PRINCE EDWARD

Becky Sharp With Miriam Hopkins
Filmed in Technicolor
At The Prince Edward

Coming as an epochal event in the history of film entertainment, much heralded full color feature, "Becky Sharp," had its local premiere at the Prince Edward Theatre last night. The picture elicits expressions of admiration, wonder, gorgeous beauty, stunningly lifelike, the picture is all that has been claimed for it, and more.

"Becky Sharp," moreover, is far beyond being a mere pageant of gorgeous color. It is a gem of screen entertainment, sparkling with humor, wit and romance, and rich with drama. Perfectly cast, expertly directed by the gifted Goubert Mamoulian, and lavishly produced, it is a masterpiece of the art of the motion picture.

"Becky Sharp," starring in the title role, rises to heights in her characterization of the lovely, vivacious, and successful coquette. She has invested her role with life and understanding, to make the beautiful, wayward, Becky a character to linger long in the memory.

Miriam Hopkins, as Rowdon Crawley; Frances Dee, as Amelia Sedley; and Sir Cedric Hardwicke, as the Marquis de Streyne; are splendid in their roles. Other outstanding performances are given by Nigel Bruce, Guy Hunter, Sir E. H. Barker, Alison Skipworth, Colin Tapley and William Faversham.

"Becky Sharp," as most lovers of literature know, is the story of a willful and clever beauty, who uses her wiles to advance her social position and make a sweeping conquest of the hearts of men. True to the Thackeray story, the picture deals with the elite of the London society of the early nineteenth century.

Generous use is made in describing the settings, costumes and atmosphere of the production is fully justified. "Becky Sharp," however, is a picture that defies adequate description within limited space. It must be seen to appreciate and enjoy the beauty and fine picture can afford to miss it.

Health League Of Canada

(Organized by the Canadian Social Hygiene Council, 105 Bond St., Toronto)

One of the most outstanding pieces of promotion work ever attempted by a single individual in the development of national welfare in this country, has just been completed by Sir James Woods, President of the Gordon MacKay Company of Toronto. Sir James has written 7,500 personal letters to professional and business associates urging their support to the newly formed Health League of Canada in its efforts to carry forward a general campaign for health in Canada.

The Health League, which is to assume some of the Dominion-wide activities of the Social Hygiene Council, will have as one of its "most important objectives, the universal pasteurization of milk."

Sir James stated in that letter, in addition to the letter which emphasized his own personal feelings and convictions on the health problem, Sir James forwarded to each person, a copy of an address by Dr. Gordon Bates, General Director of the Health League of Canada, given before the Ontario Milk Distributors' Association, urging that each pay special attention to the facts contained in that address. Sir James concluded:

"Unfortunately, a very large proportion of our milk supply in Canada is still unpasteurized, with the result that the best of our foods—MILK—carries with it disease and death."

As an illustration of the difficulties faced by local health authorities and the apathy, or very often prejudice, of community leaders in matters of community importance, Dr. Gordon Bates, nationally known public health authority and General Director of the Health League of Canada, relates the following story. For obvious reasons the names must be omitted—though Ontario is the actual location.

"This village is beautifully situated and is a mecca for thousands of summer visitors. The milk for this popular resort is supplied by seven dairies of which one only supplies pasteurized milk. As a result it is patronized by a great majority of the visiting city folk—all of whom presumably believe in pasteurized milk."

"But as a bacteriological check-up reveals the fact that of all of the milk in town the so-called pasteurized milk makes the worst showing with a count which frequently runs up over a million."

"The Medical Officer of Health, at part-time official paid a pittance for duties so onerous he cannot possibly perform them, has not visited the pasteurizing plant for years. The milk inspector, a somewhat elderly gentleman, retired from another calling with no training whatever, can do little to remedy the situation. The newspaper editor who might do something to help mould public opinion happens to be the patient of the doctor. He says the doctor is the fellow but he's not so good on prevention."

"Urged to print a series of articles on pasteurization the editor refuses and the fact comes out that Mr. Editor does not believe in pasteurization. He thinks that much of the scare of microbes and bacteria is fanciful."

"Not far from the domicile of this intelligent editor is a boys' camp supported by the generous-hearted activities of an energetic Service Club which I shall not name. One of the major activities of the Service Club is the support of a Crippled Children's Committee which supplies splints and braces for crippled children. The same club supplies raw milk to the boys in their boys' camp. One of the great causes of crippling in children is, of course, bovine tuberculosis carried by raw milk. Comment is unnecessary."

