible results are concerned it is the best class we have ever had. They have been studying live stock and field crops with Mr. Shaw, Stock breeding, feeding management, housing, and judging, veterinary science and practice; live stock markets; soils and methods of cultivation; cereal crops, weeds and their eradication; forestry, insects and diseases affecting plants and animals and their eradication. These are a few of the problems that Mr. Shaw and his class have been worrying over for the past five months.

Mr. Shaw is a graduate of Ontario Agricultural College, a practical farmer, a distinguished newspaper correspondent and a good writer. Besides this he has other accomplishments. He was the champion bowler in the recreation club, a jump stairs until his record was broken by three or four students of the Motor Mechanics class. This class has also been taking woodworking and building construction from Mr. Waugh. Mr. Waugh received his technical training in the old country, and when we want expert teachers in strictly technical subjects we go to the old country for them. Over here is an exhibit of the woodworking department. You will have an opportunity of looking it over before you go away tonight.

Another subject of considerable importance in this school is Motor Mechanics. Mr. Whitlock is the instructor. I hardly know what I ought to say about Mr. Whitlock. He has the biggest job, and the hardest job in the whole institution. Every year he takes from thirty to fifty students, green from the country, and puts them to work on cars, tractors, and gas engines, belonging to the Department of Agriculture and of Public Works, cars in all stages of dissolution and decay, and in the Spring he turns out these same cars and tractors with a knock and guaranteed to run without a murmur. A car consists of about 2,000 separate parts. These classes completely overhauled eight cars and two tractors and two gas engines this

winter, and all these cars are being overhauled simultaneously. How does a man know that he is going to get his own car back? I don't know. I can't explain it. You will have to ask Mr. Whitlock. But this apparent miracle has been going on every term for four years, and will continue to go on as long as the Technical School endures, and Mr. Whitlock is in charge of the Motor Mechanics Department.

until it has had an opportunity to prove its value." He also writes: "The reports from Prince Edward Island, Nova Scotia, Ontario and British Columbia indicate satisfactory developments during the past year, and there are a number of reasons for expecting improved conditions in the other provinces during the current year."

The third graduating class before us tonight is of the Household Science Department, forty in number. These are students from the city and country who took the three weeks' Short Course in Domestic Science. Besides this one hundred and twenty took night classes in Cookery, Millinery, Dressmaking, or Home Nursing. This is work of the greatest importance and work that is thoroughly understood. If the work of the Farmers' Institutes in this Province had been organized and carried on with the same degree of intelligence as the work of the Women's Institutes, the classrooms of this institution of learning would today be crowded to the windows.

This building cannot accommodate all the young women who want to take Household Science subjects and the Technical Educational Grant cannot be stretched to cover the needs. Additional accommodation must be found. There should be a Household Science kitchen in every Public School in this city, and in every incorporated town in the Province. There is a Household Science kitchen in Prince of Wales College, but the Director of Household Science in that Institution spends the first three months of the college year in teaching penmanship and phonetics. Why can't that equipment be made use of every hour of the school year? There are several complete sets of woodworking equipment in this town and other towns of the Province that have not been used for years. What is this event we are celebrating tonight? Is it the death knell of vocational education in this Province? When every other province in the Dominion and every other country in the civilized world is saying we have got to teach boys and girls to use their hands, as well as their heads, who are we doing without? Closing and nailing up the doors and windows of the only institution in the Province that ever made any attempt to solve the problem of vocational education intelligently.

The other activities of the school; our literary and debating society, our physical drill, our athletics, I have not time in which to refer. If you ask me which of all these activities, the woodworking, the motor mechanics, or the live stock or the cultural subjects do I consider the most important, I would answer, none of these things, important as they are, are of paramount importance. It is the getting together, the country blending with the city, the discussing of problems in common, getting the proper point of view, broadening the vision, extending the mental horizon—character building—these after all are the basic, the essential, the fundamental things in any system of education whether vocational or cultural.

