

Dalhousie University
Halifax, Nova Scotia

Arts, Science, Commerce, Music, Pharmacy, Fisheries, Engineering, Household Science, Education, Law, Medicine, Dentistry

Entrance Scholarships:
Classics (Each two Scholarships) Mathematics (one \$500, one \$400). For boys only. Full particulars on request.

Five Scholarships of value \$250 to \$100 awarded on results of matriculation examinations, Sept. 26-29, 1933.

Also three special \$200 Scholarships.

First, Second and Third Year Scholarships.

Graduate Fellowships.
University Aid and Loan Funds.

Registration—Arts and Science, September 26th for new students from Halifax and Dartmouth; September 26th for other new students; September 27th to 30th (12 o'clock noon) for other than new students.

Law, Medicine and Dentistry, September 12th and 13th.

For full information apply to the Registrar.

REVISITS THE SUMMERSIDE GUARDIAN and Prince County Chronicle

Mr. Acton Burrows Welcomed on 10th Visit to Island Province

Among the welcome visitors to the Province this week is the veteran Editor and President of the Canadian Railway and Marine World, Mr. Acton Burrows, Toronto, who has been coming to the North Shore off and on since 1883, this being his tenth visit. He intends spending a well-earned holiday at Gregor's, Brackley Beach, where his daughter-in-law, Mrs. Aubrey A. Burrows, and young son have been guests since last month. Mr. Burrows thinks there is no place like the North Shore for a vacation, and having spent ten summers there he should know. After having tried out practically all other resorts in the Maritimes and Quebec he is thoroughly convinced that there is nothing to equal Prince Edward Island as an ideal health resort; at any rate he has come back to his first love and asserts that in future there will be no other summer vacation ground for him than the delightful sandy beaches of Brackley.

Mr. Burrows is optimistic regarding the "come back" of Canada, though he realizes that it will be absolutely necessary to cut trenchantly both Dominion and Provincial expenditures before the foundation of real and lasting prosperity can be well and truly laid. Regarding tourist trade, Mr. Burrows considers that it would be a distinct improvement if the railway were to run a compartment car from Montreal to Charlottetown in place of the present corridor. He is sure it would attract many more tourists who like to travel in comfort with all the necessary conveniences enjoyed en route to fashionable resorts. He promises to take this matter up with the railway authorities on his return journey.

Mr. Burrows is very favorably impressed with the Canadian National Hotel, where he stayed overnight, and thinks it an invaluable asset to the Province. He was pleased to see evidence of the development of the motor bus service. He himself has been for 15 years Vice President of the Canadian Transit Association, formerly the Electric Railway Association, which was reorganized to include the steadily increasing number of motor bus services in the various provinces.

The Canadian Railway and Marine World of which Mr. Burrows, as stated, is Editor and President and his son Manager and Vice-President, is the leading periodical of its kind in Canada and enjoys liberal subscription and advertising patronage throughout the Dominion.

The Lady—I hope you can fix poor Tabby up.

The Vet—What are her symptoms?

The Lady—She seems to have insomnia; she doesn't sleep nights.

The Vet—Tabby is in perfect health, madam; only a sick cat sleeps nights.

—SLIGHT FIRE.—The Summerside firemen were called out at noon on Monday for a fire at the residence of Mr. Alexander Jamieson on Granville Street. The fire was quickly put out and not a great deal of damage done.—S.

—SAD BEREAVEMENT.—There passed away on Monday at her home in Wellington, Mrs. Charles Ayres at the age of 41 years. Mrs. Ayres was formerly Miss Goodman and a life long resident of the district and her early demise has left a gap in the home and community which will be hard to fill. Mrs. Ayres had been ill for some time. During her illness she had been attended by her pastor, Rev. Urban Gillis, and loving hands administered to her to make these closing days as pleasant as possible. She leaves to mourn a sorrowing husband and small family to whom the sympathy of all is extended. The funeral took place on Tuesday at nine o'clock from her late home to the R. O. Church and cemetery at Wellington. Rev. Urban Gillis officiating.—S.

CROSS ROADS SCHOOL

A large number of parents and visitors attended the closing exercises of Cross Roads School, which were held on June 29th. The pupils were examined in several subjects by Mrs. W. E. MacCallum and Mr. Alfred MacNeill, after which the teacher, Miss Doull, conducted a geography match, in which both visitors and pupils showed great interest. Prizes, donated by the MacDonald Women's Institute, were then presented to the following pupils:

For General Proficiency: Grade X—Frances Reeves, Malcolm Reeves, Guy Kennedy. Grade IX—Claude Wood. Grade VIII—Austin MacCallum. Grade IV—Louise MacNeill, Norma MacCallum. Grade III (Sr.)—Alicia Jenkins, Blair MacCallum. Grade III (Jr.)—Clive Stewart, Murdoch Molyneux. For Application—Isabel MacKinnon.

