Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

THE CENTAUR COMPANY, NEW YORK CITY

Notes Aient The Exhibition

Encouragement! That is the word which expresses the idea derived from the Provincial Exhibition of last week. Compared with the exhibitions of former years, there was a marked improvement, particularly in the exhibits of cattle, swine, poultry and fruit—those things by the production of which the prosperity of this Island is chiefly to be promoted. The competition of exhibitors from other provinces, and the excellence of the quality of their exhibits, made assurance as to the quality of the products of this Province doubly sure. These latter products were found to be equal to the best that can be produced by the larger provinces. The demonstration was beyond doubt or question. In respect to those products constantly demanded by the markets, the people of Prince Edward Island can, if they choose, compete on an equality with those of any other province, and may in the future command the best prices that the markets afford.

Having seen what the few who have bred and cultivated of the best breeds and varieties have accomplished, the many who attended the exhibition cannot but be encouraged to do likewise. In the production of animals and other products of the farm to the highest degree of quality and quantity lies the certainty of prosperity for individuals in the province, and for the province as a whole. The exhibition of 1922 shows that these results can be gained by farmers and gardeners who live here.

No doubt there is yet on the part of the young and thoughtless too much of contempt for the farm and the things of the farm. "There's nothing here only cows," was the remark of a city boy who, with a number of his pals, was passing through one of the cattle sheds in which were housed some of the best producers of milk and cream, butter and cheese, in all Canada. The value of cows ought to be instilled into the minds of such youngsters. The fact that cows of the right kinds bring to them and to their country much of the wealth which is enjoyed in this favored part of Canada, and that more cows of a quality equal to those on exhibition will bring more wealth, is a fact to be learned, marked and inwardly digested by the boys of this island, and by all sorts and conditions of the people who live here.

The value of horses having been to some extent discounted by the introduction of the auto, the motor truck and farm motors of various kinds, the value of the cow is the more to be appreciated. The numerous exhibitors of cows are to be congratulated on the prizes they have won at the exhibition, and more than that, on the success of their efforts to obtain by careful breeding the cows that give milk of high quality in large quantities.

The Ayreshires, Holsteins, Jerseys and Guernseys on exhibition received credit upon their owners and upon the province in which they were bred. Nor are the beef cattle to be overlooked. The number of Shortborns, the white-faced, smooth-coated Herefords, and the polled Angus cattle on exhibition would make a creditable show in any exhibition. Farmers who need help and cannot easily obtain it, do well to devote their attention to the cattle which supply the best beef at the least cost.

The exhibition has again demonstrated the fact that swine of all best breeds are produced here. Admirable examples of Tamworths, Berks and White Chesters were shown. The value of these animals as money-makers, is beyond computation. In the Old Country and in the new there will, so long as there are men and women there, continue to be a demand for hog products; and farmers who raise hogs need not fear that more or less profitable prices will always be obtained for them. The pork factories here and the recently improved means of communication with the trans-Atlantic markets, place the Island in a condition rather better than that of equality of competition with the Western States and other countries further distant from the great centres of pork consumption.

The same favorable condition prevails in respect to the products of our poultry. We can compete on terms approximately to equality with Ontario, Quebec and the provinces further West. Now that the United States have set up a wall of Protection against the products of our farmers, our chief resource is the Old Country markets, and those of the West Indies and other British Dominions. Advantageously situated as to these we need not greatly worry about the loss of the markets in the United States. The farmers there will, of course, have the larger home demand to supply and they will therefore be unable to compete as sharply in the British, West Indians and foreign markets—so there will be found in these markets a stronger demand and better prices, by which our merchants and farmers may profit.

The exhibition demonstrated again that there can be produced in this Island province apples, plums, pears, etc., just as large and just as good in every respect as those produced in the far-famed Annapolis Valley. Whether or not it would pay to grow such fruit here on a large scale for the market, abroad is still a moot question. But, at all events, it has been shown that excellent fruit for home consumption can be produced in the orchards of farmers who take the trouble to cultivate excellent varieties suitable to our soil and climate. Every P. E. Island farmer who may have a small orchard, and so obtain delicious wholesome fruit without having to pay money for it.

The managers of the exhibition, the President, Secretary and Directors, deserve credit for the continued and increasing excellence of

"Old friends are best"—RED ROSE TEA has a multitude of them—often three generations in one family.

RED ROSE COFFEE is always packed fresh in doubly sealed cans.

their arrangements. Every succeeding year the experience of past years is made the test for some improvement. This year the fruit and flowers were shown to better advantage than ever before, and that without disadvantage to any other exhibit. All the stock was comfortably housed, though the number of cattle on exhibition was in excess of that of any other year. There were few complaints this year, and very few causes of complaint, while there were in the exhibition as a whole many improvements to be commended. The number of equipages on the road to the races in England nearly a century ago was, to the mind of Sam Slick, an unmistakable proof that the man who drives an auto while under the influence of even one glass of intoxicating liquor, commits a crime. W.L.C.