Just a word in closing. You have come here, I take it, for the purpose of learning something about the work carried on at the Technical School, and particularly about our plans for the future. About the work I have said enough. About the future I know nothing. The general impression seems to be that the school is closing for good. I don't think so. What I know of the good sense and the good judgment of the people of this city and province prevents my entertaining that idea. Personally I think the closing of this school would be a colossal blunder.

I know that the financing of the school is difficult. You may be told that the cost of operating the school last year was in the vicinity of \$20,000, and that the amount of the grant which has not been cut off provides \$5,500. We have allowed \$3,000 for Household Science instruction which will be carried on in any event. That leaves the total amount to be provided out of local revenue for operating the school to be \$4,000. The Technical School is worth many times that amount to this city alone to say nothing of the Province as a whole.

But that is your business, not mine. Personally my work in the interests of vocational education in this Province ends at 12 o'clock, midnight, on the 31st of March. I have received not the "well done good and faithful servant" but the more modern and more popular notice "Your services are no longer required." That is not a flattering commentary on twenty-five years of service in the interests of education in one's native province but a prophetic is not without honor save in his own town.

I want to thank the people of this city for their gracious hospitality to the students of the Technical School during their short stay in the city, the staff of the school for their loyal support, and the officials of the Department of Agriculture with whom we have been closely associated, and by whom we have been most cordially supported in our work.

I shall follow with the closest attention all future developments along vocational lines. I have never engaged in work that gave me greater satisfaction. It seems so ideally adapted to the agricultural and industrial needs of this Province. The experiences I have gained, and the lessons I have learned will be of inestimable value to me in some larger sphere of usefulness.

S. will be held at the home of Mrs. C. Tweedy, on Wednesday, Feb. 2nd, at 2 o'clock. Special programme. All come and bring your Easter envelopes. E. A. Westmoreland, Pastor.

WOMEN'S CLUB HAVE SUCCESSFUL MEETING.—A very interesting and instructive meeting of the Women's City Club was held Friday afternoon in the Board of Trade rooms. After the business of the meeting was transacted, the president, Mrs. Gordon Hughes, introduced Mr. Justice Arsenault, President of the Tourist Association, who gave a splendid talk on the work which is being done by the Association, outlining their different plans to encourage tourists to visit our island during the coming summer. Messrs J. O. Hyndman and H. H. Brown, also spoke in the interests of the Association, all three speakers asking the co-operation of the Women's Club and promising their support to the good work which has been undertaken by the Club for the benefit of Charlottetown. At the close of the meeting a vote of thanks moved by Mrs. Ross McEwen seconded by Mrs. J. J. Hornby, was presented to the speakers by the president.

LADIES' CHAMOISLETTE GAUNLET GLOVES, sand and grey. Special value 90 cts. Prowse Bros., Ltd. 2209-3-29-11

OUR MEN'S HATS have a Province-wide reputation for good quality and low price. Prowse Bros., Ltd. 2306-3-29-11

FINE PHOTOGRAPH.—Miss Rosa Stewart, daughter of Premier and Mrs. J. D. Stewart who is continuing her law studies at Dalhousie is photographed in the last Toronto Saturday Night.

ST. PETERS CATHEDRAL.—The remaining subjects of Rev. E. M. Malone's Sunday evening course of Lenten sermons at St. Peter's Cathedral are: Doubt, Temptation, and Death. Tomorrow evening the subject will be Doubt.

LIQUOR CASE.—At the Police Court yesterday afternoon, Mrs. Jessie Offer, Great George Street, pleaded guilty to a charge, laid by Prohibition Inspector Coyle of having liquor in her possession unlawfully. She was fined \$200, or three months.

MILITIA TRAINING.—The training of the Militia this year will in all likelihood be even more limited than last year. It is understood that there will not be any firing practice for the Artillery at Petawawa most of the training being done at local headquarters.

A POPULAR PONY.—Mr. Fred M. Batt, city, is the possessor of a handsome pony, Shadland Essex, which was awarded to him in a contest some years ago. The pony is believed to be the smallest in the Maritime Provinces and has a splendid pedigree. Mr. Batt is planning to have a picture of his pony appear in the press, for the gratification of his many admirers.

