EYE STRAIN

The correction for eyestrain and its defects is through application of suitable glasses, the reason being that not disease but mechanical defect is to be overcome in the eye or its controlling muscles. Thus the right glasses counteract the defects, eliminate the "Strain" and leave nature to heal the hitherto resulting troubles and disorders.

Thousands suffer from Eye Strain without knowing the fact. They see well and are not aware that a ruinous expenditure of nerve force alone enables the eyes to triumph over existing defects and serve obediently.

Children are frequent sufferers from Eye Strain, arising from wholly unsuspected defects of vision. Squint (or cross eye) is due to defective vision, and unerringly indicates Eye Strain. The right glasses worn in time will correct both, while, if neglected, the squinting eye gradually loses its acuteness of vision and finally only an operation will mitigate the evil. Every child's eyes should be thoroughly examined before entering school.

Union Bank of Canada

The establishment of the Union Bank of Canada at Charlottetown is particularly notable as it rounds out the Dominion wide chain of branches which the Bank has forged. Now for the first time the Union Bank of Canada is represented in every province and the Bank's service is immeasurably broadened. The Bank's opening here appears significant of the attitude of the directors toward the future of this province.

The extension to Prince Edward Island comes at a moment when the Union Bank of Canada is embarking upon a far-reaching program of extensions. Recently the Union Bank of Canada entered into what is probably the first working alliance consummated between an American and a Canadian Bank. With the National Park Bank of New York the Union Bank of Canada formed a \$2,000,000 foreign trade subsidiary, the "Park-Union Foreign Banking Corporation." This new formed corporation setting up branches in the Far East opens up the Oriental banking and trade field to Canadians as never before. "We consider this an important step in our efforts to build up an institution of an international character, which will provide a financial highway for our trade with foreign countries and give unrivalled service to our customers" was the statement of Mr. H. B. Shaw, general manager of the Union Bank, on his latest trip East.

Coupled with its opening at Charlottetown comes the interesting announcement that the Union Bank of Canada will open several new branches throughout the maritime provinces. These new branches are the result of recent investigations undertaken by Mr. B. B. Carter, Eastern Superintendent and Mr. S. E. Elkin, M. P. of St. John, who is one of the Eastern directors of the Union Bank of Canada and presumably at whose instigation the bank is developing a fresh interest in the "maritimes." It should not be forgotten either that Mr. Shaw, the General Manager, comes originally from Eastern Canada, he having been a native of Quebec City where he gained his first business experiences.

Mr. G. C. Temple of Warton who comes to Charlottetown as first manager for the Union Bank of Canada here, has a wide banking experience. Mr. J. W. Ryan, manager of the Halifax branch of the Union Bank, has been in Charlottetown attending to the preliminary details of the opening of this branch. Mr. Ryan has many friends on Prince Edward Island from previous residence here.

Do You Know

That we operate the only Lens Grinding Plant on P. E. Island?

That we employ a skilled Surface Grinder, and are daily grinding from the rough glass—the most complicated kinds of lenses?

Those are facts, which mean a good deal to the Glass wearing public, doing away with the annoying delays caused by sending away for special lenses.

Send your glasses in by mail, you'll get them back promptly and in perfect condition.

Call in and look over our plant.

The apartment that has been prepared for Commander and the Lady Patricia Ramsay in Paris is to be most charming and a great deal of the beautiful furniture and lacquer that were among the wedding presents are being sent over to adorn their home. The Lady Patricia inherits from her mother, the late Duchess of Connaught, a taste for antique furniture and fine old lacquer. The late Duchess was a keen furniture collector and when the Duke had his Irish command they managed to pick up a quantity of old satinwood furniture in Dublin, as well as some valuable old mahogany of the Chippendale period. One of the Duke of Connaught's special hobbies is the collection of glass. He has a practically priceless set of "stone" glass that he has spent years in making perfect.
