

PANDORA RANGE

Interchangeable Sections are a Handy Feature

The sections of the top of the Pandora are interchangeable. For instance, you can change the boiler from crosswise to lengthwise (see illustration) by merely switching around the sections, which can be done in less than a minute.

The many advantages of these interchangeable lids will suggest themselves so readily to the home cook that it is not necessary to enumerate them here.

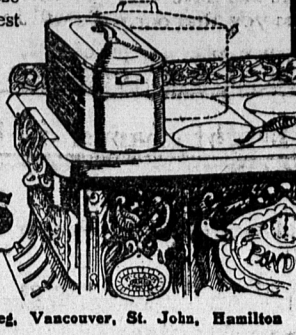

Pandora lids are made extra heavy—practically non-crackable and unbreakable.

The American sailor Priscilla Smith of Gloucester, Mass., met with an accident the other night while making port on account of the anchor not taking a firm hold thereby allowing the vessel to drift and collide with the new work on the railway wharf and causing considerable damage, which was amicably settled between the Captain and W. F. Boggs.

Owing to the enormous amount of time and expense necessary in bookkeeping and making out small accounts as well as mailing and collecting same, The Guardian has decided that in future all ordinary amounts under one dollar will be accepted on a cash in advance basis and ten per cent discount given, except to those who have a regular advertising account who will still have the privilege of monthly redt.
