Fifteen Dollar Suits

Is fifteen dollar suits worth the price? Most men have a certain price they think of first in connection with a suit purchase—with many it's \$15.00.

Our spring and summer suits at this price are excellent values.

Take a look at our new suits—see the handsome fabrics, the artistic tailoring, the new cut, note the linings, button holes, padding, etc. We pay special attention to these points.

Figure on a Phone Mr Farmer

The enterprising farmer works with his head as well as his hands. This is the day of brain and brawn this is the year of advancement and achievement and this is the age of doing things instead of talking.

Many of the farmers of this province have just as much executive ability as most of our business men, yet there's hundreds of homes in this very province that are losing money annually by the absence of the phone. Still we don't blame them. The fact is, that they were never shown the real uses a phone could be put to—they were never met half way. We are going to conduct an aggressive campaign for the farmer—we are going to break down every barrier that is in the way of progress and we are going to put the phone within reaching distance of every farmer—watch us.

If you have a phone you can do things while other people are thinking about it—and you can get all the information you want from any part of the province while another person is getting ready to write.

Mr. Farmer the phone is just as necessary to successful farming as your binder or horses. If you had a phone it's then you would appreciate it rightly. We have a proposition that will prove interesting to you that you can't afford to overlook. Will you come half way by mailing us a card for information will you permit this organization to show you the way to the front?

Can't we send you all particulars—all you've have to do is to send our address—better write right now!
