POWNAL CHURCH NEWS. — The "Up Streamers" Trail Rangers Camp held the first of a series of debates on Friday evening. The Camp is divided into two teams with Earl Herman and Cyrus Acorn leaders. The subject of the debate on Friday was "Resolved that summer sports are better than winter sports." Cyril Acorn's team supported the affirmative which won the debate by one point.

SPIRITED CONTEST AT YORK. —On the evening of Jan. 31st, the Young People's Society put on a contest, the result of a challenge which had been issued to the boys by the young ladies, the losing side to prepare and serve a supper to the members of the Y. P. S. Both parts of the "programme proved exceedingly interesting, as the competition was exceedingly keen, and numbers sufficient for a concert had been well practised by each side. The readings, choruses, solos, duets etc., were exceptionally fine and the Dialogues were a scream from start to finish, showing the York young people to be artists of no mean order. A Tableau, a camping scene by boys in uniform, with a real Canadian soldier doing sentry duty, is worthy of special mention; also a song by the girls entitled "Dunstaffnage", which was both interesting and enlightening. There were three efficient judges, Mrs. Peter Brodie, Dr. McDonald and Arthur Wyatt, whose decision was unanimous in favor of the girls as the winners. Although the boys were disappointed they were good sports. A hearty vote of thanks was moved by Rev. Mr. Kierstead, seconded by Willard West and extended to the judges by the President, Harold Watts. In speeches by the judges all expressed a wish that the splendid entertanment they had enjoyed so thoroughly should be repeated as a concert giving the public the opportunity of attending.

GRAIN RATES TO BE LOWERED

WINNIPEG, Feb. 10.—The Free Press publishes the following from Fort William today: "Freight rates pertaining to carrying grain upon the Canadian National Railways will be reduced to a point to make it attractive for Western shippers to send their grain to Fort William rather than to Vancouver for export, was the statement made by the Minister of Railways who with D. B. Hanna other officials of the Government road passed through Fort William en route to Winnipeg on special train this morning."

IN MEMORIAM

GEORGE WILLIAM MCLEAN

The people of Darlington and of the surrounding districts were greatly shocked when on Friday January 20th, it was learned that George William McLean, son of John McLean had passesd away at the early age of 21 years.

The deceased was a strong robust young man and up until Friday, January 13th, his health was apparently always perfect. On that day while at his work he received a very severe chilling. The day following the doctor was called in He found that George was suffering from what seemed to be paralysis of the spine. As the days went by it became evident that the paralysis was spreading throughout the whole system. The disease laid its deadly hand on faculty after faculty until in the early evening of Friday, January 20th, it made an attack upon the heart. In a short while its beat was stilled and the spirit took its flight.

The stroke came so suddenly and so unexpectedly that the whole family were almost overcome with grief.

Besides a sorrowing father and mother, George leaves to mourn the loss of a thoughtful and affectionate brother, five brothers and three sisters. The brothers are Daniel Archibald, of Darlington and Angus Sterling, Clarence, and Wesley at home and the sisters are Mrs. Albert Paul, Brookfield Miss Janette, teacher at Francis Sask., and Miss Katie at home. Another sister Miss Annie predeceased him some four years ago.

By his kindly and jovial manner, George endeared himself to all in his home, where he will be greatly missed.

Overflowing with energy and good cheer and therefore carrying sunshine wherever he went he was a general favorite among his friends and associates. In the days to come his companions will look in vain for his bright smile and his manly form.

George was a young man of splendid parts and why one so young and so full of promise should thus be so suddenly called away from the activities of life, seems hard for us to understand. And yet when we realize that 'God moves in a mysterious way his wonders to perform," and when we know that he is "too wise to err too, good to be unkind," we see how in humble submission to the Divine decree, saying "not my will but thine be done." — trusting that what we do not understand here and now shall be made clear and plain to us in that bright and ever abiding hereafter. The funeral which was a very large one was held on Monday, January 20th. The service was conducted by Rev. R. H. Stavert

The pall-bearers were six cousins of the decased, namely: Messsrs. Hedley McPherson, George Millar McPherson, John McPherson, Myles McDonald, Donald McDonald and Wm. McMillan.

Interment was in the Brookfield cemetery.

GEORGE MILLAR MCLEOD

On the evening of Saturday, January 14th, Mr. John E. McLeod Hopedale received a telegram from Halifax, saying that his son George Millar McLeod was seriously ill there.

On the Monday morning following Mr. McLeod set out for Halifax. Just after he had gone another telegram was received at his home saying that his son had passed away, when Mr. McLeod reached his destination this sad news was made known to him.

