Neglected Anaemia

Often Leads to a Dry-line—Enrich the Blood by Taking D. Williams' Pink Pills.

In their early teens it is quite common for girls to outgrow their strength, and mothers should carefully watch the health of their daughters at this time, for it is when strength is sapped by rapid growth that anaemia develops. The first signs may be noticed by peevishness, languor and headaches. The face grows pale, breathlessness and palpitation follow, with low spirits.

At the first symptom of anaemia mothers should act at once. Neglected anaemia often leads to decline, but if you see that your daughters blood is enriched there need be no cause for anxiety. The finest blood enricher ever discovered is Dr. Williams' Pink Pills. The pure, red blood created by these pills will quickly banish all signs of anaemia. They will build up your girl's health and ensure her a robust girlhood. Give your daughter a course of Dr. Williams' Pink Pills now. Make her strong like thousands of girls who have been rescued from the clutches of anaemia by Dr. Williams' Pink Pills. Here is a bit of proof. Miss Mary Venditti, Catamont, N. B. says:—

"Three years ago while attending a convent, I studied very hard to graduate. The result was I became very nervous and got so thin and pale my teachers thought they would send me home. I took different kinds of medicine which my parents sent me, but my condition remained unchanged. At last one of my teachers gave me a box of Dr. Williams' Pink Pills, and I had hardly finished it when I could feel an improvement in my condition. I continued the use of the pills for some time longer, and I can hardly tell all the good they did me. I gained in strength and weight, and the color returned to my cheeks, and at the end of the term I graduated. I never fail to recommend Dr. Williams' Pink Pills to my friends and acquaintances when a tonic is needed."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wales' Power Station Huge

The huge hydroelectric power station, which will supply power to all of North Wales, was opened recently at Maentwrog, Wales. The cost of the project was \$10,000,000. The huge reservoir was created by the damming of the River Ffryor, and covers lands on which flourishing farms, dwelling houses, an historic chapel, and other buildings stood. The three generators have a total capacity of 18,000 kilowatts.

DO NOT FOLLOW THE BEES' EXAMPLE

(Experimental Farms Note)

Although the honey-bee is a model of industry during the summer time, her example during the winter months is one that should not be followed by the beekeeper himself, no matter how great the inclination is to do so.

After being fed and snugly packed away in winter quarters, the bees have no preparations to make for the following season; such, however, is not the case with the beekeeper. The active season of spring and summer usually opens with a rush, and the wise beekeeper is ready to meet it with everything prepared to satisfy the needs of the bees when they resume their activities in the spring. There is much that the beekeeper can do during the winter time to relieve the pressure of work and anxiety of the summer. Nothing is more disheartening, when bees are swarming, and nectar coming in rapidly, than to find a shortage of equipment to take care of the situation. Such a condition is too often clearly paid for in dollars and cents. One day's delay may cause the loss of a ten pound pail of honey for each and every colony in the apiary, and, furthermore, it may take at least a week to secure and prepare the supplies that could have been obtained and prepared during the winter. Beekeepers, don't go dormant for the winter, just because the bee does, check up your equip-

PAY-AS-YOU-GO HITS BOOSTERS

How to construct auto highways in Ethiopia is a problem being discussed by good-roads boosters of the Abyssinian country. Labor is plentiful and cheap, and the country is rich in products, but there is no way to raise funds. The government has no public debts and has never borrowed money, and would not consider a bond issue or any other method of getting into debt. Foreign capital and enterprise may be necessary to solve the problem.