COVERING FRUIT JARS

Cotton dipped in a thin paste of egg-white and flour makes a reliable covering for preserved fruits, etc. It is so-d-d either with or without the additional use of paraffin.

A Fuel Saving Secret

This is a message to conscientious housewives, and a piece of advice to all.

The shortage and high price of cooking fuel has brought to light many things which might never have been known otherwise. Here is one thing, for instance. Did you know that good enameled ware cooking utensils heat more quickly than utensils made of metal, such as copper, brass or aluminum? It's true. Try it!

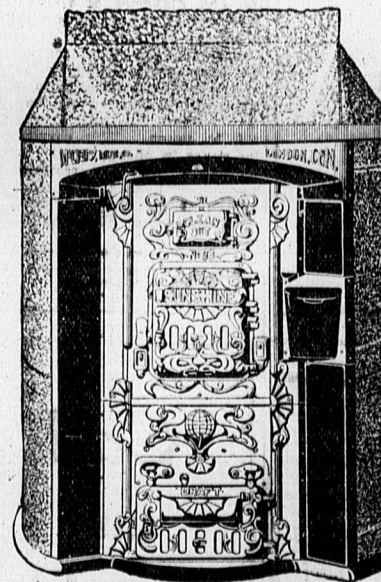

Take a good grade of enameled ware saucepan, and a similar sized saucepan made of copper, aluminum or brass. Put two quarts of cold water into each. Set them on the fire and time them—see how long it takes each to boil. Over a moderate heat, water in the enameled ware saucepan will boil in approximately ten minutes. But the water in the all-metal saucepan, with the same heat will take approximately eighteen minutes—almost double the time—to come to the boil!

Think of the wasted heat and the amount of wasted money it

must represent! Just figure what this would run into in a year!

Use enameled ware utensils for cooking and save heat and money. Don't purchase cheap, flimsy enameled ware. Get the best, either Diamond Ware, which is sky blue and white outside with a snowy-white lining, or Pearl Ware, which is a beautiful pearly grey and white mottle inside and out. Another enameled ware of really super qualities is snow-white outside and inside with deep blue trimmings. It is called Crystal Ware and is now used in many of Canada's finest homes.

All three of these wares carry a green and red shield shape SMP trade mark on every utensil. Don't buy enameled ware unless it carries one of these trade marks. You can buy SMP Crystal Ware, Diamond Ware or Pearl Ware at any hardware store. Don't accept substitutes.

"SOFCO"

SUNSHINE ONE REGISTER PIPELESS FURNACE

Means summer warmth the whole winter through

McCLARY'S One Register Pipeless System is most economical of fuel. As the register is directly above the furnace every unit of heat passes directly to the rooms to be heated. The cool air is removed from the house as the warm air enters, therefore there is no resistance to the heat circulation and no energy is wasted. The circulation of the air is free throughout the house, doing away with all the friction and pockets which help to retard the circulation of the warm air. The furnace is insulated by the cold air between the outside and inside casings, therefore no heat can escape in the basement. This is most important where a cool cellar is desired for fruit and vegetables. It is obvious that for houses already built the One Register Pipeless System is the ideal installation. The minimum excavation necessary is 6 ft. square by 6 ft. deep instead of under the whole house. It can be installed for very little more money than the old-fashioned Base-Burner.

The "SOFCO" Sunshine Furnace burns hard or soft coal, coke, wood, or any thing that is combustible as it has a CAST-IRON fire-pot on which the intensest heat has little effect.

Its strength and massive construction, its generous proportions make a heating plant for a lifetime's service.

No. 81 "SOFCO" Heating Capacity 15,000 ft. Price \$160.00

No. 93 "SOFCO" Heating Capacity 25,000 ft. Price \$225.00

RADIUM ONE REGISTER PIPELESS FURNACE

McCLARY'S RADIUM pipeless furnace is made to meet the demand for a moderate priced heating plant. It is made with a steel fire-pot for the use of hard coal or wood only, and everything that can be said of the "SOFCO" Sunshine applies equally to the RADIUM.

No. 316 Radium, Heating Capacity 10,000 ft. Price \$125.00

No. 419 Radium, Heating Capacity 14,000 ft. Price \$148.00

No. 421 Radium, Heating Capacity 18,000 ft. Price \$177.50

16B. Bungalow Radium, Heating Capacity 8,000 ft. Price \$110.00