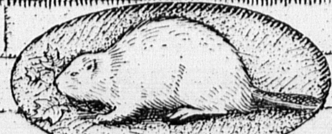
In the latter part of December, George had come up from South America, and had arrived in the city of Halifax about Christmas on a large ocean liner on which he was fourth engineer. Not long after this it seems that he contracted a heavy cold which later developed into pneumonia. All that medical skill and kind friends could do was done to stop the ravages of this dreadful disease, but all to no avail. After three days illness he passed peacefully away.

On Wednesday evening, January 18th, Mr. McLeod arrived in Hunter River with the remains of his son. The home coming was a very sad one.

Besides a sorrowing father and mother, George leaves to mourn the loss of a kind and affectionate brother two brothers and one sister. The brothers are Duncan and Arthur and the sister is Miss Christy. All are at home. In his old home George was a general favorite and his genial presence will be sorely missed. Among the young people of the community he was highly esteemed and his place will be hard to fill.

The Steamships company in whose employ he had been gave high testimonials of his character and of his skill.

It will be remembered that George McLeod was one of the young men from Prince Edward Island who a few years ago went with Captain John L. Reid on board the great ice breaker to Russia. While on this trip he distinguished himself by his courage and daring. The friends who met him in Halifax, have written to his parents telling them how patient and courageous he was during his last illness. Believing that he would soon be as well as ever he did not wish any word to be forwarded lest it might startle the folk at home, and not until his case beame serious was a message sent. It can be readily understood how the news of his serious illness and later the news of his death came as a great shock to his loved ones. Just why bright promising young lives are thus suddenly cut off seems hard for us to understand. But realizing that this is God's world and knowing that He reigns we cannot but believe that so long as "God is in his heaven all will be well withthe world. When our loved ones are called away we must then quietly surrender to the Divine decree, trusting that sometime all these dark things shall be made plain.



Policyholders of the Mutual Life of Canada Enjoy a Record Year of Financial Prosperity

Striking Statements from Addresses

Mr. Hume Cronyn, President:—

"From time to time we have evidence that the gospel of mutuality is leading the insurance world into the higher paths of an ideal system. The latest convert, The Provident Life and Trust, of Philadelphia, following the notable examples of the Metropolitan, Prudential, Equitable and Home, has announced its intention of redeeming its stock and turning over to its policyholders one hundred and twenty millions of assets and over half a billion of business. Thus does this firmly established and well managed concern bear testimony to the strength of altruistic cooperation."

Mr. R. O. McCulloch, 1st Vice-President:—

"This Company has always had complete faith in our Great West and nothing in the present situation shakes our confidence in its tremendous agricultural possibilities and its ultimate progress and development. We recognize that the West is going through a period of adversity but it will survive this setback as its people are industrious, stout-hearted and confident. We know that our agricultural prosperity is necessary for the growth and development of Canada and our policy, as far as we can follow it, consistent with the principle of safety, is to continue to invest in first mortgages on improved Western farms."

Mr. C. M. Bowman, Chairman of the Executive:—

"The bond purchases made during 1920 and 1921, many of them being of unusually long term and high interest yield and representing fully sixty per cent. of the Company's total bond holdings, will be an important factor in connection with the return from invested funds for many years, thus enabling participating policyholders of the Mutual Life to look forward with confidence to the future."

Mr. Charles Ruby, General Manager:—

"No finer demonstration could be desired of the solid foundation upon which a well managed life insurance company rests than this quick rebound from the financial strain occasioned by the late war and influenza epidemic. Nor could there well be a better augury in regard to dividends to policyholders in the coming years. While there may always be discussion on the general topic of whether the participating or the nonparticipating system in life insurance is the better plan for an applicant, the experienced holders of participating policies in the Mutual Life of Canada, at any rate, will have no difficulty in satisfactorily settling the question so far as they are concerned."

Unprecedented Profit Earnings

A REMARKABLE increase in the surplus earnings of the Mutual Life Assurance Company of Canada was shown by the Fifty-Second Annual Statement, as presented at the Annual Meeting of the policyholders held in the Head Office of the Company at Waterloo, Ontario, on Thursday, February 2nd.

The entire net profits, or Surplus earnings of the year's operations will be, as usual, ultimately distributed to the policyholders of the Mutual in cash or applied to the reduction of their premiums or added to the face values of the policies, as per policyholders' individual option. Three factors have combined to bring about this red-letter year in the annals of the Company.

