**CHILDREN'S AID SOCIETY** adjourned annual meeting Thursday night 8 o'clock, City Hall. Public invited.

**CITY POLICE COURT**—At the Sundry Magistrate's Court yesterday, a man charged with vagrancy was sentenced to 30 days in jail, and a man charged with operating a motor vehicle while intoxicated was sentenced to seven days in jail. A drunk and disorderly was remanded for one week.

**FUNERAL YESTERDAY**—The funeral of the late Murdoch Ross, which was largely attended, was held from Zion Church yesterday afternoon. Interment was in the People's Cemetery. Services were conducted by Rev. G. Carlyle Webster. Honorary pallbearers were W. R. Cruikshank, W. T. Weir, J. C. Cooke, Gordon Leitch, Frank Currie, Herbert Jewell, Willis Nicholson, J. B. Roper, Preston McDonald, Active pallbearers were, Donald MacKinnon, Ernest Cadmore, Harry MacDougall, George MacLeod, McEwen, Alex. A. MacDonald, Members of the I.O.O.F. attended in a body and the Odd Fellows funeral service at the church was conducted by George Ryan and Robert Compton. The choir sang the Shepherd's Psalm. Mr. Ross, a well known tailor in Charlottetown for many years, died last week in Toronto where he had been residing since 1943.

**FUNERAL AT YORK**—The funeral of the late Edward J. Vessey was held from York United Church yesterday afternoon. Services were conducted by Rev. J. MacCallum. Rev. W. D. MacPherson, Rev. T. Wilson, Rev. H. C. Christie. Interment was in York Cemetery. The pallbearers were, Harry Lewis, Ira Lewis, Frank Vessey, Joseph Ready, Anderson McRae, Ivan Vessey.

**AID SOCIETY COMMITTEE**—Maj. T. E. MacNutt, Mr. Harold Hennessey and Maj. Allan Nicholson have been appointed by Rev. G. Carlyle Webster as a nominating committee for the officers of the Charlottetown Children's Aid Society. Rev. Mr. Webster, as chairman of the Society's annual meeting, was asked to appoint the committee. The annual meeting was adjourned last week and will be resumed this evening in the City Council chambers.

would be prepared to meet the President if not in Washington. The 60-year-old Stalin said that doctors' orders prevented him from fulfilling a wish to visit Washington. He suggested a meeting could be held in the Soviet Union.

If, however, the proposals should meet with the President's objection, a meeting could be arranged in Poland or Czechoslovakia, according to the President's wish," the reply stated.

Both Roosevelt and Truman invited Stalin to the United States capital, but he turned down the invitations, pleading health reasons.

The exchange followed up the Prime Minister's reply Sunday to four questions put by Smith regarding Stalin's willingness to discuss a "pact of peace" with the President.

Stalin said then he would be willing to take part in such a meeting and that the Soviet Union is ready to consider a declaration pledging Russia and the United States never to declare war against each other.

**FISHERIES**  
 (Continued from Page 3)

greatest problem of the fishing industry in Eastern Canada today, H.V.D. Laing, manager of Maritime-National Fish, said in a prepared paper. The paper, prepared by H.P. Connor, assistant manager of the Maritime-National.

"Of one thing only am I sure," he said, "and that is the greatest hindrance and drawback in the fish business today is the unpredictable supply at any one time. There are periods of high production when you get more fish than you can conveniently handle, and there are other periods when your plant is closed.

"Anything which will serve to iron out these peaks and valleys and to level off our production will enable the industry to be produced more economically and more satisfactorily, and certainly it will greatly facilitate the efforts being made towards an increase in fish consumption."

Mr. Laing dealt specifically with the need for research in the fresh fish industry. He said there was scope for scientific study to improve methods of catching, storing, processing, transporting and marketing fish.

For one thing, except for "very minor improvements," there had been no real change in the methods of catching fish in the last 75 years. In the handling of fish there had been some improvements in refrigeration, icing, and sanitation.

However, there were still such problems as eliminating bacteria so that fish would keep fresh longer and better refrigerated. A completely mechanized method of smoking fish would be a great advantage. He envisioned a machine which would take a haddock or a fillet at one end of a chain and deliver it at the other end without too great a lapse of time in a properly smoked condition, ready for freezing and packing.

