

# PANDORA RANGE

A convenience much appreciated by every owner of a Pandora is the towel attached to the range. As one-third of the rod is made of emery, it makes a splendid knife sharpener, too.

It's always there handy for you. You need waste no time hunting around for the easily misplaced "steel." Bright idea, eh?

An accurate thermometer is a reliable guide to successful baking, while an inaccurate one is a "cheat" of the worst kind.

Every Pandora thermometer is carefully adjusted and undergoes a practical test by heat—is proven correct before being sent out.

The figures, which show the required degree of heat necessary for the successful baking of bread, cakes, pies, etc., are plainly inscribed in black on a white enamel surface, so that they are easily readable, even when the day is dull.

If your local dealer does not sell the Pandora, write direct for free booklet!

## THE GUARDIAN COVERS THE FIELD

The Guardian covers the City and Province within which it is published more fully and completely than any other newspaper printed in Canada.

With a daily circulation of its morning and rural edition now about 8,000 and growing from day to day, it has broken all records for a daily publication in a small community.

Charlottetown has a population of 12,000 and Prince Edward Island has 103,000. The Guardian's daily circulation is therefore 1 to 10 of the population in the city in which it is published, or 1 to 13 of the population of the Province. This is the management believes, unequalled by any daily newspaper published in Canada.

Take one or two comparisons with other daily newspapers in other cities and Provinces.

St. John has a population of 40,000 and the Province of New Brunswick 200,000. St. John has five newspapers and among these The Telegraph and The Sun are the most prominent.

Paterson's

perhaps the foremost. Each claims a circulation of about 8,000, or say 1 to 5 of the population of that city and 1 to 40 of the population of the Province.

Of course Toronto has a population of some 250,000 and the Province of Ontario about 2,250,000. The Toronto Globe is a great Canadian newspaper, known all over the world as one of the foremost journals. The Globe's published daily circulation is slightly under 50,000. That is 1 to 5 of the population of Toronto and 1 to 41 of the population of Ontario.

The point is that The Guardian covers the field of its circulation three and a half times as well, if compared with population of the city, and over three times as well, taking the population of its Province, as the best New Brunswick and Ontario daily newspapers, and these are admitted among the best in Canada.

These facts are printed in no spirit of boasting, but for the satisfaction of Guardian readers and advertising patrons alike. They have a right to know how completely their favorite Journal is endorsed by the reading public among whom it circulates and how completely it covers the field as an advertising medium in this City and Province.
