Stubborn Coughs Ended by Recipe, Mixed at Home

Here is the famous old recipe which millions of housewives have found to be the most dependable means of breaking up a stubborn, lingering cough. It takes but a moment to prepare and costs little, but it has real relief even for those dreaded coughs that follow severe cold epidemics. From any drugist, get 2 1/2 ounces of honey, pour it into a 16 oz. bottle and fill the bottle with plain granulated sugar or strained honey. Thus you make 8 ounces of better remedy than you could buy ready-made for three times the price. It never spoils and tastes so good that children like it. Not only does this simple mixture soothe and heal the inflamed throat membranes but it is the active agent of creosote, in a readily palatable form. Nothing known in medicine is more helpful in cases of discharging coughs, chest colds, and bronchial trouble. Do not accept a substitute for Pinex. It is guaranteed to give prompt relief or your money refunded.
