ALSO! LAST THRILLING CHAPTER OF FLASH GORDON'S TRIP TO MARS

Bristol And Vicinity

Rev. T. A. Campbell, St. Andrews, celebrated Mass in the Church of the Little Flower, Morel, on Sunday in the absence of Fr. Rooney who is enjoying his well earned vacation.

Some of the older men that served in the last Great War were called to report last week for service on the home defence. Among those answering the call were Earl Drake, and John R. O'Brien, of Bristol.

Several of the schools that had their fall vacation opened on Tuesday with small attendances.

The W. I. of St. Peter's Harbor had a dance in their school last week, twenty dollars being taken. This district deserves credit for the great work the women have done in their never ending efforts in the interest of education.

The teachers of Morell School report that fourteen new faces joined the classes there this season.

Quite a number of sports spent Thanksgiving shooting, while farmers who are busy potato-picking carried on with their work.

Mr. Ansel Lapierre, Charlottetown, spent the week end with his parents here, Mr. and Mrs. John Lapierre.

Mr. Earl O'Hanley, St. Peter's spent the week end in Bristol, the guest of Mr. and Mrs. John J. Perry.

Mr. P. J. Deveau, merchant here, is building a new warehouse. This speaks well for Mr. Deveau, who only entered business a little more than a year ago.

The starch factory at St. Peter's Bay has notified farmers that no more potatoes will be taken for at least one week as the factory is packed full, with men working shifts night and day with tons and tons of spuds piled high outside the factory. One heavy truck load broke the scales last week but workmen soon had the damage repaired.

Some of the fishermen are still taking advantage of the fine weather to carry on business.

Mr. Rupert McDonald, who was attending the Forestry Course, was called home last week to join the army for the thirty day training.

The regular sporting club dance in the Morell hall on Friday was quite a lively time and a large crowd attended.

The mail route travelled by Mr. Lester McVarish, is up for tender as Mr. McVarish, finds he no longer has time for this position. Scores of persons along the route served by this carrier regret to hear that Mr. McVarish was one of the men who never missed a trip in years on the route. He followed the rules like the inscription this writer read over the door of the Post Office Building in New York City last summer "neither snow or rain or cold or heat or gloom or the completion of their appointed rounds." May our next man be as good as the one we are losing.

Mr. Frank Alward, S. D. U. spent the holiday at his home here.

Miss Mary Smoot, P. W. C. spent the week-end at her home in Bristol.

Value Stressed Of Canadian Tourist Industry

OTTAWA, Oct. 15.—(CP)—The suggestion that the tourist business had become so important to Canada as to indicate the appointment of a Cabinet Minister to advise charge of it, was made at the opening today of a conference of Canadian tourist officials.

Catapulted to discuss Canada's largest tourist industry, valued in 1939 at \$275,000,000, were officials representing the national and provincial governments, the Canadian National and Canadian Pacific Railways and the Canadian Association of Tourist and Publicity Bureaux.

D. Leo Doan, chief of the Travel Bureau, who presided in the absence of Transport Minister Cardin, said appointments of a Cabinet Minister had been suggested.

The general view of the conference, he said, was that while traffic from the United States had shown a decrease in 1940 (figures up to the end of August showed a falling off of 19.05 per cent, in automobiles crossing the border, and 13.9 per cent, in persons) this had been compensated in degree by inter-provincial tourist business.

Mr. J. S. Doan and Maurice Hebert, representing Quebec province, expressed the opinion that the increased travel of English-speaking Canadians in the province was creating a better national spirit.

It had also been urged at this preliminary session of a three-day conference Mr. Doan said, that advertising in newspapers and magazines, through the motion pictures and the radio in the United States should be increased, and put upon a year-round basis rather than being made intensive for a few months.

Other suggestions were that a complete organization for the care and entertainment of tourists, that there should be highways from the Atlantic to the Pacific, that "nuisance" taxes should be eliminated and that regulations concerning exchange, customs and immigration be considered by all provinces before final adoption.

A SOLDIER'S PLEA

(The following has been received for publication from an Island soldier now on service on the mainland.)

Did you ever stop to think What the people think about The soldiers reputation, Every time that he steps out?

One can hardly help but notice Though one tries to act correct, That the better class of Civics Do not treat us with respect.

There was a time when all the soldiers From Bombay to Fundy's Bay, Were classed as sturdy heroes, But it is not that way today.

Would you like to know the reason? (For a reason there must be) To disrespect the Uniform, To this you must agree.

Some kids have joined the Army They're just starting in their teens They try to act like "hard guys," 'Tis they that spilled the beans.

They can smell an empty bottle And stagger like they're drunk, That's the reason half the civics Think the Army is the bunk.

And why must all the soldiers suffer For the sins of the guilty few, And lose their rights to social life For what some others do?

Now I don't claim to be an Angel, But I'm sticking to the rule, That when I go out on pass, I won't act like a fool.

And if all men in Uniform Would try and do the same With this coming generation We might save the Army's name.

