FACTS ABOUT DENTISTRY.

(Patriot.)

Dr. Kennedy, has just returned from his visit to New York, where he spent six weeks studying the latest methods in connection with every branch of dentistry. The Doctor, as is well known, is connected with the Berlin Dental Parlors of this city, and in this connection the following will no doubt prove of interest to Patriot readers:

The Berlin Dental Parlors have more than an entire provincial reputation for strictly up-to-date dentistry. The best work without pain, and at the lowest possible cost is their motto; while the improvements which they are adding from time to time are of twofold interest, for while they give an idea of what great advancement is being made in the profession, they also show that neither expense nor trouble is any impediment to the proprietors of the Berlin Dental Parlors in the way of giving their patrons the best to be had in their line of work. Their claim too, to having a thoroughly equipped modern establishment is fully borne out, not only by their great success among our Island people, but also by the fact that a large percentage of the commercial travellers who visit the Island, many of whom come from the largest cities in Canada, make it a point to have their dental work done by Drs. Maloney and Kennedy, which proves most certainly that they give satisfaction is every way.

The crown and bridge work done in the Berlin Dental Parlors is the acme of perfection, and as everything in connection with it from start to finish is done on the premises, perfect satisfaction is assured. It may seem strange to some, but it is not the less true, that there are but three or four dental establishments in the entire Maritime Provinces where crown and bridge work are made on the premises. The Berlin Dental Parlors have a complete plant for the manufacture of this class of work and the department is in charge of a specialist. To one not familiar with the business it is a revelation to spend an hour in a well equipped dental establishment such as The Berlin Parlors. As to the operating department, it is also a revelation; as there may be seen work that has hitherto been regarded with horror, now regarded as a pleasure.

There, too, are the different instruments and appliances, with their bright polish telling of absolute cleanliness, and vouched for by the sterilizer, through which each instrument passes before being used a second time. The famous Berlin Method of painless Dentistry; as well as the also-famous Cataphonic outfit for the same purpose by electricity, are seen to great advantage in this department. Teeth that are aching, or teeth that are abscessed, are treated and filled at one sitting; this is something that is much appreciated by patrons of the Parlors, as under the old treatment a patient was compelled to go day after day, often for months, to have a tooth saved. The doctors in the Berlin Dental Parlors practice the saving of teeth, not the extracting of them, as one of them said, "We always advise saving a tooth no matter how badly decayed and only extract when patients insist upon it." The operating department is beautifully fitted up with two of the celebrated Harvard dental chairs, with the new Clark of Chicago fountain spittoons attached, and in every other way each department is so thoroughly up-to-date, that we became so interested that only look of time took us away.

The Berlin Dental Parlors are commencing their third year among the people and the fact that last spring the proprietors were compelled to secure a third dentist, Dr. C. V. McCready, a graduate of the Philadelphia Dental College, speaks volumes for the success of their work here and their faithfulness in the performing of it. Progressiveness they believe in and each year one of them spends some weeks in Boston and New York, attaining to and keeping in the front rank of their profession, realizing that the knowledge thereby gained for themselves, will, in turn, be of inestimable benefit to their hosts of patrons.

Having just completed a course of instruction in Ladies Garment cutting, as taught in the Schools of Boston and New York, it places us in a position to cut garments that will be a credit to ourselves and give a stylish appearance to the wearer.
