PARA OIL AND GAS COMPANY FORMED

A new oil company, the Para Oil and Gas Company, is being formed with a capital of 500,000 shares of \$1.00 par value, of which 200,000 shares will be issued.

Para Oil and Gas Company is well located in the Dover Field and some of its acreage is adjoining Ajax no. 5 which is now being drilled and is expected to come in within the next ten days.

The shares will be issued at 60 cents and the interest back of the company believe that in view of the low issued capital and the excellent location of their holdings these shares will sell much higher.

LARGE OIL FIELDS LOOM AS POSSIBILITY IN BRITISH COLUMBIA

For some time past it has been believed in oil circles that British Columbia would eventually assume a position of commanding importance as a producer of oil.

Recently plans were laid before the British Columbia government by a syndicate claimed to be affiliated with the Anglo-Persian oil organization and which proposed to explore traces of oil throughout the province.

On the Queen Charlotte Islands the inhabitants have been so impressed with the indications of oil that a move has been made to form a local company for development.

BEST REPORTS INDICATE TECK-HUGHES BEING OVERSOLD Dipping down below the \$7.00 level on a huge turnover yesterday Teck-Hughes furnished some anxious moments for its wide circle of shareholders.

Advice reaching FINANCIAL SERVICE discussing the 25th level in question indicates that the first cross-out with good milling values all the way and a stronger vein structure than above.

Southern News

Miss Flora Gillis was a visitor to the city during exhibition week.

Mr. Thomas Cook, retired merchant of Murray River was a visitor to Wood Island recently.

Quite a number of persons of Port and adjacent districts intend to take in the Georgetown exhibition on Sept. 11th.

No grain has been cut locally up to this writing. Barring storms the crop promises to be quite up to the average.

Potato tops which were beginning to droop dejectedly prior to the rain of the 19th, are now gallantly erected and look bravely upward to sun and stars.

Miss Florence Fraser, daughter of Dr. Fraser of Montague, is the new teacher in Hopefield school.

Rain fell on two different occasions within the space of one week recently which was something of rare occurrence this summer.

Among the patrons of the exhibition from Wood Islands and vicinity were Miss Verna Dixon, Mr. and Mrs. Edwin McKensie, Mr. and Mrs. Howard White and Mr. and Mrs. Milburn Keenan.

Mr. Charles McDonald, formerly of Vernon River and now a student at high school in Quincy, Mass., is at present visiting with his aunts the Misses Flora and Christy Gillis, of Wood Island East.

Mr. Alexander McGregor, Jr., of Hopefield who has been employed as railway section man on a part of the Murray Harbor branch for upwards of twenty years has recently been transferred to Hunter River section.

In my green and salad days I had the privilege of a brief acquaintance with that remarkable man the late Francis Bain and I remember him well.

Francis Bain and I remember him well. "Agricola" in his articles in the Guardian frequently mentions him.

It is the fate of most men to be soon forgotten after departing this life but Bain lives on. This highly gifted man so far as I can gather was self-taught and yet he was perhaps the greatest naturalist this province ever produced.

His attainments in geology, botany and zoology were of a high order and in a sea of big and difficult words he moved with an easy and skilful grace.

PENDLETON PEN IN LEAD

NOTES ON THE PRINCE EDWARD ISLAND EGG LAYING CONTEST FOR THE WEEK ENDING AUGUST 21, 1929.

Mr. S. R. Pendleton's B.R. pen 19 led the contest for the week with 51 eggs, 62 points; Mr. George Boswall's B.R. pen 18 were second with 53 eggs, 61.7 points, and Mrs. J. H. MacPhail's B.E. pen 20 were third with 52 eggs, 58.9 points.

The Experimental Farm, Fredericton, N. B., B.R. hen 10, leads the contest for individual laying with 233 eggs, 289.6 points, and their hen 3 is second with 219 eggs, 264.1 points.

Steer Feeding At Charlottetown B. F. Tinney, Dominion Experimental Station, Charlottetown, P. E. I.