Former Police Head Buried

OTTAWA, Oct. 15.—(CP)—Funeral services for Sir Percy Sherwood, Chief Commissioner of Dominion City Police until his 1918 retirement, will be held here Thursday, Sir Percy 86, died early today.

A crack rifle and pistol shot and a fine sculler, Sir Percy was one of the main figures in shaping Canada's present-day law enforcement machinery. He was knighted in 1916 for his work in combatting espionage and sabotage during the first Great War.

In 1882 he became a superintendent of Dominion Police, assigned to reorganize the Federal force charged with administering Federal law in the days when the "Mounties" were the Royal Northwest Mounted. He became Commissioner in 1896 and Chief Commissioner in 1914.

War Industries Round The Empire

Practically all ammunition and armaments for the Australian forces are being made in Australia. Four government-owned arms factories employ 11,000 men. New factories to be opened will produce other types of munitions, including anti-aircraft and anti-tank guns.

Australia is to begin immediate production of 100,000,000 worth of munitions, involving employment ultimately of 150,000,000 men and women.

Australia is concentrating on warship construction for the United Kingdom. Every available shipyard is being brought into commission. Vessels include destroyers, anti-submarine craft, patrol ships. A graving dock costing \$3,000,000 is to be built at Sydney.

During the next three years, Australia will spend \$55,000,000 on aircraft construction and maintenance.

In New Zealand, a War Council of 17, including representatives of politics, industry, trades unions and the farming community has powers necessary for action to increase the war effort.

The whole of the New Zealand wool clip, butter, cheese and meat output has been bought by the United Kingdom government for the period of the war and one year after the war at an agreed price.

South African factories are producing explosives and shells at the rate of thousands a week, grenades and rifle ammunition, trench mortars and guns; military vehicles of all descriptions. Textile factories (hitherto unknown in the Union) have been set up to manufacture cloth.

T. N. T. and small arms ammunition are being turned out in such quantities in South Africa that supplies have been sold to the U. K.

How Mail For Airmen Should Be Addressed

OTTAWA, Oct. 15.—(CP)—Royal Canadian Air Force headquarters today issued instructions with regard to mail addressed to Canadians and R.C.A.F. personnel serving with the Royal Air Force.

In the case of airmen, the letter should bear the number and name of the address, whether it is in the R.A.F. or the R.C.A.F., and should be directed to R.A.F. records office, Ruislip, Middlesex.

In the case of officers the number and name should be given and it should be stated whether the officer is R.A.F. or R.C.A.F. The letter should be sent in care of S. Seven D, Air Ministry, Admiralty House, Kingsway, London W.C.W.

CHURCHILL

Bearer of an illustrious name Of him who smote Gaul, liberty to save Britain will inscribe on stone thy just claim
In consigning terror to oppressions grave,
A burden terrific on thee is laid, Though oppressive in soul and mind, than art afraid
On God's righteousness, and thou art brave
To meet the crisis and war's blasting flame,
Britain and nations all rely on thee
To frustrate freedom's death and From Hitler and his murderous hords,
Valiant heart! With thee also accord
The unconquerable spirit of the free,
Which shall win for nations victory.
—C. T. E.

Canada Has Prize Winners In Dairy Show

HARRISBURG, Pa., Oct. 15.—(CP)—Judging of Canadian entries in the national dairy show concluded today and the Dominion's exhibitors expressed satisfaction with the share of the prizes they won. The 29 Canadian Ayrshires entered in the show won a total of 4 prizes. The 18 Holstein entries won 12.

In the Ayrshire classes, Canada's best cow and trophies for the breed.

Expect Speed In Plans For Power Project

OTTAWA, Oct. 15.—(CP)—Impression in official circles here is that little time will be lost in making a temporary joint committee by the Canadian and United States governments to get ahead with preliminary engineering work looking to power development of the international rapids section of the St. Lawrence River.

Loring C. Christie, Canadian Minister to Washington had a conference today with President Roosevelt and while both Ottawa and Washington were silent as to the nature of the talk it is possible it had to do with appointment of this committee.

A press statement issued yesterday by the two governments stated steps had been taken "to initiate immediately preliminary engineering and other investigations for the international rapids section in order that the entire project may be started without loss of a favorable construction season when final decision is reached between the two governments." The committee will be responsible for directing these investigations.

Unless the first job of the committee will be to choose an engineer or engineers who will have charge of preparing actual plans for construction work a great deal of engineering work has already been done in preparing plans on which actual construction contracts can be based.

The international rapids section extends roughly from Cornwall to Prescott. Ongoing negotiations with Canadian engineers held for two power dams, one at Chrysler Island below Morrisburg and a second below Cornwall, United States engineers advocated a one-dam development at Barnhart Island below Cornwall.

Abitibi Empire For Sale

TORONTO, Oct. 15.—(CP)—The mammoth industrial empire of the Abitibi Power and Paper Company Limited will be offered for sale at public auction here tomorrow to meet claims of bondholders whose mortgage covers all the company's vast properties.

