On Sunday morning the aeroplane carrying mail between Moncton and Ch'town passed over and returned again inside of an hour. Who will be the one among us to boast the first air ride? "Not I" said the chicken.

DOMINION AMMUNITION. Illustration of two hunters in a field with a rifle and a shell. Text: Now! Waterproof Shells IMPERIAL LONG RANGE, DUOCO FINISH. Imperial Long Range Waterproof. Pneumatic High Velocity Cartridge. Pneumatic Bullet after striking. Greaseless Non-Corrosive Self-lubricating.

SPORTSMEN around the globe will be amazed and delighted at the news that, at last, a waterproof shot shell has been perfected. This phenomenal achievement—said in gunning circles to be the greatest improvement since the development of smokeless powder—is the work of The Dominion Cartridge Company. This Company, through its association with Canadian Industries Limited, ranks with the largest producers of ammunition in the world. Think what a real waterproof shell means! Before, duck shooters were forced to guard shells from wetting as carefully as their grandfathers guarded loose powder. Today, they may lay their shells in the bottom of the boat or down among the reeds without care or caution. Duco Finished Imperial Long Range Shells may be subjected to moisture for hours and will then work smoothly in any gun. Atmospheric changes will not affect them.
