A rather unusual situation arose in the city yesterday in connection with the funeral of a woman, whose remains were interred in the Roman Catholic Cemetery, after a service in St. Dunstan's Cathedral. It seems that a misunderstanding arose as to whether she was to be buried by a Presbyterian minister or by a Catholic priest, and there were two graves prepared, one in the People's Cemetery and the other in the Roman Catholic. Two hearses were on hand for the different cemeteries, but the funeral took place as mentioned above. It was contended that before her death she had expressed a desire to be buried by the Presbyterian minister, whilst her relatives state that her wishes were otherwise.

There will be an auction sale at Hugh B. McKay's, New London, on Tuesday, May 2nd, at 1 o'clock. There will be sold ten head of cattle, a truckwagon, a buggy, a light seeder and numerous other articles.

SAYS THE WEST IS ALMOST SOLID FOR RECIPROCITY

OTTAWA, April 25—"There is no change in the west with regard to the reciprocity situation," declared Roderick Mackenzie, secretary of the Grain Growers' Association, who returned to Ottawa this morning after spending several weeks in that country.

"The agreement," he said, "is endorsed by more than three-quarters of the people, but an increased preference and free agricultural implements are also desired. During the recess some of the opposition members have been holding meetings but they were essentially party affairs. Beyond a doubt, they all have many friends who will, for political reasons, stand by them, but there is no questioning the fact that reciprocity is strongly favored all through the west."

TO INVEST HEADACHE POWDERS IN THE STUD

WASHINGTON, April 27—Dangers so grave, according to Dr. H. Wiley, chief chemist of the department of agriculture, lurk in the ordinary headache remedy that he has determined to investigate under the pure food and drug act. Many cases in which death has followed the taking of these remedies, said Dr. Wiley today, have been brought to his attention of late. Headache powders, he said, usually contain large quantities of acetic acid, phenacetin, antipyrine or caffeine, all of which affect the heart more or less. The powder, according to Dr. Wiley, contains a larger proportion of these drugs than any physician would think of prescribing.