He pointed to today's modern methods of freezing fish as an example of how scientific research could aid the industry.

Another problem he suggested for scientific study was a use for fish entrails which now are thrown away.

**Pimples**

It will definitely eliminate pimples, blackheads, red spots, whiteheads, acne, freckles, or any skin blemishes you have. It is a scientific formula that has been used by thousands of people. It is a scientific formula that has been used by thousands of people. It is a scientific formula that has been used by thousands of people.

**Fear 4 Deaths In Plane Crash On Lake Simcoe**

**BARRIE, Ont., Feb. 2**—(CP)—Fears that four persons had been killed in a plane crash north of here were expressed tonight after discovery of the wreckage of the plane partly submerged in the ice of Lake Simcoe.

A farmer in the district 15 miles north of here heard the plane's motors stop suddenly during a storm late this afternoon and then heard it crash into the ice.

Investigators saw the plane, a four-seater, identified as a Ryan Navion with the licence numbers N-44-80-K, evidently from the United States.

It was established that the plane was bound for Pittsburgh, Pa., from North Bay, Ont. It was believed to have aboard a man and wife and their two children.

Darkness and wide cracks in the ice prevented closer inspection and police officers said an attempt to recover the machine would be made at daylight.

The plane hit the ice about a mile from shore, off Hawkestone, which is 16 miles north of here on the west shore of Lake Simcoe.

**Two Killed, Five Injured When Big Bombers Collide**

**SHREVEPORT, La., Feb. 2**—(AP)—Two United States Air Force bombers collided in the air today, killing two men and injuring five others.

One plane exploded and disintegrated while the other crashed into a field and was buried in mud. The injured parachuted before the explosion and crash.

The planes collided at about 4,000 feet while practising instrument flying. One plane was from the instrument school and the other from the advanced pilot school.

(Continued from Page 1)

ada some 15 to 20 years ago.

Markets are as changeable as the weather. At that time, buyers and commercial men outside the island suggested cross-breeding to satisfy market demand for short-nosed, short-bodied lard hog.

Other hog-raising regions of the Dominion began retailing the Yorkshire but Federal agriculturalists in Prince Edward Island kept the original long-bodied bacon Yorkshire was the pig that would remain "ace high" on all markets.

Island raisers went their own quiet way. Then reports began to filter through that other Canadian Yorkshire raisers were having trouble with a disease called "rhinitis," which affects the pig with a short nasal passage.

That was the first indication that dealers might have been wrong in changing the breed to conform to the market's whim for conformation rather than practicality.

About 50 head were shipped to the Prairies in 1946. That was the indicator that Islanders had been right. In 1947 there were more shipments to Western Canada and the largest day saw 146 head clear Charlottetown. Last year, 100 head went to Ontario, a carload or so to Saskatchewan and Quebec and 75 head to Iowa—all for breeding purposes—as the little seaside Province broke into the American market.

Pipe-smoking, bespectacled Harry Clay says orders are piling up for his breeders. Potato, fox and other farmers are dabbling in raising these new Island "leaders" and some have dropped spuds entirely to go into hog raising.

Mr. Clay says he would like to see more breeders in New Brunswick taking some of the Island stock. He feels there will be more orders than the Island can handle.

In the latest release of the Advisory Registry Board for Swine, which closely follows trends in raising and markets, Island producers had 20 sows qualify for the Board for the fourth quarter of 1948. Next in line was Ontario with 12. Quebec had three and the rest of the Provinces, except British Columbia, two or one each.

Qualifications are based on a combination of number of pigs sired at the weaning age, maturity of the test group and the score in the slaughter-test results.

**Red Cross Junior Work From Europe To Be Displayed**

Stimulating the exchange of international correspondence between the school children of the world, the Red Cross is encouraging the sending of handicraft exhibits from the Red Cross Juniors in Europe to the youngsters in North America.

The local Red Cross has received displays from Poland, Norway, Greece and France, each country sending two or three dolls dressed in their national costumes.

Poland shows how the peasants of her land dress for winter with the embroidered waistcoats, heavy gaiters and handwoven leather boots.

Two of the dolls from Greece are in the peasant costume of Salonika; one is dressed in the full-skirted "kilt" of the Greek Royal Guards.

France has sent two dolls, one a Parisian model in all her finery and the other dressed as a Normandy peasant.