"Did you know: One epidemic of typhoid fever in the City of Montreal resulted in 5,000 cases, 500 deaths and is estimated to have cost the Province of Quebec \$20,000,000—and that epidemic was traced to milk."

"Did you know: One epidemic of septic sore throat in Chicago, Ill., accounted for 10,000 cases and was traced to one single raw milk supply coming to that city."

"Did you know: That ordinary raw milk is responsible for from 25 per cent to 40 per cent of all diarrhoeal diseases of children during the hot summer months."

"Did you know: That milk-borne typhoid and paratyphoid fever, scarlet fever and septic sore throat had resulted in 48 epidemics of these diseases in Canada in 23 years, causing illness among 7,812 people and taking 681 lives."

"Did you realize: That one quart (40 fluid ounces) of milk is equal in food value to one pound of steak at 22 cents, 11 eggs averaging a cost of 83 cents, 3 pounds of fresh codfish at a cost of 40 cents, 2 1/2 pounds of chicken at an average cost of 50 cents, 1 pound of loin pork at 22 cents or \$1.00 worth of oysters? And that comparison does not include the essential vitamins A, B, C, D and E which milk contains."

edy the situation. The newspaper editor who might do something to help mould public opinion happens to be the patient of the doctor. He says the doctor is the fellow but he's not so good on prevention.

MRS. SYDNEY McLAREN

There passed away at her home at Montague on December 17, 1935, Evelyn, beloved wife of Sydney McLaren, a lingering illness. The deceased was forty-five years of age and was a daughter of the late Isaac Bears who predeceased her a couple of years ago.

Mrs. McLaren had been in poor health for the past ten years, but bore her suffering with wonderful courage and did not allow ill health to mar the sweetness of her disposition. She will always be remembered by her family and friends for her kind thoughtfulness and willingness to give help when needed.

Besides a sorrowing husband she leaves one son Alton to mourn his loss, also two brothers William and Bruce and two sisters, Mrs. Donald McLean and Mrs. A. E. McDonald all of Stoneham, Mass.; two sisters Mrs. F. J. Barnett, Boston; and Mrs. W. D. McEachern, Cardigan P.E.I. predeceased her. Funeral service was held at her late home on December 19, Rev. Arthur Long officiating. Interment took place at New Cemetery, Montague. Pall bearers were Messrs. M. P. McDonald, H. McGregor, W. Currie, E. D. Nicholson, H. Shaw—R.

SHE MIGHT BE YOU OR THE ONE YOU LOVE!

Today, shielded and sheltered! Tomorrow, her life shattered!

My Marriage

CLAIRE TREVOR
KENT TAYLOR
PAULINE FREDERICK
PAUL KELLY

ADDED... COMEDY AND NOVELTY TODAY and WEDNESDAY

DAILY 3:15 - 7:00 - 8:45 P. M.

MATINEE 11c-26c. EVENING 26c-32c.

CAPITOL

Claire Trevor In "My Marriage" At The Capitol

While society snubs her, sneers and lies about her, one girl fights a gallant battle to shield the blue-bloods from a scandal that would ruin them all!

Peering behind the headlines, the new picture, "My Marriage," brings a startling and daring romantic drama to the Capitol Theatre with Claire Trevor heading a stellar cast.

As the heroine of the picture, Miss Trevor is a girl who has been reared in the stronghold of society, happy, envied until a racketeer's bullet strikes her father down—reveals that he was a racketeer himself!

Although she seeks to run away from aristocratic young Kent Taylor, she eventually capitulates to his pleas that he marry her. His family, dominated by Pauline Frederick, who plays the mother, seems to welcome and shield her. But, all the while, they are working to destroy the romance.

Events come to a head rapidly when husband and wife are alienated, and Miss Trevor turns to Paul Kelly an old friend of her father, for aid.

In the startling climactic scenes, the girl comes face to face with the terror of the underworld, discovers the secret of her father's death—one that would shake society at its foundation—but conceals it for the love of her husband. The close of the film brings a reconciliation and a happy solution of the problem.

Helen Wood lovely Southern brunette, receives her first important assignment in "My Marriage," which also features Thomas Beck and Noel Madison.

Grade X, Jr.—1, Bernadette MacDonald; 2, Rita MacIntyre; 3, Russel MacIntyre.

Grade VII—1, Menadora MacDonald; 2, Theresa MacIntyre; 3, John Rose.