The offer for sale was made by Mr. Justice W. E. Middleton last June, and the public auction is subject to a reserve bid to be fixed by the Master at Osgoode Hall, Mrs. MacCabe reported the sale of the Montreal Trust Company, acting for the bondholders.

Abitibi is one of the largest producers of pulp and paper in Canada, with total assets of more than \$121,000,000. It has been in receivership for eight years. The bonds outstanding total \$48,000,000 at par and unpaid interest of about \$25,000,000 makes the bondholders' total claim about \$73,000,000.

Possibility Of Further Aid To Britain

WASHINGTON, Oct. 15.—(AP)—The possibility of further aid to Great Britain or other powers against tonight when President Roosevelt set up an agency to requisition a large supply of war materials now tied up by legal complications.

Any of these supplies which are not needed for United States defense may be sold to friendly powers, the President said.

There were indications that some machine tools, included in the materials in question, might be released to Soviet Russia, which is now displaying irritation with Hitler's incursions into Rumania.

The supplies in question had been sold by American manufacturers to foreign purchasers, but delivery had been blocked by the United States government. Included were 10 military planes sold months ago to Sweden but held in the United States when it became apparent that Sweden was more or less isolated by war developments.

Also included were 10 planes sold to Thailand (Siam) but stopped at Manila after Siam made demands for French-Indo China.

The White House explained that in the case of certain machine tools and other goods, the sale already had passed to foreign purchasers, and that legal complications prevented re-sale in the United States. To remedy the situation, Congress passed a law empowering the President to requisition the materials.

The President today constituted the Secretaries of War and Navy, acting with the Army and Navy Munitions Board, a committee to determine what materials should be requisitioned and whether any of them could be spared for shipment elsewhere.

Asked at his press conference whether the action might have a bearing on current American-Russian conversations on machine tools and other equipment, which has been withheld, the President said it was supposed so.

Canadian C. W. L. Attacks Birth Control In Brief

SHERBROOKE, Que., Oct. 15.—(CP)—The Catholic Women's League of Canada has prepared a brief attacking birth control and pornographic literature and will present it soon to the Governor-General, Mrs. J. A. MacCabe of Ottawa, national president today told the 14th annual convention of the League's Sherbrooke branch.

Mrs. MacCabe reported the League has collected \$19,000 of its \$25,000 objective for war work. She summarized proceedings at the national convention of the League in Saint John, N. B.

DIES IN ACCIDENT

GRANVILLE CENTRE, N. S., Oct. 14.—(CP)—J. Reginald Wade died last night when a truck he was driving crashed at the end of the Granville Centre wharf into the Annabouche River.

Ralph Lequille and Levaught Troop jumped from the machine and reached the wharf. Another occupant of the truck, Miss Eleanor Troop, was rescued.

Grade I (c)—1. Ada Wood; 2. Beverly Delaney.
Everett Howatt Jr., Teacher.

Pair Drowned At Newcastle

NEWCASTLE, N.B., Oct. 15.—(CP)—Walter Heathington, 35, Grains, and Carl Jardine, 26, of Renous, N.B., drowned in the Miramichi River this afternoon when a truck driven by Jardine plunged into a draw bridge into 60 feet of water.

A third occupant of the truck, Burton Hambrook, 17, who was sitting between the other two, was rescued by Thomas Kingston, who secured a hold on the youth with a boat-hook as he came to the surface.

The two bodies had not been recovered tonight.

The three were en route from Newcastle in an empty truck used for hauling pitwood. The truck was on the bridge when it "drew" of the Mossy bridge up at the time to allow passage of a vessel.

Gates were down, it was said, but the truck's brakes failed to hold and it approached the open section of the bridge.

BUNBURY SCHOOL

Honor Roll for the month of September:
Grade X—1. Mamie MacCallum; 2. Robert Bouyer; 3. Jack Parkerson.
Grade VIII—1. Kay Judson; 2. Carl Hamm; 3. Wilfred Mutch.
Grade V—1. Betty MacDonald; 2. Helen Jones.
Grade III—1. Herbert Mason; 2. Shirley Judson.
Grade I (a)—1. Ira Finlayson.
Grade I (b)—No exams.
Freda Carver, teacher.

Eye Strain is Nerve Strain

Eye-strain wears down nervous energy at an alarming rate. You may suffer from dizziness, nausea, vertigo, brain fog, indigestion and sick headache and not realize that the real cause of your trouble is eye-strain.

If due to some defect in the eye itself the oculist may help you but in any case you can, with advantage, use Dr. Chase's Nerve Food to restore the nerve force to your system.

This food treatment affords a most satisfactory means of building up the general health and the resistance necessary to fight off the ill and infectious which attack one when in a run down condition. It contains Vitamin B, and the minerals which are essential for restoration of the nervous system.

Ask your druggist about it.

Dr. Chase's Nerve Food FOR NEW PEER AND ENERGY
