Mt'l. Fruit And Vegetable Market

(C. P. by Guardian's Special Wire) MONTREAL, Feb. 15—The following cars of fruit and vegetables arrived in Montreal for the week ending Feb. 15: Apples 20; other fruits, 16, bananas, 12; other tropical fruit 35; onions 4; potatoes 132; other vegetables 21.

Freight arrivals showed a substantial gain over the previous week, recording an increase of forty four cars. The domestic fruit market shows very little change. Supplies of apples are plentiful and even more varied, but the market is rather dull. However, dealers are optimistic and expect an improvement within the next week or ten days. Prices show some variation but for the most part remain steady. B. C. delicious boxes are meeting a fair demand at 2.50 to 2.60 for extra fancy and 2.25 to 2.40 for fancy; McIntosh 2.00 to 2.25 for fancy; Quebec boxes consist of McIntosh at 2.15 to 2.25 for extra fancy; 1.85 to 2.00 for fancy and 1.70 to 1.75 for extra fancy Pameuse.

Supplies of domestic vegetables are more plentiful due to the milder weather, demand is steady and prices for the most part are a little easier. Potato arrivals are heavier, demand is steady and prices a little weaker. P. E. I. mountains are quoted at 1.30 to 1.35 for 90 pounds. N. B. mountains 1.10 to 1.20 for 80 pounds and Quebec whites 1.05 to 1.10 for 80 pounds.

Strip Farming For Drift

Where precipitation is less plentiful, the moisture stored in the fallow is too valuable for any of it to be sacrificed for producing a cover crop, and it is necessary to find other means of drift control. Of all measures adopted to meet this situation, strip farming has been of the most value. It should be stated frankly, however, says Mr. A. E. Palmer, Dominion Experimental

Station, Lethbridge, Alberta, that although striping is a most effective and practical method of controlling soil drifting, it does not entirely prevent it and so must be accompanied by careful cultural practice. Strip farming, as the term implies, consists of dividing the field into alternating strips of crop and fallow. For convenience strips are laid out either directly north and south or east and west, whichever is the more nearly at right angles to the direction of the most severe winds. The idea that strips are of value only where drifting winds come from but one direction does not seem to be correct, as they furnish direct protection from all winds striking them at any angle.

A Coveted Honour

Another popular assumption has been shattered by a doughty champion from the West. While public opinion has identified Eastern Canada more or less as the hub of floral plant breeding in the Dominion, the winning of a highly-prized and signal honour by a Manitoban at the world's great horticultural centre, the Royal Horticultural Society at London, England, has once more directed attention to the long list of champions emanating from Western Canada. A coveted honour, the Cory cup, has been awarded to Mr. F. L. Skinner, Dropmore, Manitoba, for breeding a new variety of lily which he has named the Maxwell. The cup is awarded to the originator of the best new hardy plant of garden origin shown to the society during the year. The Maxwell lily was exhibited last July in London, and the presentation of the cup will be made with due ceremony at the next annual meeting of the society on 20th February.

INTERMEDIATE HAWKS WIN

(C. P. by Guardian's Special Wire) SHELDIAE, Feb. 14—Moncton Intermediate Hawks defeated the Shediac Beavers 3-3 here tonight in a sudden death game for a berth in the play-downs leading to the New Brunswick Intermediate championship. The Hawks will now meet St. Andrews in the first round of the play-downs, it was stated.

BRIDGETOWN WINS FROM MIDDLETON

(C. P. by Guardian's Special Wire) BRIDGETOWN, N. S., Feb. 14—Taking an early lead, Bridgetown defeated Middleton 3-1 in the first game of the Central Valley League finals. Frankie Foley shot the first marker half way through the first and Gordon Shaffner tied it up in the middle period. LeBlanc gave the locals a one-goal margin before the period ended, and Foley made the light flash again in the final session. The champions of the league will be declared Friday night, when Middleton plays host to Bridgewater.

Poultry In Storage

The final report of the Dominion Bureau of Statistics covering cold storage holdings in Canada on the first of the year gives stocks of poultry in storage at that date as 11,649,762 pounds, as compared to a five-year average on the same date of 10,118,240 pounds. The storage holdings of poultry appear to be divided evenly among the various provinces. Quebec stocks are approximately 2 1/2 mill on pounds, Ontario stocks, 3 1/2 million pounds; Manitoba, 2 1/2 million pounds; while in Saskatchewan and Alberta the stocks are approximately 2 1/4 million pounds.

MOUNTIES HAVE ONE GOAL LEAD

(C. P. by Guardian's Special Wire) AMHERST, N. S., Feb. 14—Mount Allison University will carry a one goal lead into the final game in the Central League playdowns by virtue of their 3-2 win over Amherst Ramblers here tonight.

Amherst took an early lead in the opening period when Pat Atkinson scored on a pass from Vic Fraser. Hamilton tied the count in the second on a gang play while the Ramblers had a man in the penalty box. MacDonald gave Mounties a lead on another combination play, taking a double pass from Taylor and Gillis, and Allan gave the winners a safe margin with a shot from the blue line that rolled over the Amherst goalie's shoulder into the cage. Amherst sent four men up the ice and Pat Atkinson collected his second counter on a two-man assist to close the scoring.

The series will end at Sackville on Friday night.

Fruit Act Revision

In order to meet suggestions and recommendations of the various fruit interests of the Dominion, a proposed revision of the Fruit Act, 1923, has been drafted. The Act may be cited as the Fruit Act 1934, and will cover the present-day requirements of the trade. The word "fruit" means fruit of every kind grown in Canada, known botanically as such, except cranberries and wild fruit in respect of which no grades are prescribed. Copies of the proposed Act have been distributed to all parties concerned, and any criticism or recommendation in connection therewith should be made with the least possible delay to the District, Provincial, or Dominion Association as the case may be, or direct to the Fruit Commissioner, Dominion Department of Agriculture, Ottawa.

Primeau Overtaken By Boucher

(C. P. by Guardian's Special Wire) MONTREAL, Feb. 12—Out of action for several games due to illness, Joe Primeau, centre of Toronto Maple Leaf, was forced to yield second place in the National Hockey League scoring statistics to Frank Boucher, New York Rangers durable playmaker.

Charlie Conacher of the Leafs also missed several games and was held pointless but still leads the entire league with 25 goals, 15 assists and 40 points. Next comes Boucher with 10-25-35, a gain of one point for the week. Primeau following with 10-24-34.

A shift in alignment of runners-up in the United States division resulted in three of the speedy Ranger forwards running one-two-three in the section. They are Boucher, Cecil Dillon, who has 8-21-27

and Bun Cook, with 26-0-25, just missing Nels Stewart of Boston and Paul Thompson, Chicago, out of the "show" position.

Following is the standing, which includes last night's games.

The Argentine has never been a large flour exporter, and a steady decrease has characterized the exports of flour for the past ten years from the lower Danubian countries to Europe.

Some importing countries desire low grades of flour, while others prefer a high quality flour grown in Canada and the United States.
