BURKE LOSES KING'S PRIZE BY ONE POINT

(Canadian Press) BISLEY CAMP, July 16.—By only one point, Lieut. Desmond Burke of Ottawa lost the highest honors for marksmanship that the Empire can bestow, in the final of the King's prize today. The winner was Captain Vernon formerly of the Royal Army Medical Corps with an aggregate of 292. Burke's aggregate was 291. Burke might have repeated his victory of 1924 had he scored just one more point in the second of the two distances in the finals, it was this distance 1,000 yards, the longest of the whole shoot, which cost him the prize. In this he scored 70 out of 75. The King Prize of \$1,250, The National Rifle Association, Gold Medal and Gold Badge go to Captain Vernon. Burke finished second among the hundred finalists, to win \$250 and the National Rifle Badge.

Trainer Mauled When Lions Escape

KINGSTON, Ont., July 16.—Two large Nubian lions escaped from the Sells-Floto circus here last night and before they were recaptured Harry Mencken, one of the animal trainers, was badly mauled. The animals escaped as they were being returned with ten others to their cage following an exhibition in the big tent. One was quickly recaptured but the other made its way under the seats of the crowd, noticed, fortunately by only a few persons, and dashed to the street. The side walls of the tent were dismantled and used as a net in rounding up the beast. All available circus employees and police joined in the hunt and with the aid of searchlights succeeded in cornering the lion on one of the principal streets of the city. Mencken was clawed by the animal when endeavoring to secure it in the tent. His injuries are not regarded as very serious. There was no panic among the audience.

Brothers Drown When Swimming

EDMUNDSTON, N. B., July 16.—Two sons of E. D. Ethier, Bernard and Kenneth, aged 12 and 15 years, respectively, were drowned while swimming in the St. John River here this morning. It seems that the two boys went over to the American side of the river for a swim, about a half mile above Edmundston. The younger brother, Bernard jumped off a boom in an attempt to cross the approximately fifty yards to the shore but struck a whirlpool about half way out. He immediately called upon his brother, Kenneth, for help. The latter, who was standing on the boom watching his brother, forthwith set out to rescue the latter. When almost within reach of the shore however, it was noticed that both boys were unable to go farther and, before help could be tendered, both went under.

Order Restored In Vienna

(Special to the Guardian) LONDON, July 16.—The Australian minister announced today he had received an official telegram from Vienna stating that order had been restored. The situation is now well in the hands of the authorities and all possible precautions have been taken to prevent further disturbances, the announcement added. No private property was damaged in yesterday's riots it is said. LONDON, July 16.—A Turin despatch to the Daily Mail filed at 14:30 p. m. said that it was reported from Vienna that a "red dictatorship" had been proclaimed in Austria. The despatch said that messages received from Vienna at 5 o'clock this evening reported that 100 persons had been killed and 200 wounded in the rioting today. Many of the wounded are not expected to live. Notwithstanding the socialist claim that the rioting was in protest against the acquittal of former soldiers charged with murdering a socialist, the despatch says that it was really a coup d'etat which had been long planned, and that the army apparently made common cause with the socialists.

ANNUAL BUSINESS MEETING OF POTATO GROWERS' ASSOC.

The Annual Business Meeting of the Potato Growers' Association was held Saturday with a very large attendance despite adverse weather. The picnic, and inspection of the Experimental Farm which was scheduled for the morning could not be carried out to the extent proposed on account of the rain but yet through the kindness of Superintendent Clark, tables were arranged in the barn and a hearty dinner participated in. In the afternoon at 1:30 matters pertaining to the Association were discussed and carried out in the Prince of Wales College Hall with Mr. A. E. Dewar, president, in the chair. The attendance here was very large. The meeting having been opened by the chairman, the Secretary, Mr. Wilfred Boulter read the minutes of the last meeting which were on motion adopted. After the appointment of a resolution committee and a committee to take nominations, Mr. Boulter read the financial statement explaining in detail each item. The assets, liabilities and summary of work of the Association were submitted as follows:

FINANCIAL STATEMENT For the Year ending June 30, 1927. Assets: Accounts receivable: Local distributors' Ledger No. 1 \$ 5,137.41 Foreign dealers' Ledger No. 2 1,779.75 Growers' Ledger 4,903.48 Bank Balance, June 30, 1927 10,967.63 Total \$22,788.32 Liabilities: Due Growers 327.89 Outstanding accounts 3,200.00 Credit balance 19,260.43 Credit Balance—\$19,260.43

