Baby's Rash Became a Mass of Humor

Parents Decided He Could Not Be Cured. "Cuticura" Soon Made His Skin Perfectly Clear.

A Toronto man, Mr. Robert Mann, of 7584 Queen St. East, says: "Our boy was born in Toronto on Oct. 13, 1908, and when three months old a slight rash appeared on his face. What appeared to be a water blister would form. When it broke, matter would run out, starting new blisters until the entire face, head and shoulders were a mass of scales and you could not touch him without causing him to cry. We did not know what to do for him and tried every remedy without avail, including those of them only added to his suffering and on one particular, the doctor advised that the family doctor prescribed for him. This did not do any good, so we took him to a hospital, where he was treated as an out-patient twice a week and he got worse. It was then called in another doctor and under his treatment the boy was to all appearances cured and the doctor said his work was done. But the very next day it broke out as bad as ever.

"We decided that it could not be cured and must run its course and so we just kept his arms bandaged to his side to prevent his tearing his flesh. The Cuticura Remedies were recommended. We started using them in May, 1909, and soon the rashes were complete. Cuticura made his skin perfectly clear and he is entirely free from the skin disease." (Signed) Robert Mann, May 3, 1910.

In another letter, dated June 29, 1911, he adds: "My boy has never had any more trouble since using Cuticura." For more than a generation Cuticura Soap and Ointment have afforded the most successful treatment for skin and scalp troubles of infants, children and adults. A single set is often sufficient. Although sold by druggists and dealers throughout the world, a liberal sample of each, with 32-p. book on the skin, will be sent free on application to Potter Drug & Chem. Corp., 63 Columbus Ave., Boston, U. S. A.

Advertisement for Kootenay Steel Range. Title: Range Talks by the Housekeeper. Subject: "The Oven". Text: "ONCE convinced that the appearance of a range appeals to our sense of good taste, we want to know all there is to know about the Oven—because the Oven is the important range essential. If it is not a perfect cooker and baker, outward beauty counts for very little. The more you look into the 'Kootenay' Oven the more anxious will you be to own a 'Kootenay'. The oven of this beautiful range is made of nickelled sheet steel—one-eighth of an inch thick. I don't know how to explain this nickelled steel but the main thing to remember is that a 'Kootenay' Oven cannot rust—more than that you can wash it out just like an ordinary kitchen dish, and always have a fresh, clean Oven. The reasons for the 'Kootenay's' splendid cooking and baking reputation are very plain—The heat flues are broad and deep—surround the entire Oven so that it bakes and cooks evenly. The ventilation is thorough—a range retains all its rare and generous juices when cooked in it. The construction of my range was carefully planned to me—shown me—before bought. The inner body of 'Kootenay' is protected with asbestos—the Oven walls cannot burn through—over the Oven top a cast iron or guard plate is placed in face. The bottom is lined with iron bars. The thermometer is a great invention. Plain figures show the exact degree of heat necessary for baking pies, cakes, bread, etc., or roasting meat. No need to open the door—that only cools off the Oven. The thermometer costs a little more, but I wouldn't be without it. Of course there are other splendid features about the 'Kootenay'. All in all, it's the best range I've ever seen." LONDON TORONTO MONTREAL WINNIPEG VANCOUVER ST. JOHN, N. B. HAMLTON CALGARY. Sold by The Rogers Hardware Co., Ltd.