1. Decrease in Expense Ratio

The percentage of the Total Income required for operating expenses was reduced from 20.45% in 1920 to 18.60% in 1921.

2. Increase in Interest Earnings

The average rate of interest earned by the investments of the Company shows an increase from 6.41% in 1920 to 6.60% in 1921.

3. Highly Favorable Mortality

The mortality rate of 1921 was the lightest experienced by the Company in recent years, being relatively 20% less than in 1920.

Surplus Earnings of $2,243,038, being $46.47 per $1,000 of Total Assets

The combined effect of these three different factors in the Company's experience for 1921 was to increase the surplus earnings

from $38.67 per $1,000 of assets to $46.47 per $1,000

The most significant item in the annual reports of a life insurance company doing business on the participating plan is not the amount of Surplus shown by the Balance Sheet but the Surplus Earnings for the year.

Salient Points from the 1921 Report

Income,	$11,059,484	Assets,	$ 48,211,204
Paid to Policyholders	$ 3,872,874	Busines in Force,	$228,697,353
General Surplus Funds,	$5,790,520.70

SHALL PROPAGANDA BE LIMITED?

(From the Chicago News.)

Submarines and chemical warfare presumably will be subject to restrictions in any future war, at least as regards use against civilian populations. No action has been proposed as yet however, in the Washington Conference or elsewhere for the limitation of the most effective weapon against the populations behind the lines — that is to say, propaganda. The need of such limitation is suggested by correspondence from Germany, where a wave of interest in spiritism is in evidence. German spiritualsts are alleged to feel that French and Amercan mediums misused psyic during the late war. "Mass Prayers," it is charged were prayed by American spiritualists at given hours throughout the country to send great currents of destructive thought energy to the enemy across the ocean. "War," the German spiritualists believe, "should be fought with weapons and not thought energy." Waves of thought energy undoubtedly played a big part in ending the war, though the technic of projection was more material than spiritualists might allow. Everybody will admit the termendous thought-energy generated by typewriters, moving picture machines and lecturers, all of which found indirect expression against the enemy.

The next war will find the publicists of the world prepared with a new instrument for transferring their deadly propaganda direct into hostile territory. The radiophone will soon be in every house —which means that civilian populations can be bombarded night and day with all the horrid refinements of modern propaganda.

It is a sobering thought, worth more attention than it has yet received.

WHY QUIT AT 50?

(From Forbes Magazine.)

Don't worry because old age seems to be creeping upon you. Judge Gary, who is the active head of the United States Steel Corporation, is over seventy. In fact, he was fifty when that corporation came into being. Lord Leverhulme, head of the great Lever Brother soap interests, owning companies scattered all over the world, is just about the age of Judge Gary, and there isn't a man in his employ who equals him in energy and initiative. The man who quits at fifty because he thinks he is getting old is merely choosing a pleasant way of committing suicide.

(Sailors Magazine.)

He was rescuing her from the waves, but it looked as though they would never see Boston again. 'Hold on tight, Penelope," he gasped, "hold on tight.'

"Don't say 'hold on tight,' gurgled the girl, with her mouth full of the Atlantic ocean, "say hold on tightly."

TESTS BY PHONOGRAPH RECORDS.

Tests for the measurement of musical talent were given to 70 students in the summer session of the University of Wisconsin. Five faculties are measured by the tests: (1) The sense of pitch, which is the ability to discriminate between higher and lower tones; (2) the sense of time, or rhythm; (3) the sense of time, or which is the ability to tell that which is more pleasing and that which is less pleasing; (4) the sense of intensity: and (5) the musical memory, or the number of tones that can be remembered from a single hearing. The tests are given by means of phonograph records prepared for this purpose. They are used in many public schools as a quick method of classifying pupils.

There's a Reason

Why Imperial Fox Biscuit is being fed by the most careful fox ranchers on P. E. Island.

The manufacturers are personally interested in raising foxes and producing high priced pelts. Their ambition is to produce the best fox biscuit that can be made. The Imperial Fox Biscuit is the result of careful study and practical experience. The formula on which these biscuit are prepared is scientific and analysis show they contain a high percentage of carbohydrates, protein and fat. Every good feeders knows the value of a well balanced or complete ration.

The greatest results cannot be obtained by feeding one diet. Cereals are absolutely necessary to supplement a meat diet. Cod liver oil of purest quality is used in making Imperial Fox Biscuits.

It is great medicinal value as well as nutritive. Imperial Cod-Liver-Oil Biscuit can be fed to advantage through the winter season. Sold by leading wholesale dealers.

The Imperial Biscuit Co.,

Charlottetown