PERSONALS

—Mrs. Frank McDonald of Halifax, N. S., and Miss Jean Aitken of Regina, are visiting their sister, Mrs. Clarence Harris of Summerside. They will also visit friends in Georgetown.—S.

HOUSEHOLD TIPS

When making starch, if a small piece of lard is dissolved in it when hot the iron will not stick.

Pianos should be opened up and brushed out at the bottom and the keys cleaned with the bellows.

When ironing, keep beside you an old perfume spray containing water, to be applied to any part that has become too dry. This gives the even dampness and perfect condition necessary for a pleasing finish.

Varnish should be warmed slightly before applying. This diminishes the strong pull which the brush has on the varnish in its cold state.

Steel articles will polish quickly if they are rubbed with vinegar and then polished with a soft duster.

If the edge of a saucepan is well buttered, the contents will not boil over.

Beeswax mixed with salt will make a rusty flat iron as smooth as glass.

To discourage flies and moths, keep fresh cloves in small vases or in egg cups.

BE HEALTHY IF YOU WOULD BE BEAUTIFUL

Be healthy and the chances are two to one that you'll be beautiful! When your body is well taken care of and extremely healthy it naturally follows that your complexion, hair, eyes and everything else will be more attractive.

One thing which may cause your hair to grow dull and lifeless and your skin muddy and dingy is an unhealthy body.

There are a few simple health rules that take practically no time and entail very little expense.

Do you drink ten glasses of water each day? You should. And two of them should be taken when you get up in the morning. Sometimes the juice of half a lemon in each glass will make the drink more palatable.

However, if for one reason or another lemon juice doesn't strike your fancy, drink the two glasses of plain water anyway.

Brushing your teeth twice a day and seeing your dentist frequently is a health habit which pays big dividends. You can't have glistening, beautiful teeth if they are not clean. Cavities which are not attended to will cause all sorts of physical disorders.

You need fresh air and exercise. Why not combine these two health habits by taking brisk walks in the open air?

Plenty of sleep is necessary to health and beauty. Get nine hours very night if you can. Eight hours is positively necessary. Sleeping on a comfortable bed, the windows wide open, will do much toward making your eyes shiny and your complexion clear and flawless.

—SUMMERSIDE POLICE COURT.—Two drunks appeared before Stipendiary E. H. Strong, K.O., on Monday morning and were fined \$3.00 and costs each.—S.

—STREET COMMENCED.—The Warren Paving Company have commenced their work of paving Spring Street, Summerside. All the work of preparation of materials is done on the land rented from the town at the east of the town, which is a scene of great activity.—S.

—FARM FOR SALE.—One hundred acres of land in excellent condition. Situated on the Lower Montague Road about one mile from Montague. Apply to Hugh A. Campbell.

—ALL INTERESTED in cleaning the Brooklyn Cemetery are requested to meet there Tuesday morning Aug. 8th. Bring tools. Donations from those who cannot attend. By order of Trustees, C. W. Hume, Secy. Treas. 12-13-dtd.

—MIRAND'S LINIMENT FOR COLDS.

Baby Goes Rising

Mrs. mothers know the immense benefit to their children of fresh air and sunshine, and take their little ones out whenever they can.

When using a new baby carriage choose one of plain design. It will look smarter, wear better, and be easier to keep clean than a more fancy pattern. See that it is well-sprung and not too heavy; well-balanced for safety and easy to push. In addition to its waterproof hood for rain and rough winds, a sun canopy is a necessity.

Baby's carriage needs cleaning frequently, for dust and grime are dangerous and hold all sorts of infection picked up from the air and the dust of the streets. A pram in constant use in all weathers gets very dirty. Dust and sooty particles settle in every nook and crevice, and the clinging damp leaves a sticky film over it. Where there's dirt there's danger for it needs but a puff of wind to dislodge the dust, to be breathed into baby's delicate lungs. And when, in scrambling about in his pram, his warm hands come in contact with his soiled edges, it is almost inevitable that he should eventually transfer this germ-laden grime to his mouth.

To be on the safe side, keep the pram well dusted inside and out, and brush the hood and canopy at frequent intervals. When you get indoors, wipe it over with a chamolise leather if wet, finishing with a soft cloth. About once a week go over the inside, including the well, with warm water. Keep the straps and buckles scrupulously clean, for children delight in sucking and chewing them, and will manage to do so when left to themselves for a moment.

Air the mattress and pillows frequently, and when the covers become soiled, replace with freshly washed ones.

RADIANCE GAINED BY OUT-DOOR GIRL

There's nothing like fresh air to give a girl radiance. Fresh air doesn't trickle down into the cellar of the lungs unless the body is active, getting some form of exercise.

The femme who is an outdoor fan has about her a freshness and exhilaration that little Laxy Bones never displays.

Swimming, walking, golf, tennis—there are any number of ways of getting exercise that isn't a bore. If exercise inspires mental interest it is of more benefit, naturally it stimulates spirits as well as blood streams and body fibers.