The Norwegian exhibit is of several types of handicrafts, woodwork and models of national dress. It has included a miniature, hand sewn coat of fur as worn by the people of Lapland.

These dolls will be on exhibition at the teachers' convention and Mrs. MacCallum, director of Junior Red Cross activities, has announced the Polish exhibit is for exchange with any school in Prince Edward Island with Junior Red Cross membership.

**Montague Wins From Murray Harbor 6-3**

On Monday night the Montague Meteor, journeyed to Murray Harbour where they defeated the Black Hawks by the score of 6-3. This makes the third game in a row for the Montague squad who are really showing excellent hockey ability, and overcoming their opponent by smooth passing plays.

The game itself proved a repetition of the former game with the Montague squad outpacing the Murray Harbour team, who are now proceeding to bolster their defences with more practice in their new and excellent rink which is a treat to the people of Murray Harbour.

Lineups:  
 Montague — Goal, F. Fraser; defence, A. MacLure, R. MacDonald, D. George, A. Nelson; forwards, K. Clements, Roy Collings, Rich Collings, E. Carver, H. Power, J. Lanning, P. Fraser.  
 Murray Harbour — Goal, S. MacKay; defence, W. Harris, R. Chapman, B. Dutton, S. MacNeil; forwards, Roy MacDonald, W. MacNeil, A. Irving, G. MacKay, G. Harris, S. Hume, L. Herring.

**Groom Acquitted In Race Track Slaying**

**TORONTO, Feb. 2**—(CP)—Vincent St. Lawrence, 24-year-old groom, tonight was acquitted of murder in the race-track bludgeoning of George (Cowboy) Parker.

St. Lawrence pleaded innocent to the charge, laid after Parkes, 37-year-old groom who once lived in Calgary, was found with his head ringing following an Oct. 9 drinking party.

Kenneth Parrington, a former jockey, said that on the night of the slaying he recognized St. Lawrence 200 feet away, standing over the fallen Parker.

**Korea Applicants For U. N. Membership**

**LAKE SUCCESS, N.Y., Feb. 2**—(CP)—The republic of Korea today is the 72nd country to apply for membership in the United Nations.

Observers here saw little chance that the government of American occupied Southern Korea will gain immediate acceptance as the 59th member of the world peace agency.

Thirteen applications have been rejected either by Russian vetoes or by failures to gain the seven necessary votes in the 11-member security council.

Russia, dominating the Communist Government of Northern Korea, could be expected also to veto the Southern Korean application.

**BIG INDUSTRY**

Canadian pulp and paper exports amount to \$600 million annually.

**Are YOU Coming?**

**Always "Something Doing" At Experimental Station**

"Any day's a busy day at the Experimental Farm" it's been said. And it turned out that way yesterday. Some of the staff were lecturing and demonstrating to the farmers on the Agricultural Short Course; two great Caterpillar tractors were hauling the "Carter" house to its new site on Mt. Ed. Road; a few of the men were thinning out the Uplands wood-lot and Fred Driscoll was busy in the poultry section. Even that there was a great deal more going on.

Dave Schurman, with the look of spring in his eye, was thinking of greener pastures and more succulent winter feed. "If the farmers would only get into the habit of dusting in a pound or two of Alfalfa with the grass-seed mixture, they would be surprised at the better yield and improvement in the quality of their hay," he said. "It's like an insurance, too. Some years it kills out and the clover comes. Some years the alfalfa will turn up in the timothy and produce a valuable mixture for cow-feed. Anyway, you get to the alfalfa and you're sure to get it, and that's always good information."

Genetics ready for the next crop of chicks twelve breeding pens have been set out. These consist of 10 to 12 Barred Plymouth Rock hens, one year or over, which will be used as the breeding stock for this year.

**Who's Who In P. E. Island Agriculture**

Featured elsewhere in today's issue is a Canadian Press story on the high reputation that P. E. Island "Yorkie" has gained throughout the North American Continent. This reputation is largely in the hands of the Live Stock Field Services in P. E. I. of which Mr. Clay is officer in charge.

Mr. Clay was born on April 17, 1895 at Bridgetown, King's County, Prince Edward Island, on his father's mixed farm which was part of the original parcel of land granted to his great-grandfather, a medical officer in the Crimean war and who is believed to have been the first practising doctor in the Bridgetown country.