Grade V—1, Margaret Rose; 2, Hope Rose; 3, Alice Rea.

Grade III—1, Theresa MacDonald; 2, Audrey MacIntyre; 3, Josephine Thomas.

Grade II—1, Ivan MacIntyre; 2, Eileen Rea.

Grade I—Shirley MacKenzie; 2, David Egan; 3, James Egan.

The following received prizes at closing exercises in January for the highest standing in their classes: Grade X, Sr.—Rita MacDonald. Grade X, Jr.—Bernadette MacDonald.

Grade VII—Menadora MacDonald.

Grade V—Margaret Rose.

Grade III—Theresa MacDonald.

Grade II—Ivan MacIntyre.

Grade I—Shirley MacKenzie.

The highest attendance prize won by Rita MacIntyre.

John Egan, Teacher.

HOPE IS HELD FOR HEART ULCER CURE

JOHNSON CITY, N. Y., Feb. 10.—Dr. John W. P. Love, associate director of the Endicott Johnson Laboratory, yesterday told of a type of "cannibal" bacteria, with which he hopes to effect a cure for heart ulcers.

He disclosed that it had been used successfully in one recent case. Bacteria was rushed by steamship and airplane to Johannesburg, South Africa, and administered to a young patient suffering from an ulcerated heart.

Under Dr. Love's guidance, a "bacteriophage" has been fostered and enlarged in the laboratory. "Bacteriophage" is harmless to the human body. It feeds upon and destroys other types dangerous to human health.

Dr. Love said the bacteriophage is being used to treat persons between the ages of 18 and 35. He explained that the "cannibals," when put into the blood stream, feed on and eliminate other bacteria which cause the ulcerated condition.

STANLEY BRIDGE SCHOOL

Senior Department

Grade X—1, Nora Reid; 2, Isabel Reid; 3, Layton Marion Bell; 2, Ross MacEwen; 3, Vernon Bolger.

Grade VIII—1, Lea Reid; 2, Justin Reid; 3, Mary Bulman.

GIRL GRADUATES AS ELECTRICAL ENGINEER

Ms. Esther Rabkin, University of Alberta graduate, has proven to former sceptical fellow students that the electrical research field still has a place for women.

Following her graduation, Miss Rabkin has joined the research laboratory of a large Toronto electrical appliance manufacturer. Her former co-ed is being trained by expert scientists in preparation for practical application of her knowledge.

Esther Rabkin came to Canada from Russia. She is the only girl to have received an electrical engineer's degree from the University of Alberta.

"She was an excellent student," says Dr. J. H. MacLeod, University head, "and had the courage and strength of her convictions. Her qualities and abilities are of the variety possessed by few who enter the university."

WINSLOE NORTH SCHOOL

January:

Grade X: 1, Rena Younker.

Grade VIII: 1, Clayton Cudmore, 2, Keith Cudmore.

Grade VI: 1, Lauretta Smith, 2, Alton Younker; 3, Preston Cudmore.

Grade V: 1, Margaret Craswell; 2, Marlon Ford; 3, Eric Laird.

Grade III: 1, Catherine McNaughton; 2, Vera Nunn; 3, Rena Cudmore.

Grade II (a): Charlotte Moreside.

Grade II (b): Heath Craswell.

Grade I: No examinations.

GORDON FIFE, Soldier of Fortune

ON FIFE'S ADVICE CAROL SEEKS THE AID OF JERRY GRANT IN OBTAINING AMERICAN CAPITAL FOR THE COUNTRY.

BUT YOUR HIGHNESS, AMERICAN AND HE REFUSED, INTERESTS HAVE ALREADY APPROACHED COUNT PRAGA ABOUT THIS SAME LAND.

AND UNTIL YOU'RE SUCCESSFUL NOT A WORD TO ANYONE ABOUT IT.

FIRST IT'S JEWELS AND NOW IT'S OIL LEASES—WHAT ARE YOU TWO GOING TO THINK OF NEXT?

FOOL! CAN YOU DO NOTHING RIGHT?—NOW WE MUST FIND A PLACE TO HIDE YOU UNTIL THIS BLOWS OVER.

CALM YOURSELF, MY FRIEND.—BRING HIM TO MY HOUSE—HE WILL BE SAFE THERE—AND TONIGHT WILL SHOW WHAT WE HAVE WAITED FOR SO LONG.