DAYS OF EXQUISITE FRAGILITY AGAIN HERE

Styles have made woman unapproachable once more. The days of exquisite fragility are again here. The reason we speak so advisedly is because we've seen the concrete evidence. At a celebrated social function in a well known Paris restaurant was a gathering of "those who matter". The place was brilliantly decorated.

But the charm of the surroundings was dimmed by the gowns of the women. Like exquisite fluttering butterflies, huge ruffles around the neck, masses of crisp organdie outlining the sleeves, they gave in completely to that delicate frailness women lost during the period of straight and mannish clothes.

Certain definite things are to be noted. There is a marked absence of jewelry save that costume sort which really is a part of the gown as trimming. Due to the ornateness and bouffant draping of material, coats are impossible except those made to match the dress. You can't crush a balloon sleeve in a normal coat. Feathers are found everywhere, but either the flat cock ones as shawls, capes and jackets, or the fluffy ostrich feather boas that are so Gay Ninety-ish.

—SUBSCRIPTIONS to The Charlottetown Guardian may be handed to their Rep. Archie Hume, or left at H. J. Mabon's Drug Store, Montague. 12-13-dtd.

—ALL INTERESTED in cleaning the Brooklyn Cemetery are requested to meet there Tuesday morning Aug. 8th. Bring tools. Donations from those who cannot attend. By order of Trustees, C. W. Hume, Secy. Treas. 12-13-dtd.

COOKERY HINTS

Even a fairly experienced cook cannot hope to know all those little worthwhile hints which make such a difference when cooking. Here, then, are some "reminders" which may be new to somebody!

When cooking sausages don't prick them. Roll them in flour and fry them in a pan only very lightly smeared with fat. They ought not to break open treated like this. If they do it shows they have too much bread in them.

Again do not prick potatoes that are baking to see if they are done. It is better to try them by pinching as pricking lets out steam and retards cooking.

A Sugary Problem

It is much better to use fine or moist sugar for cakes. Granulated sugar is apt to burn the crust hard. To prevent cakes from breaking when turning them out of the tin leave them in the tin for about five minutes after removing them from the oven, then there will be little fear of their breaking.

When scrambling eggs do not add milk. They will be much lighter if a little cold water is used instead. Cook them slowly on the lowest possible gas jet, and stir very gently all the time. The eggs do not want whisking first, only stirring round just to mix whites and yolks together.

A dash of water—cold or warm as you like—makes an omelette light also. And here again, the eggs need mixing for only a minute or so just before putting them into the pan. Also use butter for an omelette—you do not want very much.

Another dish for which butter should be used is when frying the ingredients for a curry. Always fry the curry powder in the pan after

COOKERY HINTS

you have fried your onions. This is, indeed, the secret of real curry. Otherwise it will be a sort of hash flavoured with curry; not at all the right color or flavor.

To get all the juice from a lemon always warm it before squeezing. Oranges and tomatoes should be plunged into boiling water for a minute or so before being peeled for cooking purposes.

To Be Prepared Beforehand

Never leave the making of any sort of batter until you are ready to cook it. It should be well beaten and then left for at least an hour. Ordinarily pastry is also much lighter if left some time ready mixed before rolling and making up. I have known some good cooks who always make it over-night and cover it up in a basin to use the next morning.

Currants and so on should be washed some time before using, as damp fruit makes a cake or pudding heavy. If wanted at once rub thoroughly in flour instead of washing.

When mixing pastry always use as little water as you can; the less used the better. A wet crust will stand being damper.

Always start soup with cold water to extract the juices for it. Salt meat also should be put on in cold water. Fresh meat, if to be served

COOKERY HINTS

at table with sauce, should be put on in boiling water. This will contract the outside, and keep in the juices. Always add hot, never cold, water. If more is needed when cooking.

It's easier to water summer flower beds and window boxes with a regular garden hose instead of a sprinkling pot. You cover more surface in less time. Besides, the spray from the hose helps to destroy small insects.

Powerful Medicine—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

Bringing Up Father

IT SEEMED STRANGE HOW QUICKLY JIGGS CONSENTED TO GO TO THE CHICAGO FAIR WHEN I SUGGESTED FOR US TO GO. I'LL JUST BET HE KNEW THAT DINTY MOORE WAS IN CHICAGO.

SO THERE YOU ARE—I SUPPOSE YOU THINK I DON'T KNOW WHY YOU ARE SO ANXIOUS TO GO TO CHICAGO?

WELL, I PHONED AND FOUND OUT THAT DINTY MOORE HAS GONE TO THE FAIR AT CHICAGO.

IS THAT SO? NO WONDER I COULDN'T FIND HIM—I DIDN'T KNOW THAT I'M GLAD YOU TOLD ME.

WHAT A FOOL I WAS TO SPILL THE BEANS—NOW WE'LL LOOK HIM UP.

By George M. ...