FUNERAL YESTERDAY.—The funeral of the late Mr. Wm. Dillon took place yesterday morning from his residence, Grafton Street, to St. Dunstan's Cathedral where a Requiem High Mass was celebrated by Rev. Jas. Rooney. The pall bearers were: His Worship Mayor McKenna, Capt. McLean, Messrs. Jas. King, George Punter, Jas. Callaghan and H. Weeks. Service at the grave was conducted by Rev. P. Walsh. Out of respect to the memory of the deceased, who was for many years a member of the Fire Department, the Fire Bell tolled at the funeral cortege left the house.

RETURNS WITH GREETINGS FROM CANON SCOTT.—Capt. D. A. McDonald of Wheatley River has returned from St. John's, Quebec, where he completed a two week's Field Officer's Course at the Royal School of Cavalry, Capt. McDonald later visited Montreal, Quebec City and other centres. During his visit to Quebec City he was a guest at the home of Canon F. G. Scott, well-known to returned men here as senior chaplain of the 1st Canadian Division. Canon Scott presented Capt. McDonald with a volume of his war poems, affectionately inscribed in his own hand. He recalled with great pleasure his visit to Charlottetown two years ago and wished to be remembered through Capt. McDonald to all his friends here.

PERSONALS

Mr. George Creamer, who was visiting his home in Souris, returned to Boston yesterday morning.

Miss Mary McCormack, Souris, is visiting her sister, Mrs. Alfred Doy, in Orlebar Street.

Miss Katie Duvar, city, has returned from an extended visit to friends in Alberton and vicinity.

Mrs. John Murray and Miss Katherine Howatt, Borden, returned home Friday morning, after visiting friends in the city.

Mr. E. T. Higgs left yesterday for Halifax, from which city he sails on the S. S. Andania for London, England.

Mrs. G. M. Richards leaves this morning for Boston and New York where she will spend the Easter holidays.

Mr. and Mrs. Harold Riggs left this morning for Boston where they will visit Mrs. Riggs mother before returning to Revelstoke, B. C., where Mr. Riggs is an employee of the C. P. R.

MARGATE SCHOOL

The following is the standing of the pupils of Margate school for the month of February: Grade IX.—1, Jennie Cousins; 2, Helen Baker, Grade VIII.—1, Mildred Wood; 2, Mae Tuplin, Grade VII.—1, Helen Marks; 2, Mamie McGuirk, Grade V.—1, Muriel Marks; 2, Edith Caseley, Grade III.—1, Glen Cameron; 2, Edith Johnson, Grade II.—1, Gardiner Marks; 2, Don Baker, Grade I.—1, Gladys Baker; 2, Olive Glydon.

WINS DOG RACE SEVEN TIMES The famous Porcupine dog race was recently run, finishing at Timmins, Mr. W. Martin, seen in the picture with the figure "2" on his back, was the winner. This makes the seventh consecutive years which he has had that honor. The man with the figure "1" on his back was second winner. The winning dogs are in the foreground of the picture.

"Y" BOWLING MIKE BOXING 15 ROUNDS A DAY As a Training Stunt In Preparation For His Bout With The "Georgia Peach" NEW YORK, March 28—Fifteen rounds of boxing a day is the menu set before Mike McGigue, world's light-heavyweight champion, and his youthful challenger, Young Stripling, Atlanta, Ga., in preparation for their fifteen round title bout in Newark next Monday night. McGigue is finishing his training in the Madison Square Garden gym while Stripling is polishing up in Newark, N. J. McGigue's boxing weight now is 167½ pounds, but he expects to be down to 162 when he steps into the ring, while the challenger weighs 165 but may possibly increase his weight to 166. "Pa" Stripling said yesterday, due to his present good condition "Pa" Mullins, McGigue's manager, said his fighter was in the best condition of his career. McGigue is confident but is training hard.