Island Surveys Help to Canada

OTTAWA, Feb. 10.—(C.P.)—Surveys now being made in Newfoundland by technical officers loaned by the Dominion government and financed by the British government would be of value to this country, W. M. Dennis of the Department of the Interior, told the Canadian Institute of Surveying at its annual meeting here today. Mr. Dennis read a paper on Newfoundland surveys and said that by playing the good neighbor to the Island dominion Canada would benefit.

Advantages to Canada were that the Newfoundland survey would complete the establishment of an accurate basic survey some 1,300 miles long around the Gulf of St. Lawrence, 1,000 miles of which are in Canada, which would materially assist in the accurate charting of vital Canadian trade routes and would form a basis for any future boundary action between Quebec and Labrador.

The work at present planned would take five years to complete. A good start was made in 1935 with an airplane reconnaissance of the whole triangulation some 600 miles long from Port aux Basques to the Strait of Belle Isle, and from Corner Brook to St. John's. Other preliminary operations were completed on almost one quarter of the scheme.

In 1936, it was expected, this preliminary work will be continued, and the precise observations involved started on the section in which preliminary work was completed last year.

Mr. Dennis said numerous errors in the older surveys of the Island would be clearly revealed by the Geodetic Survey just begun. The placing of the older surveys in their correct relative positions would permit much greater economy in future surveys which may be required.

In 1936, it was expected, this preliminary work will be continued, and the precise observations involved started on the section in which preliminary work was completed last year.

Mr. Dennis said numerous errors in the older surveys of the Island would be clearly revealed by the Geodetic Survey just begun. The placing of the older surveys in their correct relative positions would permit much greater economy in future surveys which may be required.

ST. ANDREWS WOMEN'S INSTITUTE

The February meeting of the St. Andrews Women's Institute was held at the home of Mrs. J. P. MacIntyre with seven members and one visitor in attendance.

The meeting opened with the recitation of the Creed and singing "Roll Along Prairie Moon." The roll call was answered with a Valentine verse. Another new member was welcomed to our Institute.

The questionnaire on Legislation was discussed and filled out. Mrs. J. P. MacIntyre was appointed convenor.

No new business was transacted. Correspondence was read by the secretary. Reports of the different committees were then given and new ones appointed as follows:

Entertainment—Mrs. M. H. Smallwood and Mrs. G. D. MacKenzie.

Sick—Mrs. M. H. Smallwood and Mrs. Frank MacIntyre.

School—Mrs. G. MacKenzie and Mrs. Frank MacIntyre.

The program for the evening was as follows:

Solo—The Isle of Capri—Misses Audrey and Freda MacIntyre.

Recitation—Miss Joanna MacIntyre.

Recitation—Winnie MacIntyre.

A contest was put on by one of the members and won by Mrs. Temple Murphy.

On motion to adjourn, the meeting closed by singing the National Anthem. Next meeting to be held at the home of Mrs. Frank MacIntyre, meeting to open with the Creed and singing "My Wild Irish Boy." Roll call will be answered with an Irish joke.

TWO SURVIVORS

(By The Canadian Press)

VANCOUVER, Feb. 10.—Only two of the gallant band of North West Mounted Police officers who trekked across the western prairies to the Rocky Mountain foothills in 1874 are alive today, Staff-Serjt. James A. Sutherland, 85, believe.

Mr. Sutherland, who lives in a cottage on the Pacific Coast, north of Seattle, was a member of the expedition, and A. H. Scouten, 84, now living on a cattle ranch near The Pas, Man., was another. So far as Mr. Sutherland knows they are the only survivors.

The force left Toronto June 6, 1874, to police the west. From the end of three months, the plan to involve the issue of certificates for the balance of the claims contemplating a clearing off of the entire debt in a period of five to 10 years.

Mr. Sutherland and a companion entered the camp of Sitting Bull and his 2,000 warriors fresh from the Custer massacre and arrested a bad man. Sitting Bull and his army had fled into Canada after the Custer affair.

Mr. Scouten was 24 when he joined the force in Toronto. He made the long march into British Columbia and returned with a portion of the force to Ontario.

Sensational announcement RE HEINTZMAN PIANOS

SMALLER SIZE LOWER PRICE IMPROVED TONE and TOUCH

The Heintzman piano craftsmen have achieved another triumph. Into the new 5'3" grand and the 3'10" upright they have built new developments in action and acoustics which produce a richness of tone hitherto unknown in the smaller models. Yet these same developments effect such a saving in manufacturing costs that the new models can be offered at drastic price reductions.