Summary of Association Work 880,283 bushels Potatoes \$1,011,396.00 20,870 tons Fertilizer 590,600.16 Insecticides 25,181.49 Bags 63,872.15 Scales, graders, dusters 2,836.84 Total \$1,693,886.53

The accounts as read by the secretary were on motion approved. Mr. Wilfred Boulter, Secretary of the Association addressed the meeting, speaking of the success with which the potato crop of last year was moved at a pool price higher than was expected. He commented upon the difficulty of making a forecast of this year's crop, but stated that there is nothing to indicate that the market for potatoes will not be healthy. It is the policy, he said, to rush the market during the months of November and December. He thought, that if an average distribution could be made, more could be realized than by placing the bulk of the crop upon the market early in the season. He informed the meeting of the advisability of making some provision for fall and winter storage. The resolution committee then submitted the following resolutions: Resolved that we, the members of the P. E. I. Potato Growers' Association wish to put on record, our appreciation of the efficient manner the certified seed inspection was carried on in this province, by the Dominion Division of Botany. That this Annual Meeting of the P. E. I. Potato Growers' Association approve the action of the Directors in cancelling the contracts of the members who sell or have sold their certified seed potatoes outside the Association without first having obtained permission to do so from the Association and also approve their action in refusing to make new contracts in place of the cancelled ones. Whereas the market is yearly asking for a better quality and grade of Table Stock Potatoes and whereas this improvement can only be effected by careful inspection. Therefore Resolved that we, the Potato Growers' Association express our approval of the steps being taken by the Fruit Division, Ottawa, to give a more efficient inspection of Table-stock and would respectfully ask that this inspection be continued. Resolved that we, the Members of the P. E. I. Potato Growers' Association here assembled, wish to place ourselves on record as viewing with alarm, the shipping of P. E. I. Island potatoes for seed, other than the Certified article. Further resolved that any dealer within this province, shipping the so called "Selected Seed" will be looked upon as an enemy of the Potato Industry. Dr. Gusson, Dominion Botanist, Mr. Peppin of the Pathological Laboratory, Experimental Farm and C. C. Thompson, local agent of the Southgate Produce Buyers, addressed the meeting. Mr. Peppin during the course of his address stated that there is 25-305 acres of potatoes under inspection this year, while last year there were only something over 9,000. Prince County alone, this year has more than did the whole Island last year. A vote of thanks was tendered the speakers and Superintendent Clark.

STRIKE OF C.N. EMPLOYEES AVERTED

Settlement Arrived at, Says Hon. Peter Heenan, Minister of Labor—All Danger Past. (Canadian Press) KENORA, Ont., July 16.—A basis of settlement has been arrived at and the danger of a strike is past. Mr. Heenan stated when interviewed at his home today. The dispute between the employees and the railway management involved freight handlers, clerks and checkers. It has been of long standing and concerned wage and working condition schedules. The workers accepted a four cents an hour increase in wages recommended by a conciliation board, but the award was not acceptable to the Canadian National management. Negotiations followed, and the ceremony compromised offering general increases of two and a half cents an hour. This the men refused, and a strike vote, which a few days ago was reported in process of tabulation was taken. Throughout the negotiations, the federal department of labor has been actively engaged in efforts to bring about a settlement. In the interview today, Mr. Heenan stated that he had been in close touch with representatives of the men and company, and had made suggestions with a view of getting them together. The basis of settlement was not made known by the minister of labor.

Defends Old-Time Mud-Wall Cottages

(Canadian Press) LONDON, July 16.—Thomas Hardy, poet and novelist, writing in the Journal "The Arts and Crafts" in support of an appeal for the Preservation of Ancient Cottages by the Royal Society of Arts, makes a characteristic defence of the old mud-wall cottages as dwelling-houses and describes how he saw one built: "In this district," he says, "they continue to be built in the old style down to about the middle of the last century, when they were ousted by the now obnoxious brick and slate. By the merest chance I was able, when a child, to see the building of what was probably one of the last of these old-fashioned cottages of mud-wall and thatch. What was called a mud-wall was really a composition of chalk, clay and straw, and had no concrete brick. This was mixed up into a sort of a dough-pudding close to where the cottage was to be built. The mixing was performed by treading and shovelling, women sometimes being called in to tread. The straw was added to bind the mass together, a process that had doubtless gone on since the days of Israel in Egypt and earlier. "I would, therefore, urge, on many as are left of their old cottages remain where they are, and to repair them instead of replacing them with bricks, since, apart from their warmth and dryness, they have almost always great beauty and charm. Not only so, but I would suggest that their construction might be imitated when rebuilding is absolutely necessary."
