

“Hey, POP, Don’t Blow that Dough

... You’ll Be Sorree-e-e if You Do!”

Bill, how right you are! Because that is the money that you should be contributing to the PRINCE COUNTY HOSPITAL CAMPAIGN. Whatever the size of your income, small or large, there is a certain amount that you should set aside for the hospital drive.

Decide now what that amount will be in your case. When the canvassers call be ready to give them an answer. Don't ask them to call again, they are as busy as you are. You have a duty to your community in this matter. Discharge it conscientiously and your reward will be the satisfaction you will receive when you see the new Prince County Hospital opening on some not too distant day and you can say that your contribution helped to build it.

From 1912 to 1946 the present Prince County Hospital has served the needs of the people of this County. It can no longer do so. Its facilities are inadequate for present day needs. People who desperately needed treatment have been turned away from its doors because there was no room for them. This is a terrible situation that should not be allowed to exist in any modern community. It is up to all of us to do our part to have this situation remedied as soon as possible.

So—please—don't “blow” that money that you should be setting aside for this great and important need. Subscribe to the limit of your ability. Remember, you have three years in which to pay and it is deductible for income tax purposes.