Each instrument is built with typical Heintzman thoroughness. Instant response. Amazing power and beauty of tone. Beautiful case design. Come in and see these new piano values.

The famous artists Messrs. Malcolm & Golden perform on HEINTZMAN CONCERT GRAND PIANOS at the COMMUNITY CONCERT RECITAL LAST EVENING.

INDIANS ARE LAW-ABIDING

(By The Canadian Press)

NORTH BATTLEFORD, Sask., Feb. 10.—Before the coming of white civilization North American Indians were natural aristocrats, honest and devoid of trickery, S. I. MacDonald, of Indian Department, said in an address here.

Modern civilization and methods of living has influenced the character of some Indians, said Mr. MacDonald, who has studied the natives for the past 50 years. But even under present conditions the Indian in general is law-abiding and gives little trouble to authorities. This was due to the high code each tribe adopted years before the country was settled by the white man.

The Indian originally came from Asia, Mr. MacDonald said. Some northern tribes have a Mongolian cast to their features.

The Indian sign language, used extensively all over the continent was said to have been originated by a missionary named Evans, who produced the syllabic system in 1850.

BARE MANY YEARS ISLE LUXURIANT

(By The Canadian Press)

VICTORIA, B.C., Feb. 10.—Scientists are puzzled over the return of vegetable, animal and insect life to Krakatoa Island, a barren lava stretch for many years following a volcanic eruption, Dr. Diamond Jenness, anthropologist of the Dominion Museum, Ottawa, said here on his return from a far eastern voyage.

Krakatoa's eruption occurred near the end of the last century and the island left above the Indian Ocean was a smoking waste. The top was blown off the mountain, and the ensuing tidal wave which swept the Malay coast and East Indies caused more than 30,000 deaths.

"Trees and other vegetation now grow in profusion," said Dr. Jenness, "and insects and animals have returned to the island."

He said he was impressed by the progress in Java, which he also visited. It had become modernized under Dutch rule, with excellent railroads, air services, and roads.

Java produces 85 per cent of the world's quinine supply, he said, and agriculture is its sole industry. More than 500,000 Chinese are included in its 40,000,000 population.

One of the most impressive sights for the visitor is a temple with a gallery more than a mile long, containing a frieze decoration depicting the life of Buddha.

PLANNING HELP FOR CREDITORS

TORONTO, Feb. 10.—A plan designed to help the unsecured creditors of Crosbie and Blackwell (Canada) Ltd., which went into bankruptcy in 1934, has been formulated and laid before the other creditors through the trustee, G. T. Clarkson.

The plan calls for a payment on the \$220,000 debt of five per cent now and five per cent more at the end of three months. The plan also involves the issue of certificates for the balance of the claims contemplating a clearing off of the entire debt in a period of five to 10 years.

Mr. Sutherland and a companion entered the camp of Sitting Bull and his 2,000 warriors fresh from the Custer massacre and arrested a bad man. Sitting Bull and his army had fled into Canada after the Custer affair.

Mr. Scouten was 24 when he joined the force in Toronto. He made the long march into British Columbia and returned with a portion of the force to Ontario.

HUNTED WITH BUFFALO BILL

ALLENBY, Sask., Feb. 10.—"Dad" Gaff, 85, who lives in retirement near here, is one of the few surviving buffalo hunters who stalked the great herds over western plains years ago.

Still hearty and active, "Dad" delights in recounting experiences during the four years he hunted with "Buffalo Bill" Cody. Up to 1874, he recalls, buffalo were plentiful on the prairies, but wholesale slaughter decimated the herds. The last bison was shot in Cypress Hills in 1882.

"Dad" Gaff tells of the flight of 5,000 Sioux Indians into Canada after the Custer massacre in Montana in 1876, seeking protection of the "Great White Mother," as they called Queen Victoria.

BEST TURNOVER FOR TWO YEARS

(By The Canadian Press)

TORONTO, Feb. 10.—Trading volume on the Toronto industrial share section in January reached 1,430,921 shares which was the heaviest turnover in two years with exception of November last. The price level reached a new high in the month since August, 1933.

The month's heaviest trader was British American Oil with a turnover of 188,480 shares, followed by International Nickel with 175,671 shares and Brazilian Traction with 150,725 shares.

Sales on the mining floor of the Toronto Exchange in January almost doubled those of the previous month, reaching 36,823,256, the best since April 1934. All groups with exception of the silvers had period of heavy trading. Gold stock however, accounted for the main action.