For several seasons past the steer feeding experiments at the Charlottetown Experimental Station have, in general, consisted of a study of the comparative feeding value of rutabaga, or swede turnips, and cull potatoes.

The London, Eng., Times, records the erection of a memorial to Robert Bakewell, in Leicestershire, England.

Livestock Market (Canadian Press) MONTREAL, Aug. 27.—(Dominion live stock branch)—There were 106 cattle, 309 calves, 1,115 hogs and 251 sheep and lambs for sale on the two markets.

er case was the return so high as when smaller amounts of roots were fed.

Perhaps the outstanding finding of the test is the return value received for cull potatoes.

From the above it would appear that very profitable returns are to be obtained for roots or cull potatoes when fed to short-keep steers.

It is noticeable that greater returns per ton were obtained from swedes when fed in moderate quantities, and it would seem in this respect that a moderate amount given uniformly throughout the feeding period is superior to approximately the same total tonnage fed in gradually decreasing amounts until the completion of the test.

This point is supported by additional tests in 1927, in which one lot received 30 pounds per steer per day during the entire feeding period, while a second lot received 50 pounds per steer per day at the start, this amount being reduced by 2 pounds per week until the end of the test.

The lot fed uniformly made a return of \$6.88, while those fed decreasing amounts returned only \$5.98 per ton for the roots fed.

only a couple of miles from Charlottetown at York Point. In occupation he was a farmer. He died in early middle life. A monument stands to his memory in Queen's Square near the court house.

Many Guardian readers I am sure would be very pleased to know more about this very able man whose devotion to science was a passion. Some one better acquainted with the facts of his life would do well to give in the Guardian a comprehensive sketch of his life and works.

NEWSY FARM NOTES

By Agricola

LIVE STOCK AND PRODUCTS

Canada's official stock-taking of farm animals for 1928 has just been published as "Live Stock and Animal Product Statistics." From it we learn that on the farms of the Dominion are 3,792,522 milch cows, 5,000,750 other cattle, 3,415,788 sheep, and 4,497,367 swine.

With regard to values milch cows now average \$72 per head against \$61 in 1927, other cattle \$46 as against \$39; swine \$15 as against \$14; while sheep show no change, the average value being \$10.

Anxiety to possess cattle, intensified by keen competition from the United States forced prices up, and spoiled the end of an otherwise excellent year's business.

The Report of this division, ending May 31st, 1928, is now to hand. In it the reasons for the discontinuance of the shipments of Canadian beef cattle to Britain are summarized as (1) the poor market due to industrial conditions in Great Britain; (2) the meat trade war between British and American interests in the Argentine, and (3) the higher prices prevailing in the United States.

Factory cheese was less in value and amount than in 1928. The figures are (1927), 138,056,908 lbs., valued at \$25,522,148.

ROBERT BAKEWELL, FARMER. The London, Eng., Times, records the erection of a memorial to Robert Bakewell, in Leicestershire, England.

Livestock Market (Canadian Press) MONTREAL, Aug. 27.—(Dominion live stock branch)—There were 106 cattle, 309 calves, 1,115 hogs and 251 sheep and lambs for sale on the two markets.

Carter & Co. Limited

39 Queen Street, Charlottetown, P. E. I.

The Foremost Company of its kind

Paper is now definitely connected with human progress. Few man-made things have found their way into life more completely or more indispensably than paper—Itself often a substitute, but with no substitute for itself.

Foremost among the paper manufacturers of the world stands the Canadian International Paper Company whose annual average net earnings for the past three years, after depreciation, reached the tremendous total of \$5,100,000 as compared with its \$25,000,000 6% First Mortgage Bonds outstanding.

Assets securing this issue amount to over \$85,000,000—\$3,400 for each \$1,000 First Mortgage Bond.

At a price of 95 and interest these Bonds, maturing July 1, 1949, offer: an unusual combination of safety and liberal return.