From the old school at Bridgetown, he matriculated to Prince of Wales College, from which he received a first class teacher's licence and taught school for four years on the Island at Primrose, Mount Stewart and Stanley Bridge and also for a short time at Loch Ern, Albert as well as his present position as a Senior Live Stock Fieldman and officer in charge of Live Stock Field Services in P.E.I. and Canada.

At the fall of 1922, Mr. Clay joined the Dominion Department of Agriculture as live-stock products grader, after spending a few months with the Provincial Department of Agriculture. He rose in this service until, in 1927, he was promoted to Senior Live Stock Products Grader. He spent some time grading at Edmonton, Alta.; Hamilton and Barrie, Ont.; and Montreal and Hull, Que., and in 1946 was appointed to his present position as a Senior Live Stock Fieldman and officer in charge of Live Stock Field Services in P.E.I. and Canada.

From 1931 until 1945, Mr. Clay operated a farm in East Royalty in conjunction with his agricultural duties and established a better-than-average herd of registered Ayrshires. From 1922 his chief interest was field work with swine and he states, "due to the faddish ideas of swine breeders here and western Canada, it was evident that it would be an advantage to Island breeders to build up a distinct strain of Yorkshires without importation of breeding stock. With the help of Messrs. L. W. Egan and Heath Saunders, Live Stock Fieldmen, we started this idea about 1934 and there has been little breeding stock imported since. With the wonderful co-operation of the Island swine breeders, we have obtained results here on Prince Edward Island, which are attracting the attention of major swine breeders all over the American continent."

Married in 1921 to Miss Flora Belle Barlow, Wellington, P. E. I., the Clay family consists of two sons and three daughters; eldest boy Ken, who is with the Department of Transport as a vehicle operator on Anticosti Island; Mona, a special class teacher in West Kent School; Shirley, 13; Robin, 8, and Myrna, 7, are attending Parkdale School.

His philosophy of living, Mr. Clay states, "Don't be afraid to take the unpopular course—if you're sure you're right." And he expresses his idea of success thus: "When you put your whole heart and soul into your job, success comes automatically."

**2,250,000 REHOUSED**  
 LONDON, Feb. 2—(Reuters)—Some 2,250,000 Britons have been rehoused in Britain since the end of the war, it was announced today. An official survey of the housing situation revealed that more than 425,000 permanent houses have been built during that time.

**Darnley Hands Ch'town Team 12-6 Defeat**

Last night at Kenalington rink, the Darnley Black Hawks defeated the Charlottetown Ramblers by a 12-6 score.

Paced by Forbes Thompson, who had a field day, garnering seven of his team's goals, the Darnley squad showed too much drive for the town squad, who fought an uphill fight, being four goals down in the first period, only to come back strong in the second session to score four while limiting Darnley to two. But in the final session the Rambler defence fell apart and Darnley showed five goals against one for Rambler.

Lineups — Goal, Callbeck; defence, J. MacNeil, D. MacLean, R. Kennedy; forwards, McIntyre, Murphy, Dickleson, MacDonald, McRae.

Black Hawks — Goal, Woodside; defence, G. Woodside, C. MacKenzie; forwards, E. Harding, L. Harding, F. Thompson, E. MacKenzie, D. Harlow, L. Kelly.

Referee — H. Champion.

**Poultry Experiments**  
 Over at the Poultry Houses, Mr. Fred A. Driscoll, head poultryman, is kept pretty busy with a couple of experiments under way and some changes going on. Mr. B. Frank Timney, in charge of this work at the Farm, has been on the sick list for the past month. Lorne Hansmy and Albert Kelly were using new trap nests to replace the old trigger type under the dropping boards. One hundred new wall-type trap nests are being made of masonite with steel doors. Pits will be used under the roosting space.

Apparently there has been some argument in higher poultry circles as to whether breeding has really very much to do with the production of the hen. There is a school of thought that says if you feed her well and give her the care and quarters given to the fancy stock, the old common or garden hen will do just as well. Well, they're trying out this theory at the Experimental Farm.

The 100 foot henhouse is divided into four pens, each with 125 laying pullets, in each pen three-quarters are Barred Plymouth Rocks and the other quarter is
